8. Extreme departures from minimum sanitary conditions such that there is a threat to an animal patient or the public and animal health and safety, only if the case has already been subject to Section 494 and board action.

(b) The board may prioritize cases involving an allegation of conduct that is not described in subdivision (a). Those cases prioritized shall not be assigned a priority equal to or higher than the priorities established in subdivision (a).

(c) The board shall annually report and make publicly available the number of disciplinary actions that are taken in each priority category specified in subdivisions (a) and (b).

§ 4875.2. Citation; Procedure for issuance; Order of abatement and penalty

If, upon completion of an investigation, the executive officer has probable cause to believe that a veterinarian, a registered veterinary technician, or an unlicensed person acting as a veterinarian or a registered veterinary technician has violated provisions of this chapter, he or she may issue a citation to the veterinarian, registered veterinary technician, or unlicensed person, as provided in this section. Each citation shall be in writing and shall describe with particularity the nature of the violation, including a reference to the provision of this chapter alleged to have been violated. In addition, each citation may contain an order of abatement fixing a reasonable time for abatement of the violation, and may contain an assessment of a civil penalty. The citation shall be served upon the veterinarian, registered veterinary technician, or unlicensed individual personally or by any type of mailing requiring a return receipt. Before any citation may be issued, the executive officer shall submit the alleged violation for review and investigation to at least one designee of the board who is a veterinarian licensed in or employed by the state. The review shall include attempts to contact the veterinarian, registered veterinary technician, or unlicensed person to discuss and resolve the alleged violation. Upon conclusion of the board designee's review, the designee shall prepare a finding of fact and a recommendation. If the board designee concludes that probable cause exists that the veterinarian, registered veterinary technician, or unlicensed person has violated any provisions of this chapter, a civil citation shall be issued to the veterinarian, registered veterinary technician, or unlicensed person.

§ 4875.3. Inspection of premises; Notice of deficiencies; Interim suspension order; Licensed investigators

(a) If the board determines, as a result of its inspection of the premises pursuant to Section 4809.5, or any other place where veterinary medicine, veterinary dentistry,
veterinary surgery, or the various branches thereof is practiced, or that is otherwise in
the possession of a veterinarian for purpose of that practice, that it is not in compliance
with the standards established by the board, the board shall provide a notice of any
deficiencies and provide a reasonable time for compliance with those standards prior to
commencing any further action pursuant to this article. The board may issue an interim
suspension order pursuant to Section 494 in those cases where the violations represent
an immediate threat to the public and animal health and safety.

(b) A veterinarian who reviews and investigates an alleged violation pursuant to
Section 4875.2 shall be licensed in or employed by the state either full time or part time
and shall not have been out of practice for more than four years.

minor.

(3) The history of previous violations.

(b) In no event shall the civil penalty for each citation issued be assessed in an amount

Added Stats 1986 ch 240 § 2. Amended Stats 2004 ch 467 § 10 (SB 1548); Stats 2008 ch 529 § 15 (SB 1584), effective
January 1, 2009.

§ 4875.6. Procedure for contesting citation or penalty; Deposit of penalties
(a) If a veterinarian, a registered veterinary technician, or an unlicensed person
desires to administratively contest a civil citation or the proposed assessment of a civil
penalty therefor, he or she shall, within 10 business days after receipt of the citation,
notify the executive officer in writing of his or her request for an informal conference
with the executive officer or his or her designee. The executive officer or his or her
designee shall hold, within 60 days from the receipt of the request, an informal
conference. At the conclusion of the informal conference, the executive officer may
affirm, modify, or dismiss the citation or proposed assessment of a civil penalty, and he
or she shall state with particularity in writing his or her reasons for the action, and shall
immediately transmit a copy thereof to the board, the veterinarian, registered veterinary
technician, or unlicensed person, and the person who submitted the verified complaint.

If the veterinarian, registered veterinary technician, or unlicensed person desires to
administratively contest under subdivision (c) a decision made after the informal
conference, he or she shall inform the executive officer in writing within 30 calendar
days after he or she receives the decision resulting from the informal conference.

If the veterinarian, registered veterinary technician, or unlicensed person fails to notify
the executive officer in writing that he or she intends to contest the citation or the
proposed assessment of a civil penalty therefor or the decision made after an informal
conference within the time specified in this subdivision, the citation or the proposed
assessment of a civil penalty or the decision made after an informal conference shall be
deemed a final order of the board and shall not be subject to further administrative
review.

Notwithstanding any other provision of law, where a fine is paid to satisfy an
assessment based on the finding of a violation, payment of the fine shall be represented
as satisfactory resolution of the matter for purposes of public disclosure.

(b) A veterinarian, a registered veterinary technician, or an unlicensed person may, in
lieu of contesting a citation pursuant to this section, transmit to the board the amount
assessed in the citation as a civil penalty, within 10 business days after receipt of the
citation. An unlicensed person may notify the board and file a petition for a writ of
administrative mandamus under Section 1094.5 of the Code of Civil Procedure within 30
calendar days after receipt of the citation, without engaging in an informal conference or administrative hearing. If a petition is not filed pursuant to this section, payment of any fine shall not constitute an admission of the violation charged.

(c) If a veterinarian, a registered veterinary technician, or an unlicensed person has notified the executive officer that he or she intends to administratively contest the decision made after the informal conference, the executive officer shall forward the matter to the Attorney General's office who shall prepare a notice of appeal of the citation and civil penalty. After the hearing, the board and administrative law judge shall issue a decision, based on findings of fact, affirming, modifying, or vacating the citation, or directing other appropriate relief that shall include, but need not be limited to, a notice that the failure of a veterinarian, registered veterinary technician, or unlicensed person to comply with any provision of the board's decision constitutes grounds for suspension or denial of licensure, or both, or suspension or denial of registration, or both. The administrative proceedings under this section shall be conducted in accordance with the Administrative Procedure Act (Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code), and the board shall have all the powers granted therein.

(d) After the exhaustion of the review procedures provided for in this section or if the time for all appeals has passed, the board may bring an action in the appropriate court in the county in which the offense occurred to recover the civil penalty and obtain an order compelling the cited person to comply with the order of abatement. In that action, the complaint shall include a certified copy of the final order of the board, together with the factual findings and determinations of the board and administrative law judge. The findings shall be prima facie evidence of the facts stated therein, and in the absence of contrary evidence may serve as the basis for the issuance of the judgment and order.

(e) Failure of a licensee or registrant to pay a civil penalty within 30 days of the date of receipt of the assessment, unless the citation is being appealed, may result in disciplinary action being taken by the board. When a citation is not contested and a civil penalty is not paid, the full amount of the assessed civil penalty shall be added to the fee for renewal of the license or registration. A license or registration shall not be renewed without payment of the renewal fee and civil penalty.

(f) Any civil penalties received under this chapter shall be deposited in the Veterinary Medical Board Contingent Fund.

§ 4876. Probation

In addition to its authority to suspend or revoke a license or registration, or assess a fine on a person licensed or registered under this chapter, the board shall have the authority to place a licensee or registrant on probation. The authority of the board to discipline by placing the licensee or registrant on probation shall include, but is not limited to, the following:

(a) Requiring the licensee or registrant to complete a course of study or service, or both, as prescribed by the board, and to demonstrate renewed competence to the satisfaction of the board.

(b) Requiring the licensee or registrant to submit to a complete diagnostic examination by one or more physicians appointed by the board. If the board requires a licensee or registrant to submit to that examination, the board shall receive and consider any other report of a complete diagnostic examination given by one or more physicians of the licensee's or registrant's choice.

(c) Restricting or limiting the extent, scope, or type of practice of the licensee or registrant.

§ 4881. Records

The executive officer in all cases of suspension, revocation, or restriction of licenses or assessment of fines shall enter on the register the fact of suspension, revocation, restriction, or fine, as the case may be. The record of any suspension, revocation,
§ 4883  BUSINESS AND PROFESSIONS CODE

restriction, or fine so made by the county clerks shall be prima facie evidence of the fact thereof, and of the regularity of all the proceedings of the board in the matter of the suspension, revocation, restriction, or fine.

§ 4883. Denial, revocation, or suspension of license or registration; Grounds

The board may deny, revoke, or suspend a license or registration or assess a fine as provided in Section 4875 for any of the following:

(a) Conviction of a crime substantially related to the qualifications, functions, or duties of veterinary medicine, surgery, or dentistry, in which case the record of the conviction shall be conclusive evidence.

(b) For having professional connection with, or lending the licensee's or registrant's name to, any illegal practitioner of veterinary medicine and the various branches thereof.

(c) Violation or attempting to violate, directly or indirectly, any of the provisions of this chapter.

(d) Fraud or dishonesty in applying, treating, or reporting on tuberculin or other biological tests.

(e) Employment of anyone but a veterinarian licensed in the state to demonstrate the use of biologics in the treatment of animals.

(f) False or misleading advertising.

(g) Unprofessional conduct, that includes, but is not limited to, the following:

(1) Conviction of a charge of violating any federal statutes or rules or any statute or rule of this state regulating dangerous drugs or controlled substances. The record of the conviction is conclusive evidence thereof. A plea or verdict of guilty or a conviction following a plea of nolo contendere is deemed to be a conviction within the meaning of this section. (C) The conviction of more than one misdemeanor or any felony involving the use, consumption, or self-administration of any of the substances referred to in this section or any combination thereof, and the record of the conviction is conclusive evidence.

§ 4885. What deemed conviction

A plea or verdict of guilty or a conviction following a plea of nolo contendere made to a charge of a felony or of any offense related to the practice of veterinary medicine or the practice of a veterinary technician is deemed to be a conviction within the meaning of this article. The board may order the license or registration to be suspended or revoked, or assess a fine as provided in Section 4883 or may decline to issue a license or registration, when the time for appeal has elapsed, or the judgment of conviction has been affirmed on appeal or when an order granting probation is made suspending the imposition of sentence, irrespective of a subsequent order under the provisions of Section 1203.4, 1210.1, or 3063.1 of the Penal Code allowing that person to withdraw his or her plea of guilty and to enter a plea of not guilty, or setting aside the verdict of guilty, or dismissing the accusation, information, or indictment.

§ 4886. Terms and conditions upon reinstatement

In reinstating a license or registration that has been revoked or suspended under Section 4883, the board may impose terms and conditions to be followed by the licensee or registrant after the license or registration has been reinstated. The authority of the board to impose terms and conditions includes, but is not limited to, the following:

(d) Restricting or limiting the extent, scope, or type of practice of the licensee or registrant.

§ 4887. Petition for reinstatement or modification of penalty; Hearing

The petition shall state such facts as may be required by the board.

(b) The petition shall be accompanied by at least two verified recommendations from veterinarians licensed by the board who have personal knowledge of the activities of the
petitioner since the disciplinary penalty was imposed. The petition shall be heard by the board. The board may consider all activities of the petitioner since the disciplinary action was taken, the offense for which the petitioner was disciplined, the petitioner’s activities since the license or registration was in good standing, and the petitioner’s rehabilitation efforts, general reputation for truth, and professional ability. The hearing may be continued from time to time as the board finds necessary.

(c) The board reinstating the license or registration or modifying a penalty may impose terms and conditions as it determines necessary. To reinstate a revoked license or registration or to otherwise reduce a penalty or modify probation shall require a vote of five of the members of the board.

(d) The petition shall not be considered while the petitioner is under sentence for any criminal offense, including any period during which the petitioner is on court-imposed probation or parole. § 4900. Expiration of license or registration; Renewal

(a) All veterinary licenses and veterinary technician registrations shall expire at 12 midnight of the last day of the birth month of the licensee or registrant during the second year of a two-year term if not renewed.

(b) The board shall establish by regulation procedures for the administration of a birth date renewal program, including, but not limited to, the establishment of a system of staggered license and registration expiration dates and a pro rata formula for the payment of renewal fees by veterinarians and registered veterinary technicians affected by the implementation of the program.

(c) To renew an unexpired license or registration, the licensee or registrant shall, on or before the date of expiration of the license or registration, apply for renewal on a form provided by the board, accompanied by the prescribed renewal fee.

(d) Renewal under this section shall be effective on the date on which the application is filed, on the date on which the renewal fee is paid, or on the date on which the delinquency fee, if any, is paid, whichever occurs last. If so renewed, the license or registration shall continue in effect through the expiration date provided in this section which next occurs after the effective date of the renewal, when it shall expire, if it is not again renewed.

§ 4901. Renewal of expired license or registration

Except as otherwise provided in this chapter, an expired license or registration may be renewed at any time within five years after its expiration on filing of an application for renewal on a form prescribed by the board, and payment of all accrued and unpaid renewal fees. If the license or registration is renewed more than 30 days after its expiration, the licensee or registrant, as a condition precedent to renewal, shall also pay the delinquency fee prescribed by this chapter. Renewal under this section shall be effective on the date on which the application is filed, on the date on which all renewal
fees are paid, or on the date on which the delinquency fee, if any, is paid, whichever last occurs. If so renewed, the license or registration shall continue in effect through the expiration date provided in Section 4900 that next occurs after the effective date of the renewal, when it shall expire if it is not again renewed.

§ 4901. Renewal of suspended license or registration
A license or registration that is suspended is subject to expiration, and shall be renewed as provided in this chapter, but that renewal does not entitle the licensee or registrant, while the license or registration remains suspended and until it is reinstated, to engage in the licensed or registered activity, or in any other activity in violation of the order or judgment by which the license or registration was suspended.

§ 4901.2. Reinstatement of revoked license or registration
A revoked license or registration is subject to expiration as provided in this article, but it may not be renewed. If it is reinstated after its expiration, the licensee or registrant, as a condition precedent to reinstatement, shall pay a reinstatement fee in an amount equal to the renewal fee in effect on the last regular renewal date before the date on which it is reinstated plus the delinquency fee, if any, accrued at the time of its revocation.

§ 4902. Effect of failure to renew within five years
A person who fails to renew his license within five years after its expiration may not renew it, and it shall not be restored, reissued, or reinstated thereafter, but such person may apply for and obtain a new license if:
(a) He is not subject to denial of licensure under Section 480.
(b) He takes and passes the examination, if any, which would be required of him if he were then applying for a license for the first time, or otherwise establishes to the satisfaction of the board that, with due regard for the public interest, he is qualified to practice veterinary medicine, and
(c) He pays all of the fees that would be required of him if he were then applying for the license for the first time.

The board may, by regulation, provide for the waiver or refund of all or any part of the examination fee in those cases in which a license is issued without an examination pursuant to the provisions of this section.

The other 50 percent shall be paid as provided by law, for the payment of fines or forfeitures of bail in misdemeanor cases.

(2) The license does not limit the authorized activity to specified installations or locations;

(3) The person provides written notice to the Department at least three days prior to engaging in such activity. Such notice shall indicate the location, specific time period, and type of proposed possession and use within this state, and shall be accompanied by a copy of the pertinent license. If, for a specific case, the 3-day period would impose an undue hardship on the person, the person may make application to the Department to proceed sooner;

(1) The person files a report with the Department within 30 days after the end of each calendar quarter in which any device is transferred to or installed in this State, identifying each device recipient by name and address, identifying the type of device transferred or installed, and identifying the quantity and type of radioactive material contained in each device;

(2) The device has been manufactured and labeled and is installed and serviced in accordance with applicable provisions of the specific license;

Group 3. Standards for Protection Against Radiation

Article 2. Notices, Instructions, and Reports to Workers; Inspections and Investigations

§ 30254. Inspection.

(a) Each user shall afford to the Department or other official agency specifically designated by the Department, at all reasonable times, opportunity to inspect materials, machines, activities, facilities, premises, and records pursuant to these regulations.

(b) During an inspection, inspectors may consult privately with workers as specified below. The user may accompany inspectors during other phases of an inspection.

(1) Inspectors may consult privately with workers concerning matters of occupational radiation protection and other matters related to applicable provisions of Department regulations and licenses to the extent the inspectors deem necessary for the conduct of an effective and thorough inspection.

(2) During the course of an inspection any worker may bring privately to the attention of the inspectors, either orally or in writing, any past or present condition which he has reason to believe may have contributed to or caused any violation of the Radiation Control Law, these regulations, or license condition, or any unnecessary exposure of an individual to radiation from licensed radioactive material or a registered radiation machine under the user’s control. Any such notice in writing shall comply with the requirements of subsection (h) hereof.

(3) The provision of paragraph (b)(2) of this section shall not be interpreted as authorization to disregard instructions pursuant to Section 30255(b)(1).

(c) If, at the time of inspection, an individual has been authorized by the workers to represent them during inspections, the user shall notify the inspectors of such authorization and shall give the workers’ representative an opportunity to accompany the inspectors during the inspection of physical working conditions.

(d) Each worker’s representative shall be routinely engaged in work under control of the user and shall have received instructions as specified in Section 30255(b)(1).

(e) Different representatives of users and workers may accompany the inspectors during different phases of an inspection if there is no resulting interference with the conduct of the inspection. However, only one workers’ representative at a time may accompany the inspectors.

(f) With the approval of the user and the workers’ representative, an individual who is not routinely engaged in work under control of the user, for example, a consultant to the user or to the workers’ representative, shall be afforded the opportunity to accompany
inspectors during the inspection of physical working conditions.

(g) Notwithstanding the other provisions of this section, inspectors are authorized to refuse to permit accompaniment by an individual who deliberately interferes with a fair and orderly inspection. With regard to any area containing proprietary information, the workers’ representative for that area shall be an individual previously authorized by the user to enter that area.

(h) Any worker or representative of workers who believes that a violation of the Radiation Control Law, these regulations or license conditions exists, or has occurred in work under a license or registration with regard to radiological working conditions in which the worker is engaged, may request an inspection by giving notice of the alleged violation to the Department or other official agency specifically designated by the Department. Any such notice shall be in writing, shall set forth the specific grounds for the notice, and shall be signed by the worker or representative of the workers. A copy shall be provided to the user by the Department no later than at the time of inspection except that, upon the request of the worker giving such notice, his name and the name of individuals referred to therein shall not appear in such copy or on any record published, released, or made available by the Department except for good cause shown.

(i) If, upon receipt of such notice, the Chief, Radiologic Health Branch, of the Department, determines that the complaint meets the requirements set forth in subsection (h) hereof, and that there are reasonable grounds to believe that the alleged violation exists or has occurred, he shall cause an inspection to be made as soon as practicable, to determine if such alleged violation exists or has occurred. Inspections pursuant to this section need not be limited to matters referred to in the complaint.

(j) No user shall discharge or in any manner discriminate against any worker because such worker has filed any complaint or instituted or caused to be instituted any proceeding under these regulations or has testified or is about to testify in any such proceeding or because of the exercise by such worker on behalf of himself or others of any option afforded by this section.

