**ANIMAL REHABILITATION TASK FORCE  
MEETING OF JUNE 20, 2016**

**INFORMATION SHEET: BACKGROUND AND REFERENCES**

**Agenda Item 3: Background – Sunset Review Recommendations**

For the past four years, the Veterinary Medical Board (Board or VMB), with the help of the Multi-Disciplinary Committee (MDC), has examined the issue of persons involved in rehabilitative services for animals. The impetus for the research, and an eventual regulatory solution, was the number of concerns the Board received regarding unlicensed persons diagnosing and treating animals under the guise of “animal rehabilitation” (AR). The Board became increasingly concerned about the welfare of the animals being treated by unlicensed personnel, and ultimately learned through oral testimony at its public meetings, that animal harm has occurred.

The Board has included the issue of AR at a number of its meetings throughout 2012-2013 and the discussion has generated a great deal of interest from the public who attended the Board meetings to express their support or concern regarding the Board’s role in regulating AR services. In June 2015, the Board filed its regulatory proposal for AR, and a public hearing was held September 10, 2015. The Board received several hundred comments, thousands of signatures on petitions, and heard testimony from over 60 interested parties. The testimony at that hearing included similar opposition as was raised in public meetings in 2012/2013 and highlighted the following sentiments:

- Complementary therapy, such as massage, should not be defined as AR.
- Supervision parameters are overly restrictive.
- The lack of specific training in AR for all providers poses a consumer protection problem.
- The definition of AR in the Board’s proposal is too broad.

The following reflects some of the more recent concerns and feedback from interested parties in response to the Board’s regulatory proposal:

- This is an attempt by the Board to restrict business competition.
- AR should be regulated to protect animal patients from incompetent providers.
- Specifically state that Musculoskeletal Manipulation (chiropractic treatment) 16 CCR. Section 2038 is not being modified by the regulatory proposal.
- Since animals are deemed property, the consumer should have a right to choose complementary services for their animals.
- Significant negative impact to jobs and businesses would result if the regulations

were to take effect.

- The supervision requirement is far too restrictive; there should be a change from the direct supervision requirement to indirect supervision.
- The level of supervision should be determined by the referring veterinarian.
- Massage should be removed from the definition of AR.
- Exercise for the prevention of disease is not medicine and should be excluded.
- Horse trainers are not licensed and yet provide most of the exercise therapy for race horses.
- There are not enough veterinarians to oversee AR services and thus the regulations present a barrier to access for the consumer.
- The regulations will drive up consumer costs for AR.

Although this issue has been considered by the Board for some time, several more recent policy and legal issues have been raised. Initially, the Board must consider the definition of the practice of veterinary medicine and whether the practice of veterinary medicine pursuant to BPC Section 4825 authorizes the Board to adopt regulations that would allow other practitioners who are not licensed by the Board to engage in aspects of veterinary medicine. If the modalities or interventions included in the regulatory proposal do not constitute the practice of veterinary medicine, it is questionable whether the Board can adopt regulations to govern areas outside its scope of practice.

In either case, concerns have been raised that the Board is attempting to limit business competition and protect the profession's financial interests, not to further its consumer protection mandate. The Board is confident that the impetus and rationale for pursuing a regulatory proposal regarding AR is purely motivated by the concerns raised before the Board regarding animal welfare and not a form of protectionism. That being said, the Board is mindful of the public perception and is taking another look at how the regulatory proposal may be modified to address the public's concerns.

At its October 20, 2015 meeting, the Board voted to withdraw its regulatory action on AR from the Office of Administrative Law (OAL) and delegate to the MDC the task of revising the proposed regulation in light of the numerous challenges raised by interested parties. The Board provided specific direction to the MDC to formulate language that would: define that AR is the practice of veterinary medicine, describe the practice of AR and eliminate the laundry list of modalities, address whether minimal education or training requirements should be specified, explore the option of an indirect supervision parameter, and include the requirement that the settings where AR is performed is subject to holding a premises registration with the oversight of a Licensee Manager (BPC Section 4853).

At the January 2016 meeting, after a lengthy discussion, the MDC decided to table consideration of the animal rehabilitation issue pending a recommendation from the legislature through the sunset process.