(k) If the Chief, Radiologic Health Branch, of the Department, determines with respect to a complaint under subsection (h) hereof that an inspection is not warranted because there are no reasonable grounds to believe that a violation exists or has occurred, the complaint shall be notified in writing of such determination. The complaintant may obtain review of such determination by submitting a written statement of position to the Director of the Department, who will provide the user with a copy of such statement by certified mail, excluding, at the request of the complainant, the name of the complainant. The user may submit an opposing written statement of position with the Director of the Department who will provide the complainant with a copy of such statement by certified mail. An informal conference may also be held at the request of the user, but disclosure of the identity of the complainant will be made only following receipt of written authorization from the complainant. After considering all written or oral views presented, the Director of the Department shall confirm, modify, or reverse the determination of the Chief, Radiologic Health Branch, of the Department, and furnish the complainant and the user a written notification of his decision and the reason therefor.

(l) If the Department determines that an inspection is not warranted because the requirements of subsection (h) hereof have not been met, it shall notify the complainant in writing of such determination. Such determination shall be without prejudice to the filing of a new complaint meeting the requirements of subsection (h) hereof.
§ 30255. Notices, Instructions, and Reports to Personnel.

(a) This section establishes requirements for notices, instructions, and reports by users to individuals engaged in work under a license or registration; and options available to such individuals in connection with Department inspections of licensees or registrants to ascertain compliance with the provisions of the Radiation Control Law and regulations, orders, and licenses issued thereunder regarding radiological working conditions. The requirements in this section apply to all persons who receive, possess, use, own or transfer material licensed by or registered with the Department.

(b) Each user shall:

(1) Inform all individuals working in or frequenting any portion of a controlled area of the storage, transfer, or use of radioactive materials or of radiation in such portions of the controlled area; instruct such individuals in the health protection problems associated with exposure to such radioactive materials or radiation, in precautions or procedures to minimize exposure, and in the purposes and functions of protective devices employed; instruct such individuals in, and instruct them to observe, to the extent within their control, the applicable provisions of Department regulations and license conditions for the protection of personnel from exposures to radiation or radioactive materials occurring in such areas; instruct such individuals of their responsibility to report promptly to the licensee or registrant any condition which may lead to or cause a violation of department regulations or license conditions or unnecessary exposure to radiation or radioactive material, and of the inspection provisions of Section 30254; instruct such individuals in the appropriate response to warnings made in the event of any unusual occurrence or malfunction that may involve exposure to radiation or radioactive materials; and advise such individuals as to the radiation exposure reports which they may request pursuant to this section. The extent of these instructions shall be commensurate with potential radiological health protection problems in the controlled area.

(2) Conspicuously post a current copy of this regulation, a copy of applicable licenses for radioactive material, and a copy of operating and emergency procedures applicable to work with sources of radiation. If posting of documents specified in this paragraph is not practicable the user may post a notice which describes the document and states where it may be examined.

(3) Conspicuously post a current copy of Department Form RH-2364 (Notice to Employees) in a sufficient number of places to permit individuals working in or frequenting any portion of a controlled area to observe a copy on the way to or from such area.

(4) Conspicuously post any notice of violation involving radiological working conditions or any order issued pursuant to the Radiation Control Law and any required response from the user. Department documents posted pursuant to this paragraph shall be posted within two working days after receipt of the documents from the Department; the user's response, if any, shall be posted within two working days after dispatch by the user. Such documents shall remain posted for a minimum of five working days or until action correcting the violation has been completed, whichever is later.

(5) Assure that documents, notices, or forms posted pursuant to this section shall appear in a sufficient number of places to permit individuals engaged in work under the license or registration to observe them on the way to or from any particular work location to which the document applies, shall be conspicuous, and shall be replaced if defaced or altered.

(6) Provide reports to any individual of their radiation exposure data and the results of any measurements, analyses, and calculations of radioactive material deposited...
or retained in the body of that individual as specified in this section. The information reported shall include data and results obtained pursuant to Department regulations, orders, or license conditions, as shown in records maintained by the user pursuant to Department regulations. Each notification and report shall: be in writing; include appropriate identifying data such as the name of the user, the name of the individual, the individual’s Social Security number; include the individual’s exposure information; and contain the following statement:

“This report is furnished to you under the provisions of the California State Department of Public Health Regulations: Standards for Protection Against Radiation. You should preserve this report for future reference.”

These reports shall be provided as follows:

(A) Each user shall advise each worker annually of the worker’s dose as shown in records maintained by the user pursuant to title 10, Code of Federal Regulations, part 20, (10 CFR 20), section 20.2106 as incorporated by reference in section 30253. The user shall provide an annual report to each monitored individual pursuant to section 20.1502, incorporated by reference in section 30253, of the dose received in that monitoring year if:

1. The individual’s occupational dose exceeds 100 mrem total effective dose equivalent or 100 mrem to any individual organ or tissue; or

2. The individual requests his or her annual dose report.

(B) At the request of a worker formerly engaged in work controlled by the user, the user shall furnish to the worker a report of the worker’s exposure to radiation or radioactive material as shown in records maintained by the user pursuant to 10 CFR 20, section 20.2106 that has been incorporated by reference in section 30253, for each year the worker was required to be monitored pursuant to section 20.1502 and for each year the worker was required to be monitored under the monitoring requirements in effect prior to March 3, 1994. Such report shall be furnished within 30 days from the time the request is made, or within 30 days after the exposure of the individual has been determined by the user, whichever is later. This report shall cover the period of time that the worker’s activities involved exposure to radiation from radioactive material licensed by, or radiation machines registered with, the Department and shall include the dates and locations of work under the license or registration in which the worker participated during this period.

(C) When a user is required pursuant to 10 CFR 20, sections 20.2202, 20.2203, or 20.2204, as incorporated by reference in section 30253, to report to the Department any exposure of an individual to radiation or radioactive material, the user shall also provide the individual a report on his exposure data included therein. Such reports shall be transmitted at a time not later than the transmittal to the Department.

(D) At the request of a worker who is terminating employment with the user that involved exposure to radiation or radioactive materials, during the current calendar quarter or the current year, each user shall provide at termination to each worker, or to the worker’s designee, a written report regarding the radiation dose received by that worker from operations of the user during the current year or fraction thereof. If the most recent individual monitoring results are not available at that time, a written estimate of the dose must be provided together with a clear indication that this is an estimate.

§ 30306. Definitions.

(a) “Automatic exposure control” means a device which automatically controls one or more technique factors in order to obtain at a preselected location(s) a required quantity of radiation.

(b) “Cineradiography” means the making of a motion picture record of the successive images appearing on a fluorescent screen.

(c) “Contact therapy” means irradiation of accessible lesions usually employing a very short source-skin distance and potentials of 40-50 kV.

(d) “Dead-man switch” means a switch so constructed that a circuit-closing contact can only be maintained by continuous pressure by the operator.

(e) “Diagnostic-type tube housing” means an X-ray tube housing so constructed that the leakage radiation measured at a distance of 1 meter from the source cannot exceed 100 milliroentgens in 1 hour when the tube is operated at its maximum continuous rate of current for the maximum rated tube potential.

(f) “Filter” means material placed in the useful beam to absorb preferentially the less penetrating radiations.

(g) “Interlock” means a device for precluding access to an area of radiation hazard either by preventing entry or by automatically removing the hazard.

(h) “Leakage radiation” means all radiation coming from within the tube housing except the useful beam.

(i) “Protective barrier” means a barrier of attenuating materials used to reduce radiation exposure.

(j) “Primary protective barrier” means a barrier sufficient to attenuate the useful beam to the required degree.

(k) “Scattered radiation” means radiation that, during passage through matter, has been deviated in direction.

(l) “Secondary protective barrier” means a barrier sufficient to attenuate stray radiation to the required degree.

(m) “Shutter” means a device, generally of lead, fixed to an X-ray tube housing to intercept the useful beam.

(n) “Stray radiation” means radiation not serving any useful purpose. It includes leakage and scattered radiation.

(o) “Therapeutic-type tube housing” means,

1. For X-ray therapy equipment not capable of operating at 500 kVp or above, an X-ray tube housing so constructed that the leakage radiation at a distance of 1 meter from the source does not exceed 1 roentgen in an hour when the tube is operated at its maximum rated continuous current for the maximum rated tube potential.

2. For X-ray therapy equipment capable of operating at 500 kVp or above, an X-ray tube housing so constructed that the leakage radiation at a distance of 1 meter from the source does not exceed either 1 roentgen in an hour or 0.1 percent of the useful beam dose rate at 1 meter from the source, whichever is greater, when the machine is operated at its maximum rated continuous current for the maximum rated accelerating potential.

3. In either case, small areas of reduced protection are acceptable provided the average reading over any 100 square centimeters area at 1 meter distance from the source does not exceed the values given above.

(p) “Useful beam” means that part of the radiation which passes through the window, aperture, cone, or other collimating device of the tube housing. (T17-30306-T24).
§ 30307. Fluoroscopic Installations

(a) Equipment.

(1) The tube housing shall be of diagnostic type.

(2) The target-to-panel or target-to-table top distance shall not be less than 18 inches and shall not be less than 12 inches.

(3) The total filtration permanently in the useful beam shall not be less than 2.5 millimeters aluminum equivalent. This requirement may be assumed to have been met if the half-value layer is not less than 2.5 millimeters aluminum at normal operating voltages.

(4) The equipment shall be so constructed that the entire cross-section of the useful beam is attenuated by a primary barrier. This barrier is usually the viewing device, either a conventional fluoroscopic screen or an image intensification mechanism.

(A) The lead equivalent of the barrier of conventional fluoroscopes shall be at least 1.5 millimeters for equipment capable of operating up to 100 kVp, at least 1.8 millimeters for equipment whose maximum operating potential is greater than 100 kVp and less than 125 kVp, and at least 2.0 millimeters for equipment whose maximum operating potential is 125 kVp or greater. Special attention must be paid to the shielding of image intensifiers so that neither the useful beam nor scattered radiation from the intensifier can produce a radiation hazard to the operator or personnel. With the fluorescent screen 14 inches (35 cm) from the panel or table top, the exposure rate 2 inches (5 cm) beyond the viewing surface of the screen shall not exceed 30 mR/hr for each R per minute at the table top with the screen in the useful beam without a patient and with the fluoroscope operating at the highest potential employed.

(B) Collimators shall be provided to restrict the size of the useful beam to less than the area of the barrier. For conventional fluoroscopes this requirement is met if, when the adjustable diaphragm is opened to its fullest extent, an unilluminated margin is left at all edges of the fluorescent screen with the screen centered in the beam at a distance of 35 cm (14 inches) from the panel or table top.

For image intensified fluoroscopy, shutters shall be provided which can be adjusted to restrict the X-ray field to the visible portion of the image receptor during fluoroscopy. For systems employing rectangular X-ray fields and circular image receptors, this requirement is met if the collimated beam forms a square which circumscribes, and is tangent to, the circular margin of the image receptor.

(C) The tube mounting and the carrier shall be so linked together that the carrier always intercepts the entire useful beam. The X-ray exposure shall automatically terminate when the carrier is removed from the useful beam.

(D) Collimators and adjustable diaphragms or shutters to restrict the size of the useful beam shall provide the same degree of protection as is required of the tube housing.

(5) The exposure switch shall be of the dead-man type.

(6) Each fluoroscopic unit shall be equipped with a manual-reset cumulative timing device, activated by the exposure switch, which will either indicate elapsed exposure time by a signal audible to the fluorocopist or turn off the apparatus when the total exposure exceeds a predetermined limit not exceeding five minutes in one or a series of exposures.

(7) Useful beam exposure rate.

(A) All fluoroscopic equipment. For routine fluoroscopy, the exposure rate measured at the point where the center of the useful beam enters a typical patient shall be as low as is practicable and shall not exceed 5 roentgens per minute under the conditions specified herein. This limit shall not apply during magnification procedures or the recording of fluoroscopic images where higher exposure rates are required. Compliance with this paragraph shall be determined using the measuring specifications of Section 30307(a)(7)(D), plus the following procedures when the automatic exposure rate control is used:

1. The useful beam exposure rate shall be measured with a phantom equivalent to 9 inches of water or 7 7/8 inches of lucite, intercepting the entire useful beam.

2. If the X-ray source is below the table, the X-ray exposure rate shall be measured with the nearest part of the imaging assembly located at 14 inches above the table top.
3. The field size at the point of exposure rate measurement shall be at least 6¼ square inches in area in the plane perpendicular to the central ray.

(B) Fluoroscopic equipment manufactured after August 1, 1974, and equipped with automatic exposure rate controls. Fluoroscopic equipment which is provided with automatic exposure rate control shall not be operable at any combination of tube potential and current which will result in an exposure rate in excess of 10 roentgens per minute at the point where the center of the useful beam enters the patient, except during recording of fluoroscopic images, or when an optional high level control is provided. When so provided, the equipment shall not be operable at any combination of tube potential and current which will result in an exposure rate in excess of 5 roentgens per minute at the point where the center of the useful beam enters the patient unless the high level control is activated. Special means of activation of high level controls shall be required. The high level control shall only be operable when continuous manual activation is provided by the operator. A continuous signal audible to the fluoroscopist shall indicate that the high level control is being employed.

(C) Fluoroscopic equipment manufactured after August 1, 1974, without automatic exposure rate controls. Fluoroscopic equipment which is not provided with automatic exposure rate control shall not be operable at any combination of tube potential and current which will result in an exposure rate in excess of 5 roentgens per minute at the point where the center of the useful beam enters the patient, except during recording of fluoroscopic images, or when an optional high level control is activated. Special means of activation of high level controls shall be required. The high level control shall only be operable when continuous manual activation is provided by the operator. A continuous signal audible to the fluoroscopist shall indicate that the high level control is being employed.

(D) Measuring useful beam exposure rate compliance.
1. If the X-ray tube is below the table, the exposure rate shall be measured 1 centimeter above the tabletop or cradle.
2. If the X-ray tube is above the table, the exposure rate shall be measured at 30 centimeters above the tabletop with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement.
3. In a C-arm type of fluoroscope, the exposure rate shall be measured at 30 centimeters from the input surface of the fluoroscopic imaging assembly.

(8) Mobile fluoroscopic equipment shall meet the requirements of this section where applicable, except that:
(A) Inherent provisions shall be made so that the machine is not operated at a source-skin distance of less than 30 cm (12 inches).
(B) Image intensification shall always be provided. Conventional fluoroscopic screens shall not be used.
(C) It shall be impossible to operate a machine when the collimating cone or diaphragm is not in place.
(D) It shall be impossible to energize the useful beam of a mobile fluoroscope unless the entire useful beam is intercepted by the image receptor.

(9) Devices which indicate the X-ray tube potential and current shall be provided, and should be located in such a manner that the operator may monitor the tube potential and current during fluoroscopy.

(10) A shielding device of at least 0.25 millimeters lead equivalent shall be provided for covering the bucky-slot during fluoroscopy.

(11) Whenever practicable, protective drapes, or hinged or sliding panels, of at least 0.25 millimeters lead equivalent shall be provided between the patient and the fluoroscopist to intercept scattered radiation which would otherwise reach the fluoroscopist and others near the machine. Such devices shall not substitute for wearing of a protective apron.

(b) Operating Procedures.
1. Protective aprons of at least 0.25 mm lead equivalent shall be worn in the fluoroscopy room by each person, except the patient, whose body is likely to be exposed to 5 mR/hr or more.
(2) On fluoroscopes with automatic exposure controls the operator shall monitor the tube current and potential at least once each week to ascertain that they are in their usual ranges for a given set of operating parameters. This requirement may be met by adjusting the controls to usual settings for fluoroscopying an average patient, and using a phantom of any suitable material with attenuation roughly equivalent to six to ten inches of water. Whenever the monitored tube current or potential vary in a way which could increase the patient X-ray exposure rate by more than 25% over the latest exposure rate measurement required by Section 30307(b)(3), the cause(s) for the change shall be determined promptly and the patient exposure rate shall be remeasured. On fluoroscopes with manual exposure control only, the operator shall monitor the tube current and potential at least once each day during use to ascertain that they are within the normal ranges used by the facility. A written log shall be kept of all monitored readings and shall include at least the tube current and potential, the date, identification of the fluoroscope, and name of the person who did the monitoring. Records of all monitored readings shall be preserved at the facility for at least three years.

(3) Measurements of the table top or patient exposure rate shall be made at least once each year for units with automatic exposure control, and at least once each 3 years for units without automatic exposure control, and immediately following alteration or replacement of a major component, such as the X-ray tube, the exposure controls, the imaging assembly, and the power source.

(4) On cineradiography equipment, the exposure rates to which patients are normally subjected shall be determined at least once each year, and immediately following alterations or replacement of a major component, such as the X-ray tube, the exposure controls, the imaging assembly, and the power source.

§ 30312. Therapeutic X-Ray Installations.

(a) Equipment.

(1) The tube housing shall be of therapeutic type.

(2) For equipment installed on or before August 1, 1979, permanent diaphragms or cones used for collimating the useful beam shall afford the same degree of protection as the housing. Adjustable or removable beam-defining diaphragms or cones shall transmit not more than 5 percent of the useful beam obtained at the maximum kilovoltage and with maximum treatment filter.

(3) For equipment installed after August 1, 1979, permanent beam-defining devices or diaphragms shall afford the same degree of protection as the housing. Adjustable or interchangeable beam-defining devices shall transmit no more than 2 percent of the useful beam for the portion of the useful beam which is to be attenuated by the beam limiting device. Measurements shall be averaged over an area up to but not exceeding 100 square centimeters at the normal treatment distance.

(4) Filters shall be secured in place to prevent them from dropping out during treatment. A filter indication system shall be used on all therapy machines using interchangeable filters. It shall indicate, from the control panel, or from the control station, the presence or absence of any filter except compensating filters, and it shall be designed to permit easy identification of the filter in place. The filter slot shall be so constructed that the radiation escaping through it does not exceed 1 roentgen per hour at 1 meter, or, if the patient is likely to be exposed to radiation escaping from the slot, 30 roentgens per hour at 5 centimeters from the external opening. Each interchangeable filter shall be marked with its thickness and material.

(5) The X-ray tube shall be so mounted that it cannot turn or slide with respect to the aperture.

(6) Means shall be provided to immobilize the tube housing during stationary portal treatment.

(7) A suitable exposure control device such as an automatic timer, exposure meter, or dose meter shall be provided to terminate the exposure after a preset time interval or preset exposure or dose limit. A timer shall be provided to terminate the exposure after a preset time regardless of what other exposure limiting devices are present. Means shall be provided for the operator to terminate the exposure at any time.

(8) Equipment utilizing shutters to control the useful beam shall have a shutter position indicator on the control.

(9) An easily discernible indicator which shows whether or not X-rays are being produced shall be on the control panel.

(10) Mechanical and/or electrical stops shall be provided on X-ray machines capable of operating at 150 kVp or above to insure that the useful beam is oriented only toward
primary barriers.

(11) When the relationship between the beam interceptor (when present) and the useful beam is not permanently fixed, mechanical or electrical stops shall be provided to insure that the beam is oriented only toward primary barriers.

(b) Operating Procedures.

(1) When a patient must be held in position for radiation therapy, mechanical supporting or restraining devices shall be used.

(2) No patient other than the one being treated shall be in the treatment room during exposure.

(3) No person other than the patient shall be in the treatment room when the tube is operated at potentials exceeding 150 kVp. At operating potentials of 150 kVp or below, persons other than the patient and operator may be in the treatment room for good reason but only if they are adequately protected and their radiation exposure is appropriately monitored.

(4) A calibration of the output of each radiation therapy system shall be performed before the system is first used for irradiation of a patient, and thereafter at intervals not to exceed 24 months. Therapy equipment shall not be used for any therapy treatments except at those combinations of effective energy, field size, and treatment distance for which the equipment has been calibrated. The calibration shall be performed by or under the direct supervision of a person who has been determined by the Department to have adequate training, experience and knowledge in radiation therapy physics, and who shall be present at the facility during such calibration. After any change which might significantly alter the output, spatial distribution, or other characteristics of the therapy beam, the parameters which might be affected shall be measured.

(A) For therapy systems operating at potentials above 500 kVp, the determinations included in the calibration shall be provided in sufficient detail so that the absorbed dose in tissue in the useful beam may be calculated to within 5 percent. The calibration shall include, but shall not be limited to, the following determinations:

1. Verification that the equipment is operating in compliance with the design specifications concerning the light localizer, the side light and back-pointer alignment with the isocenter when these specifications are known and applicable, variation in the axis of rotation for the table, gantry and jaw system, and beam flatness and symmetry at specified depths.
2. The relative dose at various depths in a tissue equivalent phantom for each effective energy and the ranges of field sizes and treatment distances used for radiation therapy.
3. The congruence between the radiation field and the field indicated by the localizing device.
4. The uniformity of the radiation field and its dependency upon the direction of the useful beam.
5. The absolute dose per unit time and dose per monitor setting.

(B) For therapy systems operating at potentials between 150 kVp and 500 kVp inclusive, the calibration shall include, but shall not be limited to, the following determinations:

1. The exposure rates and/or dose rates for each combination of field size, technique factors, filter, and treatment distance used.
2. The degree of congruence between the radiation field and the field indicated by the localizing device if such device is present.
3. An evaluation of the uniformity of the radiation field symmetry for the field sizes used, and any dependence upon tube housing assembly orientation.

(5) All new installations and existing installations not previously surveyed shall have a radiation protection survey performed by or under the direction of a person determined by the Department to have adequate knowledge and training to advise regarding radiation protection needs, to measure ionizing radiation and to evaluate safety techniques. If the survey shows that supplementary shielding is required a resurvey shall be performed after its installation. In addition, a resurvey shall be made after every change which might decrease radiation protection significantly. The surveyor shall report his findings in writing to the user. The report shall indicate whether or not the installation is in compliance with all applicable radiation protection requirements of this section. The user
shall report the findings of the survey in writing to the Department within 15 days of his receipt of the survey report.

(6) The exposure rate or dose rate of the useful beam and the size and shape of the useful beam shall be known with reasonable certainty at all times during operation of the radiation therapy apparatus for medical purposes.

(7) Spot checks shall be performed at least once each week for therapy systems operating at potentials above 500 kVp, and at least once each month for therapy systems operating at 500 kVp or below.

(A) The measurements taken during spot checks shall demonstrate the degree of consistency of the operating characteristics which can affect the radiation output of the system or the radiation delivered to a patient during a therapy procedure.

(B) For systems in which the calibrating person believes beam quality can vary significantly, spot checks shall include beam quality checks.

(C) The spot check procedures shall be in writing and shall have been developed or approved by the individual who made the most recent calibration of the system pursuant to Section 30312(b)(4). The written spot check procedures shall specify when measurements and determinations indicate an inconsistency or potential change in radiation output. When more than the minimum frequency of spot checking is necessary, the spot check procedures shall specify the frequency at which spot checks are to be performed.

(D) When spot check results are erratic or inconsistent with calibration data, the person who designed the spot check procedures, or a person of equivalent competence, shall be consulted immediately and the reason(s) for the inconsistency corrected before the system is used for patient irradiation.

(8) Calibration of the therapy beam shall be performed with a measurement instrument which has been calibrated within the preceding two years directly, or through no more than one exchange, at the National Institute of Standards and Technology, or facility determined acceptable by the Department. In addition, indirect spot checks or intercomparisons of measurement instruments with secondary standards shall be made at least each six months.

(9) Reports of each radiation safety survey spot check and calibration performed pursuant to this section shall be maintained at the facility for at least three years. A copy of the treatment data developed from the latest calibration shall be available for use by the operator at the treatment control station.

The boards, bureaus, and commissions in the department are established for the purpose of ensuring that those private businesses and professions deemed to engage in activities which have potential impact upon the public health, safety, and welfare are adequately regulated in order to protect the people of California.

They provide a means for redress of grievances by investigating allegations of unprofessional conduct, incompetence, fraudulent action, or unlawful activity brought to their attention by members of the public and institute disciplinary action against persons licensed or registered under the provisions of this code when such action is warranted. In addition, they conduct periodic checks of licensees, registrants, or otherwise certified persons in order to ensure compliance with the relevant sections of this code.

(b) Such order may not be issued without notice to the licensee unless it appears from facts shown by the affidavits that serious injury would result to the public before the matter can be heard on notice.

(c) Except as otherwise specifically provided by this section, proceedings under this section shall be governed by Chapter 3 (commencing with Section 525) of Title 7 of Part 2 of the Code of Civil Procedure.

(d) When a restraining order is issued pursuant to this section, or within a time to be allowed by the superior court, but in any case not more than 30 days after the restraining order is issued, an accusation shall be filed with the board pursuant to Section 11503 of the Government Code. (b) The system shall contain the following provisions:

(1) Citations shall be in writing and shall describe with particularity the nature of the violation, including specific reference to the provision of law determined to have been violated.

(2) Whenever appropriate, the citation shall contain an order of abatement fixing a reasonable time for abatement of the violation.

If a hearing is not requested pursuant to this section, payment of any fine shall not constitute an admission of the violation charged. Hearings shall be held pursuant to Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code.

(5) Failure of a licensee to pay a fine within 30 days of the date of assessment, unless the citation is being appealed, may result in disciplinary action being taken by the board, bureau, or commission. Where a citation is not contested and a fine is not paid, the full amount of the assessed fine shall be added to the fee for renewal of the license. A license shall not be renewed without payment of the renewal fee and fine.

(c) The system may contain the following provisions:

(2) Assessment of administrative fines may be limited to only particular violations of the applicable licensing act.
(d) Notwithstanding any other provision of law, if a fine is paid to satisfy an assessment based on the finding of a violation, payment of the fine shall be represented as satisfactory resolution of the matter for purposes of public disclosure.

(e) Administrative fines collected pursuant to this section shall be deposited in the special fund of the particular board, bureau, or commission.

  (a) Notwithstanding any other provision of law, if at the end of any fiscal year, an agency within the Department of Consumer Affairs, except the agencies referred to in subdivision (b), has unencumbered funds in an amount that equals or is more than the agency's operating budget for the next two fiscal years, the agency shall reduce license or other fees, whether the license or other fees be fixed by statute or may be determined by the agency within limits fixed by statute, during the following fiscal year in an amount that will reduce any surplus funds of the agency to an amount less than the agency's operating budget for the next two fiscal years.
  (b) Notwithstanding any other provision of law, if at the end of any fiscal year, the California Architects Board, the Board of Behavioral Sciences, the Veterinary Medical Board, the Court Reporters Board of California, the Medical Board of California, the Board of Vocational Nursing and Psychiatric Technicians, or the Bureau of Security and Investigative Services has unencumbered funds in an amount that equals or is more than the agency's operating budget for the next two fiscal years, the agency shall reduce license or other fees, whether the license or other fees be fixed by statute or may be determined by the agency within limits fixed by statute, during the following fiscal year in an amount that will reduce any surplus funds of the agency to an amount less than the agency's operating budget for the next two fiscal years.

Each board shall notify the complainant of the final action taken on his or her complaint. There shall be a notification made in every case in which the complainant is known. If the complaint is not within the jurisdiction of the board or if the board is unable to dispose satisfactorily of the complaint, the board shall transmit the complaint together with any evidence or information it has concerning the complaint to the agency, public or private, whose authority in the opinion of the board will provide the most effective means to secure the relief sought. The board shall notify the complainant of this action and of any other means that may be available to the complainant to secure relief.
  (c) The board shall, when the board deems it appropriate, notify the person against whom the complaint is made of the nature of the complaint, may request appropriate relief for the complainant, and may meet and confer with the complainant and the licensee in order to mediate the complaint. Nothing in this subdivision shall be construed as authorizing or requiring any board to set or to modify any fee charged by a licensee.
  (d) It shall be the continuing duty of the board to ascertain patterns of complaints and to report on all actions taken with respect to those patterns of complaints to the director and to the Legislature at least once per year. The board shall evaluate those complaints dismissed for lack of jurisdiction or no violation and recommend to the director and to the Legislature at least once per year the statutory changes it deems necessary to implement the board’s functions and responsibilities under this section.
  (e) It shall be the continuing duty of the board to take whatever action it deems necessary, with the approval of the director, to inform the public of its functions under this section.

§ 132. Requirements for institution or joinder of legal action by state agency against other state or federal agency

No board, commission, examining committee, or any other agency within the department may institute or join any legal action against any other agency within the state or federal government without the permission of the director.

Prior to instituting or joining in a legal action against an agency of the state or federal government, a board, commission, examining committee, or any other agency within the department shall present a written request to the director to do so.

Within 30 days of receipt of the request, the director shall communicate his or her approval or denial of the request and his or her reasons for approval or denial to the requesting agency in writing. If the director does not act within 30 days, the request shall be deemed approved.

A requesting agency within the department may override the director’s denial of its request to institute or join a legal action against a state or federal agency by a two-thirds vote of the members of the board, commission, examining committee, or other agency, which vote shall include the vote of at least one public member of that board, commission, examining committee, or other agency.

No agency in the department shall, on the basis of an applicant’s failure to successfully complete prior examinations, impose any additional limitations, restrictions, prerequisites, or requirements on any applicant who wishes to participate in subsequent examinations except that any examining agency which allows an applicant conditional credit for successfully completing a divisible part of an examination may require that an applicant be reexamined in those parts successfully completed if such applicant has not successfully completed all parts of the examination within a required period of time established by the examining agency. Nothing in this section, however, requires the exemption of such applicant from the regular fees and requirements normally associated with examinations.

§ 135.5. Licensure and citizenship or immigration status

(a) The Legislature finds and declares that it is in the best interests of the State of California to provide persons who are not lawfully present in the United States with the state benefits provided by all licensing acts of entities within the department, and therefore enacts this section pursuant to subsection (d) of Section 1621 of Title 8 of the United States Code.

(b) Notwithstanding subdivision (a) of Section 30, and except as required by subdivision (e) of Section 7583.23, no entity within the department shall deny licensure to an applicant based on his or her citizenship status or immigration status.

(c) Every board within the department shall implement all required regulatory or procedural changes necessary to implement this section no later than January 1, 2016. A board may implement the provisions of this section at any time prior to January 1, 2016.

§ 140. Disciplinary action; Licensee’s failure to record cash transactions in payment of employee wages

Any board, as defined in Section 22, which is authorized under this code to take disciplinary action against a person who holds a license may take disciplinary action upon the ground that the licensee has failed to record and preserve for not less than three years, any and all cash transactions involved in the payment of employee wages by a licensee. Failure to make these records available to an authorized representative of the board may be made grounds for disciplinary action. In any action brought and sustained by the board which involves a violation of this section and any regulation adopted thereto, the board may assess the licensee with the actual investigative costs incurred, not to exceed two thousand five hundred dollars ($2,500). Failure to pay those costs may
result in revocation of the license. Any moneys collected pursuant to this section shall be deposited in the respective fund of the board.

A provision of that nature is void as against public policy, and any licensee who includes or permits to be included a provision of that nature in a settlement agreement is subject to disciplinary action by the board, bureau, or program.

(b) Any board, bureau, or program within the Department of Consumer Affairs that takes disciplinary action against a licensee or licensees based on a complaint or report that has also been the subject of a civil action and that has been settled for monetary damages providing for full and final satisfaction of the parties may not require its licensee or licensees to pay any additional sums to the benefit of any plaintiff in the civil action.

(c) As used in this section, “board” shall have the same meaning as defined in Section 22, and “licensee” means a person who has been granted a license, as that term is defined in Section 23.7.

(d) Notwithstanding any other law, upon granting a petition filed by a licensee or authorized agent of a licensee pursuant to Section 11340.6 of the Government Code, a board, bureau, or program within the Department of Consumer Affairs may, based upon evidence and legal authorities cited in the petition, adopt a regulation that does both of the following:

1. Identifies a code section or jury instruction in a civil cause of action that has no relevance to the board’s, bureau’s, or program’s enforcement responsibilities such that an agreement to settle such a cause of action based on that code section or jury instruction otherwise prohibited under subdivision (a) will not impair the board’s, bureau’s, or program’s duty to protect the public.

2. Exempts agreements to settle such a cause of action from the requirements of subdivision (a).

(e) This section shall not apply to a licensee subject to Section 2220.7.

(c) For purposes of paragraph (26) of subdivision (b), the term “applicant” shall be limited to an initial applicant who has never been registered or licensed by the board or to an applicant for a new licensure or registration category.

§ 144.5. Board authority

Notwithstanding any other law, a board described in Section 144 may request, and is authorized to receive, from a local or state agency certified records of all arrests and convictions, certified records regarding probation, and any and all other related documentation needed to complete an applicant or licensee investigation. board, bureau, or commission. The administrative citation system authorized by this
section shall meet the requirements of Section 125.9 and may not be applied to an
unlicensed person who is otherwise exempted from the provisions of the applicable
licensing act. The establishment of an administrative citation system for unlicensed
activity does not preclude the use of other enforcement statutes for unlicensed activities
at the discretion of the board, bureau, or commission.

(a) A board may deny a license regulated by this code on the grounds that the applicant has one of the following:

1. Been convicted of a crime. A conviction within the meaning of this section means a plea or verdict of guilty or a conviction following a plea of nolo contendere. Any action that a board is permitted to take following the establishment of a conviction may be taken when the time for appeal has elapsed, or the judgment of conviction has been affirmed on appeal, or when an order granting probation is made suspending the imposition of sentence, irrespective of a subsequent order under the provisions of Section 1203.4, 1203.4a, or 1203.41 of the Penal Code.

2. Done any act involving dishonesty, fraud, or deceit with the intent to substantially benefit himself or herself or another, or substantially injure another.

3. (A) Done any act that if done by a licentiate of the business or profession in question, would be grounds for suspension or revocation of license.

(B) The board may deny a license pursuant to this subdivision only if the crime or act is substantially related to the qualifications, functions, or duties of the business or profession for which application is made.

(b) Notwithstanding any other provision of this code, a person shall not be denied a license solely on the basis that he or she has been convicted of a felony if he or she has obtained a certificate of rehabilitation under Chapter 3.5 (commencing with Section 4852.01) of Title 6 of Part 3 of the Penal Code or that he or she has been convicted of a misdemeanor if he or she has met all applicable requirements of the criteria of rehabilitation developed by the board to evaluate the rehabilitation of a person when considering the denial of a license under subdivision (a) of Section 482.

(c) Notwithstanding any other provision of this code, a person shall not be denied a license solely on the basis that he or she has been convicted of a misdemeanor if he or she has met all applicable requirements of the criteria of rehabilitation developed by the board to evaluate the rehabilitation of a person when considering the denial of a license under subdivision (a) of Section 482.

(d) A board may deny a license regulated by this code on the ground that the applicant knowingly made a false statement of fact that is required to be revealed in the application for the license.

§ 480.5. Completion of licensure requirements while incarcerated

(a) An individual who has satisfied any of the requirements needed to obtain a license regulated under this division while incarcerated, who applies for that license upon release from incarceration, and who is otherwise eligible for the license shall not be subject to a delay in processing his or her application or a denial of the license solely on
the basis that some or all of the licensure requirements were completed while the individual was incarcerated.

(b) Nothing in this section shall be construed to apply to a petition for reinstatement of a license or to limit the ability of a board to deny a license pursuant to Section 480.

(c) This section shall not apply to the licensure of individuals under the initiative act referred to in Chapter 2 (commencing with Section 1000) of Division 2.

Added Stats 2014 ch 410 § 1 (AB 1702), effective January 1, 2015.

§ 481. Crime and job-fitness criteria

§ 482. Rehabilitation criteria
Each board under the provisions of this code shall develop criteria to evaluate the rehabilitation of a person when:

(a) Considering the denial of a license by the board under Section 480; or

§ 484. Attestation to good moral character of applicant
No person applying for licensure under this code shall be required to submit to any licensing board any attestation by other persons to his good moral character.

§ 485. Procedure upon denial
Upon denial of an application for a license under this chapter or Section 496, the board shall do either of the following:

(a) File and serve a statement of issues in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code.

Unless written request for hearing is made within the 60-day period, the applicant’s right to a hearing is deemed waived.

Service of the notice of denial may be made in the manner authorized for service of summons in civil actions, or by registered mail addressed to the applicant at the latest address filed by the applicant in writing with the board in his or her application or otherwise. Service by mail is complete on the date of mailing.

(a) The earliest date on which the applicant may reapply for a license which shall be one year from the effective date of the decision, or service of the notice under subdivision (b) of Section 485, unless the board prescribes an earlier date or a later date is prescribed by another statute.

(b) That all competent evidence of rehabilitation presented will be considered upon a reapplication.
Along with the decision, or the notice under subdivision (b) of Section 485, the board shall serve a copy of the criteria relating to rehabilitation formulated under Section 482. Added Stats 1972 ch 903 § 1. Amended Stats 1974 ch 1321 § 9.5; Stats 1997 ch 758 § 2.4 (SB 1346).