**Legislative Staff Recommendation:** *The Board should create a task force comprised of stakeholders including veterinarians, RVTs, animal rehabilitation and related animal industry professionals, consumers, and representatives from the legislature to further examine the issue and present a recommendation to the Board by January 1, 2017.*

*2016 Board Response:*

The Board appreciates the complexity of the issue of animal rehabilitation and has approached the concept of regulation from the standpoint of how to most effectively protect the public and the public's animals, while considering issues such as access, as well as the vast difference in terms of the level of experience and training of individuals who provide this specialized care. Several public Board meetings and hearings have attracted interested parties to the issue, and although the Board has considered much of the input it's received from the stakeholders, the Board is eager work with a diverse task force with the charge of addressing issues related to supervision, education and training, and settings where AR services may be provided.

The Board has identified the organizations which should be represented on the AR Task Force. The composition of the task force includes industry groups, consumers, regulatory bodies, universities, practitioners specializing in rehabilitative care for animals, and representatives of the Legislature. The first of at least two AR Task Force meetings is scheduled for June 20, 2016 to be held in Sacramento.

#### **Agenda Item 4: Mission and Vision of the VMB**

**Mission Statement:** To protect consumers and animals by regulating licensees, promoting professional standards, and diligent enforcement of the California Veterinary Medicine Practice Act.

**Vision Statement:** An environment in which Californians have access to high-quality veterinary care for all animals.

#### **Agenda Item 5: Mandate – Priority of board; Protection of the public (Business & Professions (B&P) Code Section 4800.1)**

Protection of the public shall be the highest priority for the Veterinary Medical Board in exercising its licensing, regulatory, and disciplinary functions. Whenever the protection of the public is inconsistent with other interests sought to be promoted, the protection of the public shall be paramount.

#### **Agenda Item 6: Scope of Practice(s)**

A. *Practice of veterinary medicine, surgery, or dentistry (B&P Code Section 4826):*

A person practices veterinary medicine, surgery, and dentistry, and the various branches thereof, when he or she does any one of the following:

(a) Represents himself or herself as engaged in the practice of veterinary medicine, veterinary surgery, or veterinary dentistry in any of its branches.

(b) Diagnoses or prescribes a drug, medicine, appliance, application, or treatment of whatever nature for the prevention, cure, or relief of a wound, fracture, bodily injury, or disease of animals.

(c) Administers a drug, medicine, appliance, application, or treatment of whatever nature for the prevention, cure, or relief of a wound, fracture, bodily injury, or disease of animals, except where the medicine, appliance, application, or treatment is administered under the direct supervision of a licensed veterinarian subject to Article 2.5 (commencing with Section 4832) or where the drug, including, but not limited to, a drug that is a controlled substance, is administered by a registered veterinary technician or a veterinary assistant pursuant to Section 4836.1. However, no person, other than a licensed veterinarian, may induce anesthesia unless authorized by regulation of the board.

*B. Regulations defining tasks of technicians and veterinarians (B&P Code Section 4836):*

(a) The board shall adopt regulations establishing animal health care tasks and an appropriate degree of supervision required for those tasks that may be performed only by a registered veterinary technician or a licensed veterinarian.

(b) The board may also adopt regulations establishing animal health care tasks that may be performed by a veterinary assistant as well as by a registered veterinary technician or a licensed veterinarian. The board shall establish an appropriate degree of supervision by a registered veterinary technician or a licensed veterinarian over a veterinary assistant for any tasks established under this subdivision and the degree of supervision for any of those tasks shall be higher than, or equal to, the degree of supervision required when a registered veterinary technician performs the task.

*C. Scope of practice of physical therapy (B&P Code Section 2620):*

(a) Physical therapy means the art and science of physical or corrective rehabilitation or of physical or corrective treatment of any bodily or mental condition of any person by the use of the physical, chemical, and other properties of heat, light, water, electricity, sound, massage, and active, passive, and resistive exercise, and shall include physical therapy evaluation, treatment planning, instruction and consultative services. The practice of physical therapy includes the promotion and maintenance of physical fitness to enhance the bodily movement related health and wellness of individuals through the use of physical therapy interventions. The use of roentgen rays and radioactive materials, for diagnostic and therapeutic purposes, and the use of electricity for surgical purposes, including cauterization, are not authorized under the term "physical therapy" as used in this chapter, and a license issued pursuant to this chapter does not authorize the diagnosis of disease.

(b) Nothing in this section shall be construed to restrict or prohibit other healing arts practitioners licensed or registered under this division from practice within the scope of their license or registration.