§ 487. Hearing; Time

If a hearing is requested by the applicant, the board shall conduct such hearing within 90 days from the date the hearing is requested unless the applicant shall request or agree in writing to a postponement or continuance of the hearing. Notwithstanding the above, the Office of Administrative Hearings may order, or on a showing of good cause, grant a request for, up to 45 additional days within which to conduct a hearing, except in cases involving alleged examination or licensing fraud, in which cases the period may be up to 180 days. In no case shall more than two such orders be made or requests be granted. Added Stats 1972 ch 903 § 1. Amended Stats 1974 ch 1321 § 10; Stats 1986 ch 220 § 1, effective June 30, 1986.

§ 488. Hearing request

Except as otherwise provided by law, following a hearing requested by an applicant pursuant to subdivision (b) of Section 485, the board may take any of the following actions:
(a) Grant the license effective upon completion of all licensing requirements by the applicant.
(b) Grant the license effective upon completion of all licensing requirements by the applicant, immediately revoke the license, stay the revocation, and impose probationary conditions on the license, which may include suspension.
(c) Deny the license.
(d) Take other action in relation to denying or granting the license as the board in its discretion may deem proper. Added Stats 2000 ch 568 § 2 (AB 2888).

§ 489. Denial of application without a hearing

Any agency in the department which is authorized by law to deny an application for a license upon the grounds specified in Section 480 or 496, may without a hearing deny an application upon any of those grounds, if within one year previously, and after proceedings conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, that agency has denied an application from the same applicant upon the same ground. Added Stats 1955 ch 1151 § 1, as B & P C § 116. Amended Stats 1978 ch 1161 § 2. Renumbered by Stats 1989 ch 1104 § 1. Amended Stats 1997 ch 758 § 2.5 (SB 1346).

CHAPTER 3
Suspension and Revocation of Licenses

§ 490. Grounds for suspension or revocation; Discipline for substantially related crimes; Conviction; Legislative findings

(a) In addition to any other action that a board is permitted to take against a licensee, a board may suspend or revoke a license on the ground that the licensee has been convicted of a crime, if the crime is substantially related to the qualifications, functions, or duties of the business or profession for which the license was issued.
(b) Notwithstanding any other provision of law, a board may exercise any authority to discipline a licensee for conviction of a crime that is independent of the authority granted under subdivision (a) only if the crime is substantially related to the qualifications, functions, or duties of the business or profession for which the licensee’s license was issued.
(c) A conviction within the meaning of this section means a plea or verdict of guilty or a conviction following a plea of nolo contendere. An action that a board is permitted to take following the establishment of a conviction may be taken when the time for appeal has elapsed, or the judgment of conviction has been affirmed on appeal, or when an order granting probation is made suspending the imposition of sentence, irrespective of a subsequent order under Section 1203.4 of the Penal Code.

(d) The Legislature hereby finds and declares that the application of this section has been made unclear by the holding in Petropoulos v. Department of Real Estate (2006) 142 Cal.App.4th 554, and that the holding in that case has placed a significant number of statutes and regulations in question, resulting in potential harm to the consumers of California from licensees who have been convicted of crimes. Therefore, the Legislature finds and declares that this section establishes an independent basis for a board to impose discipline upon a licensee, and that the amendments to this section made by Chapter 33 of the Statutes of 2008 do not constitute a change to, but rather are declaratory of, existing law.

§ 491. Procedure upon suspension or revocation

Upon suspension or revocation of a license by a board on one or more of the grounds specified in Section 490, the board shall:

(a) Send a copy of the provisions of Section 11522 of the Government Code to the ex-licensee.

(b) Send a copy of the criteria relating to rehabilitation formulated under Section 482 to the ex-licensee.

§ 492. Effect of completion of drug diversion program on disciplinary action or denial of license

Notwithstanding any other provision of law, successful completion of any diversion program under the Penal Code, or successful completion of an alcohol and drug problem assessment program under Article 5 (commencing with Section 23249.50) of Chapter 12 of Division 11 of the Vehicle Code, shall not prohibit any agency established under Division 2 (commencing with Section 500) of this code, or any initiative act referred to in that division, from taking disciplinary action against a licensee or from denying a license for professional misconduct, notwithstanding that evidence of that misconduct may be recorded in a record pertaining to an arrest.

This section shall not be construed to apply to any drug diversion program operated by any agency established under Division 2 (commencing with Section 500) of this code, or any initiative act referred to in that division.

§ 493. Evidentiary effect of record of conviction of crime substantially related to licensee's qualifications, functions, and duties

Notwithstanding any other provision of law, in a proceeding conducted by a board within the department pursuant to law to deny an application for a license or to suspend or revoke a license or otherwise take disciplinary action against a person who holds a license, upon the ground that the applicant or the licensee has been convicted of a crime substantially related to the qualifications, functions, and duties of the licensee in question, the record of conviction of the crime shall be conclusive evidence of the fact that the conviction occurred, but only of that fact, and the board may inquire into the circumstances surrounding the commission of the crime in order to fix the degree of discipline or to determine if the conviction is substantially related to the qualifications, functions, and duties of the licensee in question.

As used in this section, "license" includes "certificate," "permit," "authority," and "registration."
CHAPTER 4

Public Reprovals

§ 495. Public reproval of licentiate or certificate holder for act constituting grounds for suspension or revocation of license or certificate; Proceedings

Notwithstanding any other provision of law, any entity authorized to issue a license or certificate pursuant to this code may publicly reprove a licentiate or certificate holder thereof, for any act that would constitute grounds to suspend or revoke a license or certificate. Any proceedings for public reproval, public reproval and suspension, or public reproval and revocation shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, or, in the case of a licensee or certificate holder under the jurisdiction of the State Department of Health Services, in accordance with Section 100171 of the Health and Safety Code.

CHAPTER 5

Examination Security

§ 496. Grounds for denial, suspension, or revocation of license

A board may deny, suspend, revoke, or otherwise restrict a license on the ground that an applicant or licensee has violated Section 123 pertaining to subversion of licensing examinations.

Added Stats 1989 ch 1022 § 3.

§ 498. Fraud, deceit or misrepresentation as grounds for action against license

A board may revoke, suspend, or otherwise restrict a license on the ground that the licensee secured the license by fraud, deceit, or knowing misrepresentation of a material fact or by knowingly omitting to state a material fact.

Added Stats 1992 ch 1289 § 8 (AB 2743).

§ 499. Action against license based on licentiate's actions regarding application of another

A board may revoke, suspend, or otherwise restrict a license on the ground that the licensee, in support of another person's application for license, knowingly made a false statement of a material fact or knowingly omitted to state a material fact to the board regarding the application.

Added Stats 1992 ch 1289 § 9 (AB 2743).

DIVISION 2

Healing Arts

CHAPTER 1

General Provisions

ARTICLE 6

Unearned Rebates, Refunds, and Discounts

Section

650. Rebates for patient referrals; Consideration between supplier and health facility
§ 650. Rebates for patient referrals; Consideration between supplier and health facility

(a) Except as provided in Chapter 2.3 (commencing with Section 1400) of Division 2 of the Health and Safety Code, the offer, delivery, receipt, or acceptance by any person licensed under this division or the Chiropractic Initiative Act of any rebate, refund, commission, preference, patronage dividend, discount, or other consideration, whether in the form of money or otherwise, as compensation or inducement for referring patients, clients, or customers to any person, irrespective of any membership, proprietary interest, or coownership in or with any person to whom these patients, clients, or customers are referred is unlawful.

(b) The payment or receipt of consideration for services other than the referral of patients which is based on a percentage of gross revenue or similar type of contractual arrangement shall not be unlawful if the consideration is commensurate with the value of the services furnished or with the fair rental value of any premises or equipment leased or provided by the recipient to the payer.

(c) The offer, delivery, receipt, or acceptance of any consideration between a federally qualified health center, as defined in Section 1396d(l)(2)(B) of Title 42 of the United States Code, and any individual or entity providing goods, items, services, donations, loans, or a combination thereof to the health center entity pursuant to a contract, lease, grant, loan, or other agreement, if that agreement contributes to the ability of the health center entity to maintain or increase the availability, or enhance the quality, of services provided to a medically underserved population served by the health center, shall be permitted only to the extent sanctioned or permitted by federal law.

(d) Except as provided in Chapter 2.3 (commencing with Section 1400) of Division 2 of the Health and Safety Code and in Sections 654.1 and 654.2 of this code, it shall not be unlawful for any person licensed under this division to refer a person to any laboratory, pharmacy, clinic (including entities exempt from licensure pursuant to Section 1206 of the Health and Safety Code), or health care facility solely because the licensee has a proprietary interest or coownership in the laboratory, pharmacy, clinic, or health care facility, provided, however, that the licensee's return on investment for that proprietary interest or coownership shall be based upon the amount of the capital investment or proportional ownership of the licensee which ownership interest is not based on the number or value of any patients referred. Any referral excepted under this section shall be unlawful if the prosecutor proves that there was no valid medical need for the referral.

(e) Except as provided in Chapter 2.3 (commencing with Section 1400) of Division 2 of the Health and Safety Code and in Sections 654.1 and 654.2 of this code, it shall not be unlawful to provide nonmonetary remuneration, in the form of hardware, software, or information technology and training services, as described in subsections (x) and (y) of Section 1001.952 of Title 42 of the Code of Federal Regulations, as amended October 4, 2007, as published in the Federal Register (72 Fed. Reg. 56632 and 56644), and subsequently amended versions.

(f) "Health care facility" means a general acute care hospital, acute psychiatric hospital, skilled nursing facility, intermediate care facility, and any other health facility licensed by the State Department of Public Health under Chapter 2 (commencing with Section 1250) of Division 2 of the Health and Safety Code.

(g) Notwithstanding the other subdivisions of this section or any other provision of law, the payment or receipt of consideration for advertising, wherein a licensee offers or
sells services through a third-party advertiser, shall not constitute a referral of patients when the third-party advertiser does not itself recommend, endorse, or otherwise select a licensee. The fee paid to the third-party advertiser shall be commensurate with the service provided by the third-party advertiser. If the licensee determines, after consultation with the purchaser of the service, that the service provided by the licensee is not appropriate for the purchaser or if the purchaser elects not to receive the service for any reason and requests a refund, the purchaser shall receive a refund of the full purchase price as determined by the terms of the advertising service agreement between the third-party advertiser and the licensee. The licensee shall disclose in the advertisement that a consultation is required and that the purchaser will receive a refund if not eligible to receive the service. This subdivision shall not apply to basic health care services, as defined in subdivision (b) of Section 1345 of the Health and Safety Code, or essential health benefits, as defined in Section 1367.005 of the Health and Safety Code and Section 10112.27 of the Insurance Code. The entity that provides the advertising shall be able to demonstrate that the licensee consented in writing to the requirements of this subdivision. A third-party advertiser shall make available to prospective purchasers advertisements for services of all licensees then advertising through the third-party advertiser in the applicable geographic region. In any advertisement offering a discount price for a service, the licensee shall also disclose the regular, nondiscounted price for that service.

(h) A violation of this section is a public offense and is punishable upon a first conviction by imprisonment in a county jail for not more than one year, or by imprisonment pursuant to subdivision (h) of Section 1170 of the Penal Code, or by a fine not exceeding fifty thousand dollars ($50,000), or by both that imprisonment and fine. A second or subsequent conviction is punishable by imprisonment pursuant to subdivision (h) of Section 1170 of the Penal Code, or by that imprisonment and a fine of fifty thousand dollars ($50,000).

Added Stats 1949 ch 899 § 1. (a) It is unlawful for any person licensed under this division or under any initiative act referred to in this division to disseminate or cause to be disseminated any form of public communication containing a false, fraudulent, misleading, or deceptive statement, claim, or image for the purpose of or likely to induce, directly or indirectly, the rendering of professional services or furnishing of products in connection with the professional practice or business for which he or she is licensed. A “public communication” as used in this section includes, but is not limited to, communication by means of mail, television, radio, motion picture, newspaper, book, list or directory of healing arts practitioners, Internet, or other electronic communication.

1. Contains a misrepresentation of fact.
2. Is likely to mislead or deceive because of a failure to disclose material facts.
3. Is intended or is likely to create false or unjustified expectations of favorable results, including the use of any photograph or other image that does not accurately depict the results of the procedure being advertised or that has been altered in any manner from the image of the actual subject depicted in the photograph or image.

(B) Use of any photograph or other image of a model without clearly stating in a prominent location in easily readable type the fact that the photograph or image is of a model is a violation of subdivision (a). For purposes of this paragraph, a model is anyone other than an actual patient, who has undergone the procedure being advertised, of the licensee who is advertising for his or her services.

(C) Use of any photograph or other image of an actual patient that depicts or purports to depict the results of any procedure, or presents “before” and “after” views of a patient, without specifying in a prominent location in easily readable type size what procedures were performed on that patient is a violation of subdivision (a). 4. Relates to fees, other than a standard consultation fee or a range of fees for specific types of services, without fully and specifically disclosing all variables and other material factors.

5. Contains other representations or implications that in reasonable probability will cause an ordinarily prudent person to misunderstand or be deceived.

6. Makes a claim either of professional superiority or of performing services in a superior manner, unless that claim is relevant to the service being performed and can be substantiated with objective scientific evidence.

7. Makes a scientific claim that cannot be substantiated by reliable, peer reviewed, published scientific studies.

8. Includes any statement, endorsement, or testimonial that is likely to mislead or deceive because of a failure to disclose material facts.

(c) Any price advertisement shall be exact, without the use of phrases, including, but not limited to, “as low as,” “and up,” “lowest prices,” or words or phrases of similar import. Any advertisement that refers to services, or costs for services, and that uses words of comparison shall be based on verifiable data substantiating the comparison. Any person so advertising shall be prepared to provide information sufficient to establish the accuracy of that comparison. Price advertising shall not be fraudulent, deceitful, or misleading, including statements or advertisements of bait, discount, premiums, gifts, or any statements of a similar nature. In connection with price advertising, the price for each product or service shall be clearly identifiable. The price advertised for products shall include charges for any related professional services, including dispensing and fitting services, unless the advertisement specifically and clearly indicates otherwise.

(d) Any person so licensed shall not compensate or give anything of value to a representative of the press, radio, television, or other communication medium in anticipation of, or in return for, professional publicity unless the fact of compensation is made known in that publicity.
(e) Any person so licensed may not use any professional card, professional announcement card, office sign, letterhead, telephone directory listing, medical list, medical directory listing, or a similar professional notice or device if it includes a statement or claim that is false, fraudulent, misleading, or deceptive within the meaning of subdivision (b).

(f) Any person so licensed who violates this section is guilty of a misdemeanor. A bona fide mistake of fact shall be a defense to this subdivision, but only to this subdivision.

The proceedings for suspension or revocation shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and each board shall have all the powers granted therein. However, in the case of a licensee of the State Department of Health Services, the proceedings shall be conducted in accordance with Section 110171 of the Health and Safety Code. In addition, any violation constitutes a misdemeanor as to any and all persons offering, delivering, receiving, accepting, or participating in any rebate, refund, commission, preference, patronage dividend, unearned discount, or consideration, whether or not licensed under this division, and is punishable by imprisonment in the county jail not exceeding six months, by a fine not exceeding two thousand five hundred dollars ($2,500), or by both the imprisonment and fine.

(b) The disclosure requirements of subdivision (a) may be met by posting a conspicuous sign in an area which is likely to be seen by all patients who use the facility or by providing those patients with a written disclosure statement. Where referrals, billings, or other solicitations are between licensees who contract with multispecialty clinics pursuant to subdivision (l) of Section 1206 of the Health and Safety Code or who conduct their practice as members of the same professional corporation or partnership, and the services are rendered on the same physical premises, or under the same professional corporation or partnership name, the requirements of subdivision (a) may be met by posting a conspicuous disclosure statement at a single location which is a common area or registration area or by providing those patients with a written disclosure statement.

(c) On and after July 1, 1987, persons licensed under this division or under any initiative act referred to in this division shall disclose in writing to any third-party payer for the patient, when requested by the payer, organizations in which the licensee, or any member of the licensee’s immediate family, has a significant beneficial interest and to which patients are referred. The third-party payer shall not request this information from the provider more than once a year.

ownership of a building where the space is leased to the organization at the prevailing
rate under a straight lease agreement or to any interest held in publicly traded stocks.

(f)(1) This section does not prohibit the acceptance of evaluation specimens for
proficiency testing or referral of specimens or assignment from one clinical laboratory to
another clinical laboratory, either licensed or exempt under this chapter, if the report
indicates clearly the name of the laboratory performing the test.

(2) This section shall not apply to relationships governed by other provisions of this
article nor is this section to be construed as permitting relationships or interests that are
prohibited by existing law on the effective date of this section.

(3) The disclosure requirements of this section shall not be required to be given to any
patient, customer, or his or her representative, if the licensee, organization, or entity is
providing or arranging for health care services pursuant to a prepaid capitated contract
with the State Department of Health Services.

initiative act or division referred to in this division.

(2) “Licensee’s office” means either of the following:

(A) An office of a licensee in solo practice.

(B) An office in which services or goods are personally provided by the licensee or by
employees in that office, or personally by independent contractors in that office, in
accordance with law. Employees and independent contractors shall be licensed or
certified when licensure or certification is required by law.

(3) “Open-end credit” means credit extended by a creditor under a plan in which the
creditor reasonably contemplates repeated transactions, the creditor may impose a
finance charge from time to time on an outstanding unpaid balance, and the amount of
credit that may be extended to the debtor during the term of the plan, up to any limit set
by the creditor, is generally made available to the extent that any outstanding balance is
repaid.

(4) “Patient” includes, but is not limited to, the patient’s parent or other legal
representative.

(b) It is unlawful for a licensee, or employee or agent of that licensee, to charge
treatment or costs to an open-end credit or loan, that is extended by a third party and
that is arranged for, or established in, that licensee’s office, before the date upon which
the treatment is rendered or costs are incurred, without first providing the patient with
a treatment plan, as required by subdivision (e) and a list of which treatment and
services are being charged in advance of rendering or incurring of costs.

(c) A licensee shall, within 15 business days of a patient’s request, refund to the lender
any payment received through credit or a loan extended by a third party that is arranged
for, or established in, that licensee’s office for treatment that has not been rendered or
costs that have not been incurred.

(d) A licensee, or an employee or agent of that licensee, shall not arrange for or
establish credit or a loan extended by a third party for a patient without first providing
the following written or electronic notice, on one page or screen, respectively, in at least
14-point type, and obtaining a signature from the patient:

“Credit or Loan for Health Care Services

The attached application and information is for a credit card/line of credit or loan to help
you finance your health care treatment. You should know that:

You are applying for a___________ credit card/line of credit or a___________ loan
for $____

You do not have to apply for the credit card/line of credit or loan. You may pay your
health care provider for treatment in another manner.
This credit card/line of credit or loan is not a payment plan with the provider's office; it is credit with, or a loan made by, [name of company issuing the credit card/line of credit or loan]. Your health care provider does not work for this company.