**Agenda Item 7: Training**

AR is an emerging field in the veterinary profession. It became a specialty in 2010 as the American College of Veterinary Sports Medicine and Rehabilitation. This specialty just admitted 50 new veterinarians in May, 2016.

The American Veterinary Medical Association (AVMA) notes on the *Essential and Recommended Skills List* (updated January, 2016) that Certified Veterinary Technicians know how to perform “Physical Therapy: hydrotherapy, post-operative, orthopedic, neurological, explain care of recumbent patient.” (Page 6 of the AVMA CVTEA Guidelines.)

The American Association of Veterinary State Boards’ (AAVSB) list of tasks for RVTs/CVTs include Task 50.03: “rehabilitation therapy”. In the AAVSB topics for the Veterinary Technician National Exam (updated 2013), Item 34 is “animal nursing procedures and rehabilitation therapies”.

UC Davis Veterinary School offers Course *DVM489 – Physical Rehabilitation*. Course description: “Participate in physical rehabilitation evaluation to diagnose movement dysfunction, design and effectively implement an evidence-based treatment plan to restore, maintain or enhance optimal physical function after injury, surgery, or disability. Emphasis on development of observation and manual assessment skills.”

Western University also has some introductory courses on AR. It even has a faculty member (Dr. Martina Haupt, DVM) who lists her main area of interest as “Animal Rehabilitation (Physical Therapy for Small Animals.)”

### **Agenda Item 7A and 7B: Additional training/certification**

The following programs offer certification in animal rehabilitation:

1. **The Animal Rehabilitation Institute** offers the Certified Equine Rehabilitation Assistant (CERA) program for veterinary technicians and physical therapy assistants. Classes are held in Florida. [animalrehabinstitute.com](http://animalrehabinstitute.com)
2. **The Canine Rehabilitation Institute** offers the Certified Canine Rehabilitation Assistant (CCRA) program for veterinary technicians at training facilities in Florida and Colorado. A 40-day internship is required as part of the program. [caninerehabinstitute.com/CCRA.html](http://caninerehabinstitute.com/CCRA.html)
3. **Healing Oasis** offers the Certified Veterinary Massage and Rehabilitation Therapist (CVMRT) program for licensed or certified veterinary technicians, licensed veterinarians, licensed physical therapists, licensed nurses, and licensed or certified massage therapists at its facility in Wisconsin. [healingoasis.edu/veterinary-massage-rehabilitation-therapy-program/](http://healingoasis.edu/veterinary-massage-rehabilitation-therapy-program/)
4. **NorthEast Seminars** offers the Certified Canine Rehabilitation Practitioner (CCRP) and Certified Equine Rehabilitation Practitioner (CERP) programs for veterinary technicians, veterinarians, and physical therapists at The University of Tennessee. [vet.utk.edu/clinical/rehab/programs.php](http://vet.utk.edu/clinical/rehab/programs.php)

### **Agenda Item 8: Other states**

Eight states currently have exemptions that allow for physical therapists to provide animal rehabilitation services to animals (Colorado, Nebraska, Nevada, New Hampshire, Oregon, South Carolina, Utah, and Virginia). All of these states also recognize the authority of a veterinarian to provide animal rehabilitation without requiring additional certification by the veterinarian.

The other forty-two states have not created exemptions and therefore animal rehabilitation falls under the scope of veterinary practice. Currently, many of these states still refer to AR as a

“complementary” therapy and make a blanket assessment that all complementary therapies, unless specifically exempted, are the practice of veterinary medicine. Five of the forty-two states (Louisiana, Ohio, New York, Missouri, and Vermont) do specifically mention physical therapists in their veterinary practice acts, but they require a physical therapist to perform animal rehabilitation under the direct supervision of a veterinarian.

The relevant regulatory schemes of Colorado, Nevada, and Nebraska are similar to each other. A veterinarian writes a “medical clearance” or letter of referral that says that a patient needs AR and it is safe to perform. In each case, the PT who does the rehab must have undergone some training in animal anatomy. Colorado requires 80 hours of class instruction and 120 hours of hands-on training; Nevada requires 120 class hours and 124 hours hands-on; and Nebraska requires 160 class hours and 50 hours hands-on.

### **Agenda Item 9A: Licensing matters**

#### *A. Physical Therapy vs. Animal Rehabilitation*

In California, we cannot use the phrase “physical therapy” when referring to animal rehabilitation, because “physical therapy” is a term protected by the California Physical Therapy Practice Act.