Before applying for this credit card/line of credit or loan, you have the right to a written treatment plan from your health care provider that includes the anticipated treatment to be provided and the estimated costs of each service.

If you are approved for a credit card/line of credit or loan, your health care provider can only charge treatment and laboratory costs to that credit card/line of credit or loan when you get the treatment or the health care provider incurs costs unless your health care provider has first given you a list of treatments that you are paying for in advance and the cost for each treatment or service.

You have the right to receive a credit to your credit card/line of credit or loan account refunded for any costs charged to the credit card/line of credit or loan for treatment that has not been rendered or costs that your health care provider has not incurred. Your health care provider must refund the amount of the charges to the lender within 15 business days of your request, after which the lender will credit your account.

Please read carefully the terms and conditions of this credit card/line of credit or loan, including any promotional offers.

You may be required to pay interest rates on the amount charged to the credit card/line of credit or the amount of the loan. If you miss a payment or do not pay on time, you may have to pay a penalty on the entire cost of your procedure and a higher interest rate.

You may use this credit card/line of credit or loan for payments toward subsequent health care services.

If you do not pay the money that you owe the company that provides you with a credit card/line of credit or loan, your missed payments can appear on your credit report and could hurt your credit rating. You could also be sued.

[Patient's Signature]"

(e) Prior to arranging for or establishing credit or a loan extended by a third party, a licensee shall give a patient a written treatment plan. The treatment plan shall include each anticipated service to be provided and the estimated cost of each service. If a patient is covered by a private or government medical benefit plan or medical insurance, from which the licensee takes assignment of benefits, the treatment plan shall indicate the patient's private or government-estimated share of cost for each service. If the licensee does not take assignment of benefits from a patient's medical benefit plan or insurance, the treatment plan shall indicate that the treatment may or may not be covered by a patient's medical benefit or insurance plan, and that the patient has the right to confirm medical benefit or insurance information from the patient's plan, insurer, or employer before beginning treatment.

(f) A licensee, or an employee or agent of that licensee, shall not arrange for or establish credit or a loan extended by a third party for a patient with whom the licensee, or an employee or agent of that licensee, communicates primarily in a language other than English that is one of the Medi-Cal threshold languages, unless the written notice information required by subdivision (d) is also provided in that language.

(g) A licensee, or an employee or agent of that licensee, shall not arrange for or establish credit or a loan that is extended by a third party for a patient who has been administered or is under the influence of general anesthesia, conscious sedation, or nitrous oxide.

(h) A patient who suffers any damage as a result of the use or employment by any person of a method, act, or practice that willfully violates this section may seek the relief provided by Chapter 4 (commencing with Section 1780) of Title 1.5 of Part 4 of Division 3 of the Civil Code.

(i) The rights, remedies, and penalties established by this article are cumulative, and shall not supersede the rights, remedies, or penalties established under other laws.

Each central file shall be created and maintained to provide an individual historical record for each licensee with respect to the following information:

(1) Any conviction of a crime in this or any other state that constitutes unprofessional conduct pursuant to the reporting requirements of Section 803.

(2) Any judgment or settlement requiring the licensee or his or her insurer to pay any amount of damages in excess of three thousand dollars ($3,000) for any claim that injury or death was proximately caused by the licensee's negligence, error or omission in practice, or by rendering unauthorized professional services, pursuant to the reporting requirements of Section 801 or 802.

(3) Any public complaints for which provision is made pursuant to subdivision (b).

(4) Disciplinary information reported pursuant to Section 805, including any additional exculpatory or explanatory statements submitted by the licentiate pursuant to subdivision (f) of Section 805. For purposes of this paragraph, “peer review” has the same meaning as defined in Section 805.

(5) Information reported pursuant to Section 805.01, including any explanatory or exculpatory information submitted by the licensee pursuant to subdivision (b) of that section.

(c)(1) The contents of any central file that are not public records under any other provision of law shall be confidential except that the licensee involved, or his or her counsel or representative, shall have the right to inspect and have copies made of his or her complete file except for the provision that may disclose the identity of an information source. For the purposes of this section, a board may protect an information source by providing a copy of the material with only those deletions necessary to protect the identity of the source or by providing a comprehensive summary of the substance of the material. Whichever method is used, the board shall ensure that full disclosure is made to the subject of any personal information that could reasonably in any way reflect or convey anything detrimental, disparaging, or threatening to a licensee’s reputation, rights, benefits, privileges, or qualifications, or be used by a board to make a determination that would affect a licensee’s rights, benefits, privileges, or qualifications. The information required to be disclosed pursuant to Section 803.1 shall not be considered among the contents of a central file for the purposes of this subdivision.

(2) The licensee may, but is not required to, submit any additional exculpatory or explanatory statement or other information that the board shall include in the central file.

(3) Each board may permit any law enforcement or regulatory agency when required for an investigation of unlawful activity or for licensing, certification, or regulatory purposes to inspect and have copies made of that licensee’s file, unless the disclosure is otherwise prohibited by law.

(4) These disclosures shall effect no change in the confidential status of these records.

This section shall only apply to a settlement on a policy of insurance executed or renewed on or after January 1, 1971.

§ 801.01. Report of settlement of arbitration award over a specified amount in case of alleged negligence, error, or omission in practice or the licensee’s rendering of unauthorized professional services; Procedure

The Legislature finds and declares that the filing of reports with the applicable state agencies required under this section is essential for the protection of the public. It is the intent of the Legislature that the reporting requirements set forth in this section be interpreted broadly in order to expand reporting obligations.

(a) A complete report shall be sent to the Medical Board of California, the Osteopathic Medical Board of California, the California Board of Podiatric Medicine, or the Physician Assistant Board with respect to a licensee of the board as to the following:

(1) A settlement over thirty thousand dollars ($30,000) or arbitration award of any amount or a civil judgment of any amount, whether or not vacated by a settlement after entry of the judgment, that was not reversed on appeal, of a claim or action for damages for death or personal injury caused by the licensee’s alleged negligence, error, or omission in practice, or by his or her rendering of unauthorized professional services.

(2) A settlement over thirty thousand dollars ($30,000), if the settlement is based on the licensee’s alleged negligence, error, or omission in practice, or on the licensee’s rendering of unauthorized professional services, and a party to the settlement is a corporation, medical group, partnership, or other corporate entity in which the licensee has an ownership interest or that employs or contracts with the licensee.

(b) The report shall be sent by the following:

(1) The insurer providing professional liability insurance to the licensee.

(2) The licensee, or his or her counsel, if the licensee does not possess professional liability insurance.

(3) A state or local governmental agency that self-insures the licensee. For purposes of this section, “state governmental agency” includes, but is not limited to, the University of California.

(c) The entity, person, or licensee obligated to report pursuant to subdivision (b) shall send the complete report if the judgment, settlement agreement, or arbitration award is entered against or paid by the employer of the licensee and not entered against or paid
by the licensee. “Employer,” as used in this paragraph, means a professional corporation, a group practice, a health care facility or clinic licensed or exempt from licensure under the Health and Safety Code, a licensed health care service plan, a medical care foundation, an educational institution, a professional institution, a professional school or college, a general law corporation, a public entity, or a nonprofit organization that employs, retains, or contracts with a licensee referred to in this section. Nothing in this paragraph shall be construed to authorize the employment of, or contracting with, any licensee in violation of Section 2400.

(d) The report shall be sent to the Medical Board of California, the Osteopathic Medical Board of California, the California Board of Podiatric Medicine, or the Physician Assistant Board as appropriate, within 30 days after the written settlement agreement has been reduced to writing and signed by all parties thereto, within 30 days after service of the arbitration award on the parties, or within 30 days after the date of entry of the civil judgment.

(e) The entity, person, or licensee required to report under subdivision (b) shall notify the claimant or his or her counsel, if he or she is represented by counsel, that the report has been sent to the Medical Board of California, the Osteopathic Medical Board of California, the California Board of Podiatric Medicine, or the Physician Assistant Board. If the claimant or his or her counsel has not received this notice within 45 days after the settlement was reduced to writing and signed by all of the parties or the arbitration award was served on the parties or the date of entry of the civil judgment, the claimant or the claimant’s counsel shall make the report to the appropriate board.

(f) Failure to substantially comply with this section is a public offense punishable by a fine of not less than five hundred dollars ($500) and not more than five thousand dollars ($5,000).

(g)(1) The Medical Board of California, the Osteopathic Medical Board of California, the California Board of Podiatric Medicine, and the Physician Assistant Board may develop a prescribed form for the report.

(2) The report shall be deemed complete only if it includes the following information:

(A) The name and last known business and residential addresses of every plaintiff or claimant involved in the matter, whether or not the person received an award under the settlement, arbitration, or judgment.

(B) The name and last known business and residential addresses of every licensee who was alleged to have acted improperly, whether or not that person was a named defendant in the action and whether or not that person was required to pay any damages pursuant to the settlement, arbitration award, or judgment.

(D) The name of the court in which the action or any part of the action was filed, and the date of filing and case number of each action.

(E) A description or summary of the facts of each claim, charge, or allegation, including the date of occurrence and the licensee’s role in the care or professional services provided to the patient with respect to those services at issue in the claim or action.

(G) The amount of the judgment, the date of its entry, and a copy of the judgment; the amount of the arbitration award, the date of its service on the parties, and a copy of the award document; or the amount of the settlement and the date it was reduced to writing and signed by all parties. If an otherwise reportable settlement is entered into after a reportable judgment or arbitration award is issued, the report shall include both the settlement and a copy of the judgment or award.

(H) The specialty or subspecialty of the licensee who was the subject of the claim or action.

(I) Any other information the Medical Board of California, the Osteopathic Medical Board of California, the California Board of Podiatric Medicine, or the Physician Assistant Board may, by regulation, require.
(3) Every professional liability insurer, self-insured governmental agency, or licensee or his or her counsel that makes a report under this section and has received a copy of any written or electronic patient medical or hospital records prepared by the treating physician and surgeon, podiatrist, or physician assistant, or the staff of the treating physician and surgeon, podiatrist, or hospital, describing the medical condition, history, care, or treatment of the person whose death or injury is the subject of the report, or a copy of any deposition in the matter that discusses the care, treatment, or medical condition of the person, shall include with the report, copies of the records and depositions, subject to reasonable costs to be paid by the Medical Board of California, the Osteopathic Medical Board of California, the California Board of Podiatric Medicine, or the Physician Assistant Board. If confidentiality is required by court order and, as a result, the reporter is unable to provide the records and depositions, documentation to that effect shall accompany the original report. The applicable board may, upon prior notice to the parties to the action, petition the appropriate court for modification of any protective order to permit disclosure to the board. A professional liability insurer, self-insured governmental agency, or licensee or his or her counsel shall maintain the records and depositions referred to in this paragraph for at least one year from the date of filing of the report required by this section.

(h) If the board, within 60 days of its receipt of a report filed under this section, notifies a person named in the report, that person shall maintain for the period of three years from the date of filing of the report any records he or she has as to the matter in question and shall make those records available upon request to the board to which the report was sent.

(i) Notwithstanding any other provision of law, no insurer shall enter into a settlement without the written consent of the insured, except that this prohibition shall not void any settlement entered into without that written consent. The requirement of written consent shall only be waived by both the insured and the insurer.

(j)(1) A state or local governmental agency that self-insures licensees shall, prior to sending a report pursuant to this section, do all of the following with respect to each licensee who will be identified in the report:

(A) Before deciding that a licensee will be identified, provide written notice to the licensee that the agency intends to submit a report in which the licensee may be identified, based on his or her role in the care or professional services provided to the patient that were at issue in the claim or action. This notice shall describe the reasons for notifying the licensee. The agency shall include with this notice a reasonable opportunity for the licensee to review a copy of records to be used by the agency in deciding whether to identify the licensee in the report.

(B) Provide the licensee with a reasonable opportunity to provide a written response to the agency and written materials in support of the licensee’s position. If the licensee is identified in the report, the agency shall include this response and materials in the report submitted to a board under this section if requested by the licensee.

(C) At least 10 days prior to the expiration of the 30-day reporting requirement under subdivision (d), provide the licensee with the opportunity to present arguments to the body that will make the final decision or to that body’s designee. The body shall review the care or professional services provided to the patient with respect to those services at issue in the claim or action and determine the licensee or licensees to be identified in the report and the amount of the settlement to be apportioned to the licensee.

(2) Nothing in this subdivision shall be construed to modify either the content of a report required under this section or the timeframe for filing that report.

(k) For purposes of this section, “licensee” means a licensee of the Medical Board of California, the Osteopathic Medical Board of California, the California Board of Podiatric Medicine, or the Physician Assistant Board.

A complete report shall be made by appropriate means by the person or his or her counsel, with a copy of the communication to be sent...
to the claimant through his or her counsel if he or she is so represented, or directly if he or she is not. If, within 45 days of the conclusion of the written settlement agreement or service of the judgment or arbitration award on the parties, counsel for the claimant (or if he or she is not represented by counsel, the claimant himself or herself) has not received a copy of the report, he or she shall himself or herself make a complete report. (b) Suspending the licentiate's right to practice.
(c) Placing the licentiate on probation.
(d) Taking such other action in relation to the licentiate as the licensing agency in its discretion deems proper.

The licensing agency shall not reinstate a revoked or suspended certificate or license until it has received competent evidence of the absence or control of the condition which caused its action and until it is satisfied that with due regard for the public health and safety the person's right to practice his or her profession may be safely reinstated.

§ 823. Reinstatement of licentiate
Notwithstanding any other provisions of law, reinstatement of a licentiate against whom action has been taken pursuant to Section 822 shall be governed by the procedures in this article. If no further proceedings are conducted to determine the licentiate’s fitness to practice during a period of five years from the date of the determination by the licensing agency of the proceeding pursuant to Section 820, then the licensing agency shall purge and destroy all records pertaining to the proceedings. If new proceedings are instituted during the five-year period against the licentiate by the licensing agency, the records, including the report of the physicians and surgeons or psychologists, may be used in the proceedings and shall be available to the respondent pursuant to the provisions of Section 11507.6 of the Government Code.

Particular Offenses

§ 17535. Obtaining injunctive relief

Any person, corporation, firm, partnership, joint stock company, or any other association or organization which violates or proposes to violate this chapter may be enjoined by any court of competent jurisdiction. The court may make such orders or judgments, including the appointment of a receiver, as may be necessary to prevent the use or employment by any person, corporation, firm, partnership, joint stock company, or any other association or organization of any practices which violate this chapter, or which may be necessary to restore to any person in interest any money or property, real or personal, which may have been acquired by means of any practice in this chapter declared to be unlawful.

Actions for injunction under this section may be prosecuted by the Attorney General or any district attorney, county counsel, city attorney, or city prosecutor in this state in the name of the people of the State of California upon their own complaint or upon the complaint of any board, officer, person, corporation or association or by any person who has suffered injury in fact and has lost money or property as a result of a violation of this chapter. Any person may pursue representative claims or relief on behalf of others only if the claimant meets the standing requirements of this section and complies with Section 382 of the Code of Civil Procedure, but these limitations do not apply to claims brought under this chapter by the Attorney General, or any district attorney, county counsel, city attorney, or city prosecutor in this state.

Added Stats 1941 ch 63 § 1. Amended Stats 1972 ch 244 § 1, ch 711 § 3; amendment approved by voters, Prop. 64 § 5, effective November 3, 2004.

§ 17535.5. Penalty for violating injunction; Proceedings; Disposition of proceeds

(a) Any person who intentionally violates any injunction issued pursuant to Section 17535 shall be liable for a civil penalty not to exceed six thousand dollars ($6,000) for each violation. Where the conduct constituting a violation is of a continuing nature, each day of such conduct is a separate and distinct violation. In determining the amount of the civil penalty, the court shall consider all relevant circumstances, including, but not limited to, the extent of harm caused by the conduct constituting a violation, the nature and persistence of such conduct, the length of time over which the conduct occurred, the assets, liabilities and net worth of the person, whether corporate or individual, and any corrective action taken by the defendant.

(b) The civil penalty prescribed by this section shall be assessed and recovered in a civil action brought in any county in which the violation occurs or where the injunction was issued in the name of the people of the State of California by the Attorney General or by any district attorney, county counsel, or city attorney in any court of competent jurisdiction within this jurisdiction without regard to the county from which the original injunction was issued. An action brought pursuant to this section to recover such civil penalties shall take special precedence over all civil matters on the calendar of the court except those matters to which equal precedence on the calendar is granted by law.
(c) If such an action is brought by the Attorney General, one-half of the penalty collected pursuant to this section shall be paid to the treasurer of the county in which the judgment was entered, and one-half to the State Treasurer. If brought by a district attorney or county counsel, the entire amount of the penalty collected shall be paid to the treasurer of the county in which the judgment is entered. If brought by a city attorney or city prosecutor, one-half of the penalty shall be paid to the treasurer of the county in which the judgment was entered and one-half to the city.

(d) If the action is brought at the request of a board within the Department of Consumer Affairs or a local consumer affairs agency, the court shall determine the reasonable expenses incurred by the board or local agency in the investigation and prosecution of the action.

Before any penalty collected is paid out pursuant to subdivision (c), the amount of such reasonable expenses incurred by the board shall be paid to the State Treasurer for deposit in the special fund of the board described in Section 205. If the board has no such special fund, the moneys shall be paid to the State Treasurer. The amount of such reasonable expenses incurred by a local consumer affairs agency shall be paid to the general fund of the municipality or county which funds the local agency.

§ 17536. Penalty for violations of chapter; Proceedings; Disposition of proceeds

(a) Any person who violates any provision of this chapter shall be liable for a civil penalty not to exceed two thousand five hundred dollars ($2,500) for each violation, which shall be assessed and recovered in a civil action brought in the name of the people of the State of California by the Attorney General or by any district attorney, county counsel, or city attorney in any court of competent jurisdiction.

(b) The court shall impose a civil penalty for each violation of this chapter. In assessing the amount of the civil penalty, the court shall consider any one or more of the relevant circumstances presented by any of the parties to the case, including, but not limited to, the following: the nature and seriousness of the misconduct, the number of violations, the persistence of the misconduct, the length of time over which the misconduct occurred, the willfulness of the defendant's misconduct, and the defendant's assets, liabilities, and net worth.

(c) If the action is brought by the Attorney General, one-half of the penalty collected shall be paid to the treasurer of the county in which the judgment was entered, and one-half to the State Treasurer.

If brought by a district attorney or county counsel, the entire amount of penalty collected shall be paid to the treasurer of the county in which the judgment was entered. If brought by a city attorney or city prosecutor, one-half of the penalty shall be paid to the treasurer of the county and one-half to the city. The aforementioned funds shall be for the exclusive use by the Attorney General, district attorney, county counsel, and city attorney for the enforcement of consumer protection laws.

(d) If the action is brought at the request of a board within the Department of Consumer Affairs or a local consumer affairs agency, the court shall determine the reasonable expenses incurred by the board or local agency in the investigation and prosecution of the action.

Before any penalty collected is paid out pursuant to subdivision (c), the amount of such reasonable expenses incurred by the board shall be paid to the State Treasurer for deposit in the special fund of the board described in Section 205. If the board has no such special fund, the moneys shall be paid to the State Treasurer. The amount of such reasonable expenses incurred by a local consumer affairs agency shall be paid to the general fund of the municipality or county which funds the local agency.

(e) As applied to the penalties for acts in violation of Section 17530, the remedies provided by this section and Section 17534 are mutually exclusive.

§ 17536.5. Notice of issue in action before appellate court

If a violation of this chapter is alleged or the application or construction of this chapter is in issue in any proceeding in the Supreme Court of California, a state court of appeal,
or the appellate division of a superior court, each person filing any brief or petition with the court in that proceeding shall serve, within three days of filing with the court, a copy of that brief or petition on the Attorney General, directed to the attention of the Consumer Law Section at a service address designated on the Attorney General's official Web site for service of papers under this section or, if no service address is designated, at the Attorney General's office in San Francisco, California, and on the district attorney of the county in which the lower court action or proceeding was originally filed. Upon the Attorney General's or district attorney's request, each person who has filed any other document, including all or a portion of the appellate record, with the court in addition to a brief or petition shall provide a copy of that document without charge to the Attorney General or the district attorney within five days of the request. The time for service may be extended by the Chief Justice or presiding justice or judge for good cause shown. No judgment or relief, temporary or permanent, shall be granted or opinion issued until proof of service of the petition or brief on the Attorney General and district attorney is filed with the court.

§ 1834.5. Abandonment of animal delivered to veterinarian

(a) Notwithstanding any other provision of law, whenever an animal is delivered to a veterinarian, dog kennel, cat kennel, pet-grooming parlor, animal hospital, or any other animal care facility pursuant to a written or oral agreement entered into after the effective date of this section, and the owner of the animal does not pick up the animal within 14 calendar days after the day the animal was initially due to be picked up, the animal shall be deemed to be abandoned. The person into whose custody the animal was placed for care shall first try for a period of not less than 10 days to find a new owner for the animal or turn the animal over to a public animal control agency or shelter, society for the prevention of cruelty to animals shelter, humane society shelter, or nonprofit animal rescue group, provided that the shelter or rescue group has been contacted and has agreed to take the animal. If unable to place the animal with a new owner, shelter, or rescue group, the animal care facility may have the abandoned animal euthanized.

(b) If an animal so abandoned was left with a veterinarian or with a facility that has a veterinarian, and a new owner cannot be found pursuant to this section, the veterinarian may euthanize the animal.

(c) Nothing in this section shall be construed to require an animal care facility or a veterinarian to euthanize an abandoned animal upon the expiration of the 10-day period described in subdivision (a).

(d) There shall be a notice posted in a conspicuous place, or in conspicuous type in a written receipt given, to warn a person depositing an animal at an animal care facility of the provisions of this section.

(e) An abandoned animal shall not be used for scientific or any other type of experimentation.

§ 1834.9. Use of alternative nonanimal test method by manufacturer and contract testing facility

(a) Manufacturers and contract testing facilities shall not use traditional animal test methods within this state for which an appropriate alternative test method has been scientifically validated and recommended by the Inter–Agency Coordinating Committee for the Validation of Alternative Methods (ICCVAM) and adopted by the relevant federal agency or agencies or program within an agency responsible for regulating the specific product or activity for which the test is being conducted.

(b) Nothing in this section shall prohibit the use of any alternative nonanimal test method for the testing of any product, product formulation, chemical, or ingredient that is not recommended by ICCVAM.

(c) Nothing in this section shall prohibit the use of animal tests to comply with requirements of state agencies. Nothing in this section shall prohibit the use of animal tests to comply with requirements of federal agencies when the federal agency has approved an alternative nonanimal test pursuant to subdivision (a) and the federal agency staff concludes that the alternative nonanimal test does not assure the health or safety of consumers.

(d) Notwithstanding any other provision of law, the exclusive remedy for enforcing this section shall be a civil action for injunctive relief brought by the Attorney General, the district attorney of the county in which the violation is alleged to have occurred, or a city attorney of a city or a city and county having a population in excess of 750,000 and in which the violation is alleged to have occurred. If the court determines that the Attorney General or district attorney is the prevailing party in the enforcement action, the official may also recover costs, attorney fees, and a civil penalty not to exceed five thousand dollars ($5,000) in that action.

(e) This section shall not apply to any animal test performed for the purpose of medical research.

(f) For the purposes of this section, these terms have the following meanings:

(6) “Traditional animal test method” means a process or procedure using animals to obtain information on the characteristics of a chemical or agent. Toxicological test methods generate information regarding the ability of a chemical or agent to produce a specific biological effect under specified conditions.

CHAPTER 6.7
Livestock Service Lien

§ 3080. Definitions
As used in this chapter, the following definitions shall apply:
(a) “Livestock” means any cattle, sheep, swine, goat, or horse, mule, or other equine.
(b) “Livestock servicer” means any individual, corporation, partnership, joint venture, cooperative, association or any other organization or entity which provides livestock services.
(c) “Livestock services” means any and all grazing, feeding, boarding, general care, which includes animal health services, obtained or provided by the livestock servicer, or his employee, transportation or other services rendered by a person to livestock for the owner of livestock, or for any person acting by or under the owner’s authority.

Added Stats 1979 ch 600 § 2.

§ 3080.01. General lien
A livestock servicer shall have a general lien upon the livestock in its possession to secure the performance of all obligations of the owner of the livestock to the livestock servicer for both of the following:
(a) The provision of livestock services to the livestock in possession of the livestock servicer.
(b) The provision of livestock services to other livestock for which livestock services were provided in connection with or as part of the same livestock service transaction, if such livestock services were provided within the immediately preceding 12 months prior to the date upon which the lien arose. The lien shall have priority over all other liens upon and security interests in the livestock, shall arise as the charges for livestock services become due, and shall be dependent upon possession. The lien shall secure the owner’s contractual obligations to the lienholder for the provision of livestock services, the lienholder’s reasonable charges for the provision of livestock services after the lien has arisen as set forth in Section 3080.02, and the lienholder’s costs of lien enforcement, including attorney’s fees.

Added Stats 1979 ch 600 § 2.

§ 3080.02. Rights of lienholder
In addition to any other rights and remedies provided by law, a lienholder may:
(a) Retain possession of the livestock and charge the owner for the reasonable value of providing livestock services to the livestock until the owner’s obligations secured by the lien have been satisfied.
(b) Proceed to sell all or any portion of the livestock pursuant to Section 3080.16 if:
(1) A judicial order authorizing sale has been entered pursuant to Section 3080.06;
(2) A judgment authorizing sale has been entered in favor of the lienholder on the claim which gives rise to the lien; or
(3) The owner of the livestock has released, after the lien has arisen, its interest in the livestock in the form prescribed by Section 3080.20.

(c) A lienholder may commence a legal action on its claim against the owner of the livestock or any other person indebted to the lienholder for services to the livestock and reduce the claim to judgment. When the lienholder has reduced the claim to judgment, any lien or levy or other form of enforcement which may be made upon the livestock by virtue of any execution based upon the judgment shall relate back to the attachment of and have the same priority as the livestock service lien. The lienholder may purchase at a judicial sale held pursuant to the execution on the judgment and thereafter hold the livestock free of any liens upon or security interests in the livestock.

§ 3080.03. Application for order authorizing sale of livestock

Upon the filing of the complaint, or at any time thereafter prior to judgment, the lienholder may apply to the court in which the action was commenced for an order authorizing sale of livestock.

(a) The application shall include all of the following:
(1) A statement showing that the sale is sought pursuant to this chapter to enforce a livestock service lien;
(2) A statement of the amount the lienholder seeks to recover from the defendant and the date that amount became due;
(3) A statement setting forth the reasons why a sale should be held prior to judgment;
(4) A description of the livestock to be sold and an estimate of the fair market value thereof; and
(5) A statement of the manner in which the lienholder intends to sell the livestock. The statement shall include, but not be limited to, whether the sale will be public or private, the amount of proceeds expected from the sale, and why the sale, if authorized, would conform to the standard of commercial reasonableness set forth in Section 3080.16.

(b) The application shall be supported by an affidavit or affidavits showing that on the facts presented therein the lienholder would be entitled to a judgment on the claim upon which the action is brought.

(c) A hearing shall be held in the court in which the lienholder has brought the action before an order authorizing sale is issued under this chapter. Except as provided in Section 3080.15, or as ordered by the court upon good cause shown, the defendant shall be served with a copy of all of the following at least 10 days prior to the date set for hearing:
(1) A summons and complaint;
(2) A notice of application and hearing; and
(3) An application and all affidavits filed in support thereof.

   (2) “Board” means an entity specified in Section 101 of the Business and Professions Code, the entities referred to in Sections 1000 and 3600 of the Business and Professions Code, the State Bar, the Bureau of Real Estate, the Department of Motor Vehicles, the Secretary of State, the Department of Fish and Wildlife, and any other state commission, department, committee, examiner, or agency that issues a license, certificate, credential, permit, registration, or any other authorization to engage in a business, occupation, or profession, or to the extent required by federal law or regulations, for recreational purposes. This term includes all boards, commissions, departments, committees, examiners, entities, and agencies that issue a license, certificate, credential, permit, registration, or any other authorization to engage in a business, occupation, or profession. The failure to specifically name a particular board, commission, department, committee, examiner, entity, or agency that issues a license, certificate, credential, permit, registration, or any other authorization to engage in a business, occupation, or profession does not exclude that board, commission, department, committee, examiner, entity, or agency from this term.
   (3) “Certified list” means a list provided by the local child support agency to the Department of Child Support Services in which the local child support agency verifies, under penalty of perjury, that the names contained therein are support obligors found to be out of compliance with a judgment or order for support in a case being enforced under Title IV-D of the federal Social Security Act.
   (4) “Compliance with a judgment or order for support” means that, as set forth in a judgment or order for child or family support, the obligor is no more than 30 calendar days in arrears in making payments in full for current support, in making periodic payments in full, whether court ordered or by agreement with the local child support agency, on a support arrearage, or in making periodic payments in full, whether court ordered or by agreement with the local child support agency, on a judgment for reimbursement for public assistance, or has obtained a judicial finding that equitable estoppel as provided in statute or case law precludes enforcement of the order. The local child support agency is authorized to use this section to enforce orders for spousal support only when the local child support agency is also enforcing a related child support obligation owed to the obligee parent by the same obligor, pursuant to Sections 17400 and 17604.
§ 17520 FAMILY CODE 250

(5) “License” includes membership in the State Bar, and a certificate, credential, permit, registration, or any other authorization issued by a board that allows a person to engage in a business, occupation, or profession, or to operate a commercial motor vehicle, including appointment and commission by the Secretary of State as a notary public. “License” also includes any driver’s license issued by the Department of Motor Vehicles, any commercial fishing license issued by the Department of Fish and Wildlife, and to the extent required by federal law or regulations, any license used for recreational purposes. This term includes all licenses, certificates, credentials, permits, registrations, or any other authorization issued by a board that allows a person to engage in a business, occupation, or profession. The failure to specifically name a particular type of license, certificate, credential, permit, registration, or other authorization issued by a board that allows a person to engage in a business, occupation, or profession, does not exclude that license, certificate, credential, permit, registration, or other authorization from this term.

(6) “Licensee” means a person holding a license, certificate, credential, permit, registration, or other authorization issued by a board, to engage in a business, occupation, or profession, or a commercial driver’s license as defined in Section 15210 of the Vehicle Code, including an appointment and commission by the Secretary of State as a notary public. “Licensee” also means a person holding a driver’s license issued by the Department of Motor Vehicles, a person holding a commercial fishing license issued by the Department of Fish and Game, and to the extent required by federal law or regulations, a person holding a license used for recreational purposes. This term includes all persons holding a license, certificate, credential, permit, registration, or any other authorization to engage in a business, occupation, or profession, and the failure to specifically name a particular type of license, certificate, credential, permit, registration, or other authorization issued by a board does not exclude that person from this term. For licenses issued to an entity that is not an individual person, “licensee” includes an individual who is either listed on the license or who qualifies for the license.

(b) The local child support agency shall maintain a list of those persons included in a case being enforced under Title IV-D of the federal Social Security Act against whom a support order or judgment has been rendered by, or registered in, a court of this state, and who are not in compliance with that order or judgment. The local child support agency shall submit a certified list with the names, social security numbers, and last known addresses of these persons and the name, address, and telephone number of the local child support agency who certified the list to the department. The local child support agency shall verify, under penalty of perjury, that the persons listed are subject to an order or judgment for the payment of support and that these persons are not in compliance with the order or judgment. The local child support agency shall submit to the department an updated certified list on a monthly basis.

(c) The department shall consolidate the certified lists received from the local child support agencies and, within 30 calendar days of receipt, shall provide a copy of the consolidated list to each board that is responsible for the regulation of licenses, as specified in this section.

(d) On or before November 1, 1992, or as soon thereafter as economically feasible, as determined by the department, all boards subject to this section shall implement procedures to accept and process the list provided by the department, in accordance with this section. Notwithstanding any other law, all boards shall collect social security numbers or individual taxpayer identification numbers from all applicants for the purposes of matching the names of the certified list provided by the department to applicants and licensees and of responding to requests for this information made by child support agencies.

(e)(1) Promptly after receiving the certified consolidated list from the department, and prior to the issuance or renewal of a license, each board shall determine whether the applicant is on the most recent certified consolidated list provided by the department. The board shall have the authority to withhold issuance or renewal of the license of an applicant on the list.

(2) If an applicant is on the list, the board shall immediately serve notice as specified in subdivision (f) on the applicant of the board’s intent to withhold issuance or renewal
of the license. The notice shall be made personally or by mail to the applicant’s last known mailing address on file with the board. Service by mail shall be complete in accordance with Section 1013 of the Code of Civil Procedure.

(A) The board shall issue a temporary license valid for a period of 150 days to any applicant whose name is on the certified list if the applicant is otherwise eligible for a license.

(B) Except as provided in subparagraph (D), the 150-day time period for a temporary license shall not be extended. Except as provided in subparagraph (D), only one temporary license shall be issued during a regular license term and it shall coincide with the first 150 days of that license term. As this paragraph applies to commercial driver's licenses, "license term" shall be deemed to be 12 months from the date the application fee is received by the Department of Motor Vehicles. A license for the full or remainder of the license term shall be issued or renewed only upon compliance with this section.

(C) In the event that a license or application for a license or the renewal of a license is denied pursuant to this section, any funds paid by the applicant or licensee shall not be refunded by the board.

(D) This paragraph shall apply only in the case of a driver's license, other than a commercial driver’s license. Upon the request of the local child support agency or by order of the court upon a showing of good cause, the board shall extend a 150-day temporary license for a period not to exceed 150 extra days.

(3)(A) The department may, when it is economically feasible for the department and the boards to do so as determined by the department, in cases where the department is aware that certain child support obligors listed on the certified lists have been out of compliance with a judgment or order for support for more than four months, provide a supplemental list of these obligors to each board with which the department has an interagency agreement to implement this paragraph. Upon request by the department, the licenses of these obligors shall be subject to suspension, provided that the licenses would not otherwise be eligible for renewal within six months from the date of the request by the department. The board shall have the authority to suspend the license of any licensee on this supplemental list.

(B) If a licensee is on a supplemental list, the board shall immediately serve notice as specified in subdivision (f) on the licensee that his or her license will be automatically suspended 150 days after notice is served, unless compliance with this section is achieved. The notice shall be made personally or by mail to the licensee's last known mailing address on file with the board. Service by mail shall be complete in accordance with Section 1013 of the Code of Civil Procedure.

(C) The 150-day notice period shall not be extended.

(D) In the event that any license is suspended pursuant to this section, any funds paid by the licensee shall not be refunded by the board.

(E) This paragraph shall not apply to licenses subject to annual renewal or annual fee.

(f) Notices shall be developed by each board in accordance with guidelines provided by the department and subject to approval by the department. The notice shall include the address and telephone number of the local child support agency that submitted the name on the certified list, and shall emphasize the necessity of obtaining a release from that local child support agency as a condition for the issuance, renewal, or continued valid status of a license or licenses.

(1) In the case of applicants not subject to paragraph (3) of subdivision (e), the notice shall inform the applicant that the board shall issue a temporary license, as provided in subparagraph (A) of paragraph (2) of subdivision (e), for 150 calendar days if the applicant is otherwise eligible and that upon expiration of that time period the license will be denied unless the board has received a release from the local child support agency that submitted the name on the certified list.

(2) In the case of licensees named on a supplemental list, the notice shall inform the licensee that his or her license will continue in its existing status for no more than 150 calendar days from the date of mailing or service of the notice and thereafter will be suspended indefinitely unless, during the 150-day notice period, the board has received a release from the local child support agency that submitted the name on the certified list.
list. Additionally, the notice shall inform the licensee that any license suspended under this section will remain so until the expiration of the remaining license term, unless the board receives a release along with applications and fees, if applicable, to reinstate the license during the license term.

(3) The notice shall also inform the applicant or licensee that if an application is denied or a license is suspended pursuant to this section, any funds paid by the applicant or licensee shall not be refunded by the board. The Department of Child Support Services shall also develop a form that the applicant shall use to request a review by the local child support agency. A copy of this form shall be included with every notice sent pursuant to this subdivision.

(g)(1) Each local child support agency shall maintain review procedures consistent with this section to allow an applicant to have the underlying arrearage and any relevant defenses investigated, to provide an applicant information on the process of obtaining a modification of a support order, or to provide an applicant assistance in the establishment of a payment schedule on arrearages if the circumstances so warrant.

(2) It is the intent of the Legislature that a court or local child support agency, when determining an appropriate payment schedule for arrearages, base its decision on the facts of the particular case and the priority of payment of child support over other debts. The payment schedule shall also recognize that certain expenses may be essential to enable an obligor to be employed. Therefore, in reaching its decision, the court or the local child support agency shall consider both of these goals in setting a payment schedule for arrearages.