#### *B. Excluding Wellness Modalities*

Prior VMB decisions removed wellness modalities such as exercise, stretching, and massage from the definition of AR. These modalities do not fall within the practice of AR as currently being examined by the Board.

#### *C. Referral and Consultation*

Before a veterinarian may make a diagnosis or develop a treatment plan, he or she must establish a Veterinarian-Client-Patient Relationship (VCPR) as defined in CCR 2032.1. Veterinarians have two choices when seeking advice from other experts. They may either **refer** to another veterinarian or **consult** with an expert. When they have referred to another veterinarian, the new veterinarian establishes a VCPR with the client and the patient. “Consulting”, on the other hand, does not transfer the care or responsibility for the treatment of the patient to another practitioner.

### **Agenda Item 9B: Enforcement and Discipline**

**A. Shared oversight:** Shared oversight of a licensed professional, in this case, a licensed physical therapist, presents with some administrative challenges. Does the Physical Therapy Board retain disciplinary authority and enforce the provisions related to AR? If so, how will the Physical Therapy Board members determine appropriate standard of care for the practice of veterinary medicine? If the VMB assumes enforcement authority, how will the VMB discipline the license of another health board?

**B. Patient responsibility:** Who is ultimately responsible for patient care if the veterinarian and the AR “therapist” (using “therapist” to refer to a non-veterinarian) do not work at the same practice location?

### **Agenda Item 9C: Complaints Regarding Animal Rehabilitation Practitioners**

In the past three years, the Board has received approximately 10 cases regarding unlicensed animal rehabilitation practitioners. Four complaints were filed by consumers (non-licensees), two from licensees/professional organizations, two from other regulatory boards, and the others are anonymous. While this is not a very large number, the VMB takes the position that, as a consumer protection agency, it must try and prevent harm before it happens, in addition to reacting to harm that has already happened. Testimony before the Board at the public hearing on AR on September 10, 2015 suggested harm has been documented by veterinarians who have treated animals that had been under the care of a rehabilitative therapist.

### **Agenda Item 9D: Supervision**

Direct supervision means the veterinarian “is physically present at the location where the animal health care job tasks are to be performed.” CCR 2034(e).

Indirect supervision means that the veterinarian “is not physically present...but has given either written or oral instructions (“direct orders”) for treatment of the animal patient.” CCR 2034(f).

Supervision is deemed necessary for animal health care tasks that are performed by registered veterinary technicians or veterinary assistants. A veterinary assistant may never have a lesser level of supervision than a licensed RVT. In other words, if an RVT must perform an animal health care task under direct supervision, then a veterinary assistant may not perform that same task under indirect supervision.

The role of the supervising veterinarian is clear in both direct and indirect supervision in that “the animal has been examined by a veterinarian at such time as good veterinary medical practice requires consistent with the particular delegated animal health care job task.” Animal health care jobs may only take place in two locations: an animal hospital setting (CCR 2034(g)) or at any location where the veterinarian may legally practice, which creates room for a range or off-premises setting.

### **Agenda Item 9E: Practice Settings**

#### *A. Registration of place of practice (B&P Code Section 4853):*

- (a) All premises where veterinary medicine, veterinary dentistry, veterinary surgery, and the various branches thereof is being practiced shall be registered with the board. The certificate of registration shall be on a form prescribed in accordance with Section 164.
- (b) “Premises” for the purpose of this chapter shall include a building, kennel, mobile unit, or vehicle. Mobile units and vehicles shall be exempted from independent registration with the board when they are operated from a building or facility which is the licensee manager’s principal place of business and the building is registered with the board, and the registration identifies and declares the use of the mobile unit or vehicle.
- (c) Every application for registration of veterinary premises shall set forth in the application the name of the responsible licensee manager who is to act for and on behalf of the licensed premises. Substitution of the responsible licensee manager may be accomplished by application to the board if the following conditions are met:

- (1) The person substituted qualifies by presenting satisfactory evidence that he or she possesses a valid, unexpired, and unrevoked license as provided by this chapter and that the license is not currently under suspension.
- (2) No circumvention of the law is contemplated by the substitution.

*B. Inspections (B&P Code Section 4809.5):*

The board may at any time inspect the premises in which veterinary medicine, veterinary dentistry, or veterinary surgery is being practiced. The board's inspection authority does not extend to premises that are not registered with the board. Nothing in this section shall be construed to affect the board's ability to investigate alleged unlicensed activity or to inspect a premises for which registration has lapsed or is delinquent.