(h) If the applicant wishes to challenge the submission of his or her name on the certified list, the applicant shall make a timely written request for review to the local child support agency who certified the applicant's name. A request for review pursuant to this section shall be resolved in the same manner and timeframe provided for resolution of a complaint pursuant to Section 17800. The local child support agency shall immediately send a release to the appropriate board and the applicant, if any of the following conditions are met:

(1) The applicant is found to be in compliance or negotiates an agreement with the local child support agency for a payment schedule on arrearages or reimbursement.

(2) The applicant has submitted a request for review, but the local child support agency will be unable to complete the review within the time specified in Section 17800.

(3) The applicant has filed and served a request for judicial review pursuant to this section, but a resolution of that review will not be made within 150 days of the date of service of notice pursuant to subdivision (f). This paragraph applies only if the delay in completing the judicial review process is not the result of the applicant's failure to act in a reasonable, timely, and diligent manner upon receiving the local child support agency's notice of findings.

(4) The applicant has obtained a judicial finding of compliance as defined in this section.

(i) An applicant is required to act with diligence in responding to notices from the board and the local child support agency with the recognition that the temporary license will lapse or the license suspension will go into effect after 150 days and that the local child support agency and, where appropriate, the court must have time to act within that period. An applicant's delay in acting, without good cause, which directly results in the inability of the local child support agency to complete a review of the applicant's request or the court to hear the request for judicial review within the 150-day period shall not constitute the diligence required under this section which would justify the issuance of a release.

(j) Except as otherwise provided in this section, the local child support agency shall not issue a release if the applicant is not in compliance with the judgment or order for support. The local child support agency shall notify the applicant in writing that the applicant may, by filing an order to show cause or notice of motion, request any or all of the following:

(1) Judicial review of the local child support agency's decision not to issue a release.
A judicial determination of compliance.

(3) A modification of the support judgment or order.

The notice shall also contain the name and address of the court in which the applicant shall file the order to show cause or notice of motion and inform the applicant that his or her name shall remain on the certified list if the applicant does not timely request judicial review. The applicant shall comply with all statutes and rules of court regarding orders to show cause and notices of motion.

This section shall not be deemed to limit an applicant from filing an order to show cause or notice of motion to modify a support judgment or order or to fix a payment schedule on arrearages accruing under a support judgment or order or to obtain a court finding of compliance with a judgment or order for support.

(k) The request for judicial review of the local child support agency's decision shall state the grounds for which review is requested and judicial review shall be limited to those stated grounds. The court shall hold an evidentiary hearing within 20 calendar days of the filing of the request for review. Judicial review of the local child support agency's decision shall be limited to a determination of each of the following issues:

(1) Whether there is a support judgment, order, or payment schedule on arrearages or reimbursement.

(2) Whether the petitioner is the obligor covered by the support judgment or order.

(3) Whether the support obligor is or is not in compliance with the judgment or order of support.

(4)(A) The extent to which the needs of the obligor, taking into account the obligor's payment history and the current circumstances of both the obligor and the obligee, warrant a conditional release as described in this subdivision.

(B) The request for judicial review shall be served by the applicant upon the local child support agency that submitted the applicant's name on the certified list within seven calendar days of the filing of the petition. The court has the authority to uphold the action, unconditionally release the license, or conditionally release the license.

(C) If the judicial review results in a finding by the court that the obligor is in compliance with the judgment or order for support, the local child support agency shall immediately send a release in accordance with subdivision (l) to the appropriate board and the applicant. If the judicial review results in a finding by the court that the needs of the obligor warrant a conditional release, the court shall make findings of fact stating the basis for the release and the payment necessary to satisfy the unrestricted issuance or renewal of the license without prejudice to a later judicial determination of the amount of support arrearages, including interest, and shall specify payment terms, compliance with which are necessary to allow the release to remain in effect.

(l) The department shall prescribe release forms for use by local child support agencies. When the obligor is in compliance, the local child support agency shall mail to the applicant and the appropriate board a release stating that the applicant is in compliance. The receipt of a release shall serve to notify the applicant and the board that, for the purposes of this section, the applicant is in compliance with the judgment or order for support. The department may, when it is economically feasible for the department and the boards to develop an automated process for complying with this subdivision, notify the boards in a manner prescribed by the department, that the obligor is once again not in compliance. Upon receipt of this notice, the board shall immediately notify the obligor on a form prescribed by the department that the obligor's license will be suspended on a specific date, and this date shall be no longer than 30 days from the date the form is mailed. The obligor shall be further notified that the license will remain suspended until
a new release is issued in accordance with subdivision (h). Nothing in this section shall be deemed to limit the obligor from seeking judicial review of suspension pursuant to the procedures described in subdivision (k).

(m) The department may enter into interagency agreements with the state agencies that have responsibility for the administration of boards necessary to implement this section, to the extent that it is cost effective to implement this section. These agreements shall provide for the receipt by the other state agencies and boards of federal funds to cover that portion of costs allowable in federal law and regulation and incurred by the state agencies and boards in implementing this section. Notwithstanding any other provision of law, revenue generated by a board or state agency shall be used to fund the nonfederal share of costs incurred pursuant to this section. These agreements shall provide that boards shall reimburse the department for the nonfederal share of costs incurred by the department in implementing this section. The boards shall reimburse the department for the nonfederal share of costs incurred pursuant to this section from moneys collected from applicants and licensees.

(n) Notwithstanding any other law, in order for the boards subject to this section to be reimbursed for the costs incurred in administering its provisions, the boards may, with the approval of the appropriate department director, levy on all licensees and applicants a surcharge on any fee or fees collected pursuant to law, or, alternatively, with the approval of the appropriate department director, levy on the applicants or licensees named on a certified list or supplemental list, a special fee.

(o) The process described in subdivision (h) shall constitute the sole administrative remedy for contesting the issuance of a temporary license or the denial or suspension of a license under this section. The procedures specified in the administrative adjudication provisions of the Administrative Procedure Act (Chapter 4.5 (commencing with Section 11400) and Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code) shall not apply to the denial, suspension, or failure to issue or renew a license or the issuance of a temporary license pursuant to this section.

(p) In furtherance of the public policy of increasing child support enforcement and collections, on or before November 1, 1995, the State Department of Social Services shall make a report to the Legislature and the Governor based on data collected by the boards and the district attorneys in a format prescribed by the State Department of Social Services. The report shall contain all of the following:

1. The number of delinquent obligors certified by district attorneys under this section.
2. The number of support obligors who also were applicants or licensees subject to this section.
3. The number of new licenses and renewals that were delayed, temporary licenses issued, and licenses suspended subject to this section and the number of new licenses and renewals granted and licenses reinstated following board receipt of releases as provided by subdivision (h) by May 1, 1995.
4. The costs incurred in the implementation and enforcement of this section.

(q) Any board receiving an inquiry as to the licensed status of an applicant or licensee who has had a license denied or suspended under this section or has been granted a temporary license under this section shall respond only that the license was denied or suspended or the temporary license was issued pursuant to this section. Information collected pursuant to this section by any state agency, board, or department shall be subject to the Information Practices Act of 1977 (Chapter 1 (commencing with Section 1798) of Title 1.8 of Part 4 of Division 3 of the Civil Code).

(r) Any rules and regulations issued pursuant to this section by any state agency, board, or department may be adopted as emergency regulations in accordance with the rulemaking provisions of the Administrative Procedure Act (Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code). The adoption of these regulations shall be deemed an emergency and necessary for the immediate preservation of the public peace, health, and safety, or general welfare. The regulations shall become effective immediately upon filing with the Secretary of State.

(s) The department and boards, as appropriate, shall adopt regulations necessary to implement this section.
(t) The Judicial Council shall develop the forms necessary to implement this section, except as provided in subdivisions (f) and (j).
(u) The release or other use of information received by a board pursuant to this section, except as authorized by this section, is punishable as a misdemeanor.
(v) The State Board of Equalization shall enter into interagency agreements with the department and the Franchise Tax Board that will require the department and the Franchise Tax Board to maximize the use of information collected by the State Board of Equalization, for child support enforcement purposes, to the extent it is cost effective and permitted by the Revenue and Taxation Code.
(w)(1) The suspension or revocation of any driver's license, including a commercial driver's license, under this section shall not subject the licensee to vehicle impoundment pursuant to Section 14602.6 of the Vehicle Code.
(2) Notwithstanding any other law, the suspension or revocation of any driver's license, including a commercial driver's license, under this section shall not subject the licensee to increased costs for vehicle liability insurance.
(x) If any provision of this section or the application thereof to any person or circumstance is held invalid, that invalidity shall not affect other provisions or applications of this section which can be given effect without the invalid provision or application, and to this end the provisions of this section are severable.
(y) All rights to administrative and judicial review afforded by this section to an applicant shall also be afforded to a licensee.

§ 6253. Time for inspection of public records; “Unusual circumstances”; Posting of public record on Web site

(a) Public records are open to inspection at all times during the office hours of the state or local agency and every person has a right to inspect any public record, except as hereafter provided. Any reasonably segregable portion of a record shall be available for inspection by any person requesting the record after deletion of the portions that are exempted by law.

(b) Except with respect to public records exempt from disclosure by express provisions of law, each state or local agency, upon a request for a copy of records that reasonably describes an identifiable record or records, shall make the records promptly available to any person upon payment of fees covering direct costs of duplication, or a statutory fee if applicable. Upon request, an exact copy shall be provided unless impracticable to do so.

(c) Each agency, upon a request for a copy of records, shall, within 10 days from receipt of the request, determine whether the request, in whole or in part, seeks copies of disclosable public records in the possession of the agency and shall promptly notify the person making the request of the determination and the reasons therefor. In unusual circumstances, the time limit prescribed in this section may be extended by written notice by the head of the agency or his or her designee to the person making the request, setting forth the reasons for the extension and the date on which a determination is expected to be dispatched. No notice shall specify a date that would result in an extension for more than 14 days. When the agency dispatches the determination, and if the agency determines that the request seeks disclosable public records, the agency shall state the estimated date and time when the records will be made available. As used in this section, “unusual circumstances” means the following, but only to the extent reasonably necessary to the proper processing of the particular request:

(1) The need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request.

(2) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records that are demanded in a single request.

(3) The need for consultation, which shall be conducted with all practicable speed, with another agency having substantial interest in the determination of the request or among two or more components of the agency having substantial subject matter interest therein.
(4) The need to compile data, to write programming language or a computer program, or to construct a computer report to extract data.

(d) Nothing in this chapter shall be construed to permit an agency to delay or obstruct the inspection or copying of public records. The notification of denial of any request for records required by Section 6255 shall set forth the names and titles or positions of each person responsible for the denial.

(e) Except as otherwise prohibited by law, a state or local agency may adopt requirements for itself that allow for faster, more efficient, or greater access to records than prescribed by the minimum standards set forth in this chapter.

(f) In addition to maintaining public records for public inspection during the office hours of the public agency, a public agency may comply with subdivision (a) by posting any public record on its Internet Web site and, in response to a request for a public record posted on the Internet Web site, directing a member of the public to the location on the Internet Web site where the public record is posted. However, if after the public agency directs a member of the public to the Internet Web site, the member of the public requesting the public record requests a copy of the public record due to an inability to access or reproduce the public record from the Internet Web site, the public agency shall promptly provide a copy of the public record pursuant to subdivision (b).

§ 6253.1. Agency to assist in inspection of public record

(a) When a member of the public requests to inspect a public record or obtain a copy of a public record, the public agency, in order to assist the member of the public make a focused and effective request that reasonably describes an identifiable record or records, shall do all of the following, to the extent reasonable under the circumstances:

(2) Describe the information technology and physical location in which the records exist.

(3) Provide suggestions for overcoming any practical basis for denying access to the records or information sought.

(b) The requirements of paragraph (1) of subdivision (a) shall be deemed to have been satisfied if the public agency is unable to identify the requested information after making a reasonable effort to elicit additional clarifying information from the requester that will help identify the record or records.

(c) The requirements of subdivision (a) are in addition to any action required of a public agency by Section 6253.

(d) This section shall not apply to a request for public records if any of the following applies:

(1) The public agency makes available the requested records pursuant to Section 6253.

(2) The public agency determines that the request should be denied and bases that determination solely on an exemption listed in Section 6254.

(3) The public agency makes available an index of its records.

§ 6254. Records exempt from disclosure requirements

Except as provided in Sections 6254.7 and 6254.13, this chapter does not require the disclosure of any of the following records:

(a) Preliminary drafts, notes, or interagency or intra-agency memoranda that are not retained by the public agency in the ordinary course of business, if the public interest in withholding those records clearly outweighs the public interest in disclosure.

(b) Records pertaining to pending litigation to which the public agency is a party, or to claims made pursuant to Division 3.6 (commencing with Section 810), until the pending litigation or claim has been finally adjudicated or otherwise settled.

(c) Personnel, medical, or similar files, the disclosure of which would constitute an unwarranted invasion of personal privacy.

(d) Records contained in or related to any of the following:
Applications filed with any state agency responsible for the regulation or supervision of the issuance of securities or of financial institutions, including, but not limited to, banks, savings and loan associations, industrial loan companies, credit unions, and insurance companies.

Examination, operating, or condition reports prepared by, on behalf of, or for the use of, any state agency referred to in paragraph (1).

Information received in confidence by any state agency referred to in paragraph (1).

(e) Geological and geophysical data, plant production data, and similar information relating to utility systems development, or market or crop reports, that are obtained in confidence from any person.

(f) Records of complaints to, or investigations conducted by, or records of intelligence information or security procedures of, the office of the Attorney General and the Department of Justice, the Office of Emergency Services and any state or local police agency, or any investigatory or security files compiled by any other state or local police agency, or any investigatory or security files compiled by any other state or local agency for correctional, law enforcement, or licensing purposes. However, state and local law enforcement agencies shall disclose the names and addresses of persons involved in, or witnesses other than confidential informants to, the incident, the description of any property involved, the date, time, and location of the incident, all diagrams, statements of the parties involved in the incident, the statements of all witnesses, other than confidential informants, to the victims of an incident, or an authorized representative thereof, an insurance carrier against which a claim has been or might be made, and any person suffering bodily injury or property damage or loss, as a result of the incident caused by arson, burglary, fire, explosion, larceny, robbery, carjacking, vandalism, vehicle theft, or a crime as defined by subdivision (b) of Section 13951, unless the disclosure would endanger the safety of a witness or other person involved in the investigation, or unless disclosure would endanger the successful completion of the investigation or a related investigation. However, this subdivision does not require the disclosure of that portion of those investigative files that reflects the analysis or conclusions of the investigating officer.

Customer lists provided to a state or local police agency by an alarm or security company at the request of the agency shall be construed to be records subject to this subdivision.

Notwithstanding any other provision of this subdivision, state and local law enforcement agencies shall make public the following information, except to the extent that disclosure of a particular item of information would endanger the safety of a person involved in an investigation or would endanger the successful completion of the investigation or a related investigation:

(1) The full name and occupation of every individual arrested by the agency, the individual’s physical description including date of birth, color of eyes and hair, sex, height and weight, the time and date of arrest, the time and date of booking, the location of the arrest, the factual circumstances surrounding the arrest, the amount of bail set, the time and manner of release or the location where the individual is currently being held, and all charges the individual is being held upon, including any outstanding warrants from other jurisdictions and parole or probation holds.

(A) Subject to the restrictions imposed by Section 841.5 of the Penal Code, the time, substance, and location of all complaints or requests for assistance received by the agency and the time and nature of the response thereto, including, to the extent the information regarding crimes alleged or committed or any other incident investigated is recorded, the time, date, and location of occurrence, the time and date of the report, the name and age of the victim, the factual circumstances surrounding the crime or incident, and a general description of any injuries, property, or weapons involved. The name of a victim of any crime defined by Section 220, 261, 261.5, 262, 264, 264.1, 265, 266, 266a, 266b, 266c, 266e, 266f, 266j, 267, 269, 273a, 273d, 273.5, 285, 286, 288, 288a, 288.2, \"GENERAL LAWS\" 6254

GOVERNMENT CODE 260
Section 6254

(3) Subject to the restrictions of Section 841.5 of the Penal Code and this subdivision, the current address of every individual arrested by the agency and the current address of the victim of a crime, if the requester declares under penalty of perjury that the request is made for a scholarly, journalistic, political, or governmental purpose, or that the request is made for investigation purposes by a licensed private investigator as described in Chapter 11.3 (commencing with Section 7512) of Division 3 of the Business and Professions Code. However, the address of the victim of any crime defined by Section 220, 236.1, 261, 261.5, 262, 264, 264.1, 265, 266, 266a, 266b, 266c, 266e, 266f, 266j, 267, 269, 273a, 273d, 273.5, 285, 286, 288, 288a, 288.2, 288.3, 288.4, 288.5, 288.7, 289, 422.6, 422.7, 422.75, 646.9, or 647.6 of the Penal Code shall remain confidential. Address information obtained pursuant to this paragraph shall not be used directly or indirectly, or furnished to another, to sell a product or service to any individual or group of individuals, and the requester shall execute a declaration to that effect under penalty of perjury. This paragraph shall not be construed to prohibit or limit a scholarly, journalistic, political, or government use of address information obtained pursuant to this paragraph.

(g) Test questions, scoring keys, and other examination data used to administer a licensing examination, examination for employment, or academic examination, except as provided for in Chapter 3 (commencing with Section 99150) of Part 65 of Division 14 of Title 3 of the Education Code.

The exemption in this subdivision shall not apply to records of fines imposed on the borrowers.

(k) Records, the disclosure of which is exempted or prohibited pursuant to federal or state law, including, but not limited to, provisions of the Evidence Code relating to privilege.

(l) Correspondence of and to the Governor or employees of the Governor’s office or in the custody of or maintained by the Governor’s Legal Affairs Secretary. However, public records shall not be transferred to the custody of the Governor’s Legal Affairs Secretary to evade the disclosure provisions of this chapter.

CHAPTER 1
State Agencies

ARTICLE 9
Meetings

§ 11120. Legislative finding and declaration; Open proceedings; Citation of article

It is the public policy of this state that public agencies exist to aid in the conduct of the people's business and the proceedings of public agencies be conducted openly so that the public may remain informed.

273
In enacting this article the Legislature finds and declares that it is the intent of the law that actions of state agencies be taken openly and that their deliberation be conducted openly.

The people of this state do not yield their sovereignty to the agencies which serve them. The people, in delegating authority, do not give their public servants the right to decide what is good for the people to know and what is not good for them to know. The people insist on remaining informed so that they may retain control over the instruments they have created.

This article shall be known and may be cited as the Bagley-Keene Open Meeting Act.

§ 11121. “State body”

As used in this article, “state body” means each of the following:

(c) An advisory board, advisory commission, advisory committee, advisory subcommittee, or similar multimember advisory body of a state body, if created by formal action of the state body or of any member of the state body, and if the advisory body so created consists of three or more persons.