- F. The parties to any proceeding pursuant to this rule shall be the Board and the petitioner. Any other person may seek leave of the Board to intervene in such a proceeding, and leave to intervene will be granted at the sole discretion of the Board. A petition to intervene shall set forth the same matters as are required by Section D of this Rule. Any reference to a "petitioner" in this rule also refers to any person who has been granted leave to intervene by the Board.
- G. Any declaratory order or other order disposing of a petition pursuant to this rule shall constitute agency action subject to judicial review pursuant to the Colorado Administrative Procedures Act at § 24-4-106, C.R.S.

**210. Requirements for Physical Therapists to Perform Physical Therapy on Animals**

The purpose of this rule is to implement the requirements of § 12-41-103.6(2)(b)(II), C.R.S., regarding the authority of Physical Therapists to treat animals.

- A. A Physical Therapist must have the knowledge, skill, ability and documented competency to perform an act that is within the scope of practice for Physical Therapists.
- B. The Director shall maintain a data base of all Physical Therapists that are qualified pursuant to this rule to practice physical therapy on animals in this state.
- C. All Physical Therapists that choose to practice physical therapy on animals shall provide the Board with such therapist's name, current address, education and qualifications to perform physical therapy on animals for inclusion in the data base referenced in part B of this rule. Information in the data base shall be open to public inspection at all times. Forms for Physical Therapists to provide such information shall be provided by the Board.
- D. A Physical Therapist that desires to perform physical therapy on animals must comply with the following educational requirements:
  - 1. Minimum of 80 contact hours over and above entry-level human physical therapy program course work for non-human animals, to include:
    - a. FOUNDATION/CLINICAL SCIENCES
      - i. Gross and applied non-human animal anatomy/physiology
      - ii. Wound healing and response of tissues to disuse and remobilization in the non-human animal
      - iii. Animal behavior
      - iv. Animal restraint
      - v. Zoonotic and infectious diseases
    - b. EXAMINATION/EVALUATION/PROGNOSIS/PT DIAGNOSIS
      - i. Medical and surgical management of orthopedic, neurological, critically injured, geriatric, arthritic and obese non-human animals
      - ii. Gait and other movement analyses

- c. INTERVENTION/PLAN OF CARE/OUTCOME
    - i. Therapeutic exercise applied to non-human animals
    - ii. Therapeutic modalities
    - iii. Outcome assessment and documentation
  - d. CLINICAL EXPERIENCE
    - i. Documented successful completion of a minimum of 120 hours under the supervision of a licensed physical therapist listed in the data base maintained by DORA to perform physical therapy of animals or a licensed veterinarian.
- E. Prior to performing physical therapy on an animal, the Physical Therapist shall obtain veterinary medical clearance of the animal by a Colorado-licensed Veterinarian and must document such clearance in the animal patient's record.
- F. Veterinary medical clearance means:
- 1. The Veterinarian has previously examined the animal patient and has provided a differential diagnosis if appropriate.
  - 2. The Veterinarian has cleared the animal for physical therapy.
- G. It is expected that the Physical Therapist and the Veterinarian will continue professional collaboration as necessary for the well-being of the animal patient.
- H. Once veterinary medical clearance has been received, the Physical Therapist is responsible for developing the plan of care for the animal patient's physical therapy.
- I. The animal patient's record must include the verbal or written veterinary medical clearance. If verbal clearance is received, the Physical Therapist must document the verbal clearance in the animal patient's record, including the name of the veterinarian, date and time clearance was received.
- J. Complaints against Physical Therapists alleging a violation related to animal physical therapy will be forwarded to the Colorado State Board of Veterinary Medicine for its review and advisory recommendation to the State Physical Therapy Board. The State Physical Therapy Board retains the final authority by statute for decisions related to discipline of any physical therapist.
- 211. Requirements for Physical Therapists to Perform Dry Needling**
- A. Dry needling (also known as Trigger Point Dry Needling) is a physical intervention that uses a filiform needle to stimulate trigger points, diagnose and treat neuromuscular pain and functional movement deficits; is based upon Western medical concepts; requires an examination and diagnosis, and treats specific anatomic entities selected according to physical signs. Dry needling does not include the stimulation of auricular or distal points.
- B. Dry needling as defined pursuant to this rule is within the scope of practice of physical therapy.