§ 11126.1. Minute book of closed session

The state body shall designate a clerk or other officer or employee of the state body, who shall then attend each closed session of the state body and keep and enter in a minute book a record of topics discussed and decisions made at the meeting. The minute book made pursuant to this section is not a public record subject to inspection pursuant to the California Public Records Act (Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1), and shall be kept confidential. The minute book shall be available to members of the state body or, if a violation of this chapter is alleged to have occurred at a closed session, to a court of general jurisdiction. Such minute book may, but need not, consist of a recording of the closed session.

§ 11126.3. Disclosure of items to be discussed in closed session; Discussion of additional pending litigation matters arising after disclosure

(a) Prior to holding any closed session, the state body shall disclose, in an open meeting, the general nature of the item or items to be discussed in the closed session. The disclosure may take the form of a reference to the item or items as they are listed by number or letter on the agenda. If the session is closed pursuant to paragraph (2) of subdivision (d) of Section 11126, the state body shall state the title of, or otherwise specifically identify, the proceeding or disciplinary action contemplated. However, should the body determine that to do so would jeopardize the body's ability to effectuate service of process upon one or more unserved parties if the proceeding or disciplinary action is commenced or that to do so would fail to protect the private economic and business reputation of the person or entity if the proceeding or disciplinary action is not commenced, then the state body shall notice that there will be a closed session and describe in general terms the purpose of that session. If the session is closed pursuant to
subparagraph (A) of paragraph (2) of subdivision (e) of Section 11126, the state body shall
state the title of, or otherwise specifically identify, the litigation to be discussed unless
the body states that to do so would jeopardize the body's ability to effectuate service of
process upon one or more unserved parties, or that to do so would jeopardize its ability
to conclude existing settlement negotiations to its advantage.
(b) In the closed session, the state body may consider only those matters covered in
its disclosure.
(c) The disclosure shall be made as part of the notice provided for the meeting
pursuant to Section 11125 or pursuant to subdivision (a) of Section 92032 of the
Education Code and of any order or notice required by Section 11129.
(d) If, after the agenda has been published in compliance with this article, any pending
litigation (under subdivision (e) of Section 11126) matters arise, the postponement of
which will prevent the state body from complying with any statutory, court-ordered, or
other legally imposed deadline, the state body may proceed to discuss those matters in
closed session and shall publicly announce in the meeting the title of, or otherwise
specifically identify, the litigation to be discussed, unless the body states that to do so
would jeopardize the body's ability to effectuate service of process upon one or more
unserved parties, or that to do so would jeopardize its ability to conclude existing
settlement negotiations to its advantage. Such an announcement shall be deemed to
comply fully with the requirements of this section.
(e) Nothing in this section shall require or authorize a disclosure of names or other
information that would constitute an invasion of privacy or otherwise unnecessarily
divulge the particular facts concerning the closed session or the disclosure of which is
prohibited by state or federal law.
(f) After any closed session, the state body shall reconvene into open session prior to
adjournment and shall make any reports, provide any documentation, and make any
other disclosures required by Section 11125.2 of action taken in the closed session.
(g) The announcements required to be made in open session pursuant to this section
may be made at the location announced in the agenda for the closed session, as long as
the public is allowed to be present at that location for the purpose of hearing the
announcement.

§ 11126.5. Clearing room when meeting wilfully interrupted
In the event that any meeting is wilfully interrupted by a group or groups of persons
so as to render the orderly conduct of such meeting unfeasible and order cannot be
restored by the removal of individuals who are wilfully interrupting the meeting the
state body conducting the meeting may order the meeting room cleared and continue in
session. Nothing in this section shall prohibit the state body from establishing a
procedure for readmitting an individual or individuals not responsible for wilfully
disturbing the orderly conduct of the meeting. Notwithstanding any other provision of
law, only matters appearing on the agenda may be considered in such a session.
Representatives of the press or other news media, except those participating in the
disturbance, shall be allowed to attend any session held pursuant to this section.

§ 11126.7. Fees
No fees may be charged by a state body for providing a notice required by Section
11125 or for carrying out any provision of this article, except as specifically authorized
pursuant to this article.

§ 11127. State bodies subject to article
Each provision of this article shall apply to every state body unless the body is
specifically excepted from that provision by law or is covered by any other conflicting
provision of law.

§ 11127. State bodies subject to article

specifically excepted from that provision by law or is covered by any other conflicting
provision of law.

§ 11128. When closed sessions held
Each closed session of a state body shall be held only during a regular or special meeting of the body.

§ 11129. Continuance or recontinuance of hearing
Any hearing being held, or noticed or ordered to be held by a state body at any meeting may by order or notice of continuance be continued or recontinued to any subsequent meeting of the state body in the same manner and to the same extent set forth in Section 11128.5 for the adjournment of meetings. A copy of the order or notice of continuance shall be conspicuously posted on or near the door of the place where the hearing was held within 24 hours after the time of the continuance; provided, that if the hearing is continued to a time less than 24 hours after the time specified in the order or notice of hearing, a copy of the order or notice of continuance of hearing shall be posted immediately following the meeting at which the order or declaration of continuance was adopted or made.

§ 11130. Action to stop or prevent violations of article; Order for recording of closed sessions; Discovery of recording
(a) The Attorney General, the district attorney, or any interested person may commence an action by mandamus, injunction, or declaratory relief for the purpose of stopping or preventing violations or threatened violations of this article or to determine the applicability of this article to past actions or threatened future action by members of the state body or to determine whether any rule or action by the state body to penalize or otherwise discourage the expression of one or more of its members is valid or invalid under the laws of this state or of the United States, or to compel the state body to audio record its closed sessions as hereinafter provided.

(b) The court in its discretion may, upon a judgment of a violation of Section 11126, order the state body to audio record its closed sessions and preserve the audio recordings for the period and under the terms of security and confidentiality the court deems appropriate.

(c)(1) Each recording so kept shall be immediately labeled with the date of the closed session recorded and the title of the clerk or other officer who shall be custodian of the recording.

(2) The audio recordings shall be subject to the following discovery procedures:
(A) In any case in which discovery or disclosure of the audio recording is sought by the Attorney General, the district attorney, or the plaintiff in a civil action pursuant to this section or Section 11130.3 alleging that a violation of this article has occurred in a closed session that has been recorded pursuant to this section, the party seeking discovery or disclosure shall file a written notice of motion with the appropriate court with notice to the governmental agency that has custody and control of the audio recording. The notice shall be given pursuant to subdivision (b) of Section 1005 of the Code of Civil Procedure.

(B) The notice shall include, in addition to the items required by Section 1010 of the Code of Civil Procedure, all of the following:
(i) Identification of the proceeding in which discovery or disclosure is sought, the party seeking discovery or disclosure, the date and time of the meeting recorded, and the governmental agency that has custody and control of the recording.

(ii) An affidavit that contains specific facts indicating that a violation of the act occurred in the closed session.

(3) If the court, following a review of the motion, finds that there is good cause to believe that a violation has occurred, the court may review, in camera, the recording of that portion of the closed session alleged to have violated the act.

(4) If, following the in camera review, the court concludes that disclosure of a portion of the recording would be likely to materially assist in the resolution of the litigation alleging violation of this article, the court shall, in its discretion, make a certified transcript of the portion of the recording a public exhibit in the proceeding.
§ 11130.3. Cause of action to void action taken by state agency in violation of open meeting requirements
(a) Any interested person may commence an action by mandamus, injunction, or declaratory relief for the purpose of obtaining a judicial determination that an action taken by a state body in violation of Section 11123 or 11125 is null and void under this section. Any action seeking such a judicial determination shall be commenced within 90 days from the date the action was taken. Nothing in this section shall be construed to prevent a state body from curing or correcting an action challenged pursuant to this section.
(b) An action shall not be determined to be null and void if any of the following conditions exist:
(1) The action taken was in connection with the sale or issuance of notes, bonds, or other evidences of indebtedness or any contract, instrument, or agreement related thereto.
(2) The action taken gave rise to a contractual obligation upon which a party has, in good faith, detrimentally relied.
(3) The action taken was in substantial compliance with Sections 11123 and 11125.
(4) The action taken was in connection with the collection of any tax.
§ 11130.5. Costs and attorney fees
A court may award court costs and reasonable attorney’s fees to the plaintiff in an action brought pursuant to Section 11130 or 11130.3 where it is found that a state body has violated the provisions of this article. The costs and fees shall be paid by the state body and shall not become a personal liability of any public officer or employee thereof.
A court may award court costs and reasonable attorney’s fees to a defendant in any action brought pursuant to Section 11130 or 11130.3 where the defendant has prevailed in a final determination of the action and the court finds that the action was clearly frivolous and totally lacking in merit.
§ 11130.7. Offenses
Each member of a state body who attends a meeting of that body in violation of any provision of this article, and where the member intends to deprive the public of information to which the member knows or has reason to know the public is entitled under this article, is guilty of a misdemeanor.
§ 11131. Prohibition against use of certain facilities
No state agency shall conduct any meeting, conference, or other function in any facility that prohibits the admittance of any person, or persons, on the basis of ancestry or any characteristic listed or defined in Section 11135, or that is inaccessible to disabled persons, or where members of the public may not be present without making a payment or purchase. As used in this section, “state agency” means and includes every state body, office, officer, department, division, bureau, board, council, commission, or other state agency.

(a) When a prescriber’s authority to prescribe controlled substances is restricted by civil, criminal, or administrative action, or by an order of the court issued pursuant to Section 11161, the law enforcement agency or licensing board that sought the restrictions shall provide the name, category of licensure, license number, and the nature of the restrictions imposed on the prescriber to security printers, the Department of Justice, and the Board of Pharmacy.
(b) The Board of Pharmacy shall make available the information required by subdivision (a) to pharmacies and security printers to prevent the dispensing of controlled substances to persons other than those authorized to receive the controlled substances or to persons other than those authorized to receive the controlled substances.
§ 11164. Requirements for prescriptions; Oral or electronic prescription; Written records

Except as provided in Section 11167, no person shall prescribe a controlled substance, nor shall any person fill, compound, or dispense a prescription for a controlled substance, unless it complies with the requirements of this section.

(a) Each prescription for a controlled substance classified in Schedule II, III, IV, or V, except as authorized by subdivision (b), shall be made on a controlled substance prescription form as specified in Section 11162.1 and shall meet the following requirements:

(1) The prescription shall be signed and dated by the prescriber in ink and shall contain the prescriber's address and telephone number; the name of the ultimate user or research subject, or contact information as determined by the Secretary of the United States Department of Health and Human Services; refill information, such as the number of refills ordered and whether the prescription is a first-time request or a refill; and the name, quantity, strength, and directions for use of the controlled substance prescribed.

(2) The prescription shall also contain the address of the person for whom the controlled substance is prescribed. If the prescriber does not specify this address on the prescription, the pharmacist filling the prescription or an employee acting under the direction of the pharmacist shall write or type the address on the prescription or maintain this information in a readily retrievable form in the pharmacy.

(b)(1) Notwithstanding paragraph (1) of subdivision (a) of Section 11162.1, any controlled substance classified in Schedule III, IV, or V may be dispensed upon an oral or electronically transmitted prescription, which shall be produced in hard copy form and signed and dated by the pharmacist filling the prescription or by any other person expressly authorized by provisions of the Business and Professions Code. Any person who transmits, maintains, or receives any electronically transmitted prescription shall ensure the security, integrity, authority, and confidentiality of the prescription.

(2) The date of issue of the prescription and all the information required for a written prescription by subdivision (a) shall be included in the written record of the prescription; the pharmacist need not include the address, telephone number, license classification, or federal registry number of the prescriber or the address of the patient on the hard copy, if that information is readily retrievable in the pharmacy.

(3) Pursuant to an authorization of the prescriber, any agent of the prescriber on behalf of the prescriber may orally or electronically transmit a prescription for a controlled substance classified in Schedule III, IV, or V, if in these cases the written record of the prescription required by this subdivision specifies the name of the agent of the prescriber transmitting the prescription.

(c) The use of commonly used abbreviations shall not invalidate an otherwise valid prescription.

(d) Notwithstanding any provision of subdivisions (a) and (b), prescriptions for a controlled substance classified in Schedule V may be for more than one person in the same family with the same medical need.

(e) This section shall become operative on January 1, 2005.

(a) Notwithstanding any other provision of law, a prescription for a controlled substance issued by a prescriber in another state for delivery to a patient in another state may be dispensed by a California pharmacy, if the prescription conforms with the...
requirements for controlled substance prescriptions in the state in which the controlled substance was prescribed.

§ 11165. CURES project for electronic monitoring of prescription drugs; Funding as contingency; Confidentiality provisions; Information to be provided to Department of Justice

(a) To assist health care practitioners in their efforts to ensure appropriate prescribing, ordering, administering, furnishing, and dispensing of controlled substances, law enforcement and regulatory agencies in their efforts to control the diversion and resultant abuse of Schedule II, Schedule III, and Schedule IV controlled substances, and for statistical analysis, education, and research, the Department of Justice shall, contingent upon the availability of adequate funds in the CURES Fund, maintain the Controlled Substance Utilization Review and Evaluation System (CURES) for the electronic monitoring of, and Internet access to information regarding, the prescribing and dispensing of Schedule II, Schedule III, and Schedule IV controlled substances by all practitioners authorized to prescribe, order, administer, furnish, or dispense these controlled substances.

(b) The Department of Justice may seek and use grant funds to pay the costs incurred by the operation and maintenance of CURES. The department shall annually report to the Legislature and make available to the public the amount and source of funds it receives for support of CURES.

(c)(1) The operation of CURES shall comply with all applicable federal and state privacy and security laws and regulations.

Data obtained from CURES shall only be provided to appropriate state, local, and federal public agencies for disciplinary, civil, or criminal purposes and to other agencies or entities, as determined by the Department of Justice, for the purpose of educating practitioners and others in lieu of disciplinary, civil, or criminal actions. Further, data disclosed to any individual or agency as described in this subdivision shall not be disclosed, sold, or transferred to any third party, unless authorized by, or pursuant to, state and federal privacy and security laws and regulations. The Department of Justice shall establish policies, procedures, and regulations regarding the use, access, evaluation, management, implementation, operation, storage, disclosure, and security of the information within CURES, consistent with this subdivision.

(B) Notwithstanding subparagraph (A), a regulatory board whose licensees do not prescribe, order, administer, furnish, or dispense controlled substances shall not be provided data obtained from CURES.

(3) In accordance with federal and state privacy laws and regulations, a health care practitioner may provide a patient with a copy of the patient’s CURES patient activity report as long as no additional CURES data is provided and keep a copy of the report in the patient’s medical record in compliance with subdivision (d) of Section 11165.1.

(d) For each prescription for a Schedule II, Schedule III, or Schedule IV controlled substance, as defined in the controlled substances schedules in federal law and regulations, specifically Sections 1308.12, 1308.13, and 1308.14, respectively, of Title 21 of
the Code of Federal Regulations, the dispensing pharmacy, clinic, or other dispenser shall report the following information to the Department of Justice as soon as reasonably possible, but not more than seven days after the date a controlled substance is dispensed, in a format specified by the Department of Justice:

(1) Full name, address, and, if available, telephone number of the ultimate user or research subject, or contact information as determined by the Secretary of the United States Department of Health and Human Services, and the gender, and date of birth of the ultimate user.

(2) The prescriber’s category of licensure, license number, national provider identifier (NPI) number, if applicable, the federal controlled substance registration number, and the state medical license number of any prescriber using the federal controlled substance registration number of a government-exempt facility.

(4) National Drug Code (NDC) number of the controlled substance dispensed.

(5) Quantity of the controlled substance dispensed.

(6) International Statistical Classification of Diseases, 9th revision (ICD-9) or 10th revision (ICD-10) Code, if available.

(7) Number of refills ordered.

(8) Whether the drug was dispensed as a refill of a prescription or as a first-time request.

(9) Date of origin of the prescription.

(10) Date of dispensing of the prescription.

(e) The Department of Justice may invite stakeholders to assist, advise, and make recommendations on the establishment of rules and regulations necessary to ensure the proper administration and enforcement of the CURES database. All prescriber and dispenser invitees shall be licensed by one of the boards or committees identified in subdivision (d) of Section 208 of the Business and Professions Code, in active practice in California, and a regular user of CURES.

(f) The Department of Justice shall, prior to upgrading CURES, consult with prescribers licensed by one of the boards or committees identified in subdivision (d) of Section 208 of the Business and Professions Code, one or more of the boards or committees identified in subdivision (d) of Section 208 of the Business and Professions Code, and any other stakeholder identified by the department, for the purpose of identifying desirable capabilities and upgrades to the CURES Prescription Drug Monitoring Program (PDMP).

(g) The Department of Justice may establish a process to educate authorized subscribers of the CURES PDMP on how to access and use the CURES PDMP.

§ 11165.1. Request for, or release of, controlled substance history; Guidelines; Initiation by Department of Justice; Confidentiality; Civil or administrative liability

(a)(1)(A)(i) A health care practitioner authorized to prescribe, order, administer, furnish, or dispense Schedule II, Schedule III, or Schedule IV controlled substances pursuant to Section 11150 shall, before July 1, 2016, or upon receipt of a federal Drug Enforcement Administration (DEA) registration, whichever occurs later, submit an application developed by the Department of Justice to obtain approval to access information online regarding the controlled substance history of a patient that is stored on the Internet and maintained within the Department of Justice, and, upon approval, the department shall release to that practitioner the electronic history of controlled substances dispensed to an individual under his or her care based on data contained in the CURES Prescription Drug Monitoring Program (PDMP).

(ii) A pharmacist shall, before July 1, 2016, or upon licensure, whichever occurs later, submit an application developed by the Department of Justice to obtain approval to access information online regarding the controlled substance history of a patient that is stored on the Internet and maintained within the Department of Justice, and, upon
approval, the department shall release to that pharmacist the electronic history of controlled substances dispensed to an individual under his or her care based on data contained in the CURES PDMP.

(B) An application may be denied, or a subscriber may be suspended, for reasons which include, but are not limited to, the following:
(i) Materially falsifying an application for a subscriber.
(ii) Failure to maintain effective controls for access to the patient activity report.
(iii) Suspended or revoked federal DEA registration.
(iv) Any subscriber who is arrested for a violation of law governing controlled substances or any other law for which the possession or use of a controlled substance is an element of the crime.
(v) Any subscriber accessing information for any other reason than caring for his or her patients.

(C) Any authorized subscriber shall notify the Department of Justice within 30 days of any changes to the subscriber account.

(2) A health care practitioner authorized to prescribe, order, administer, furnish, or dispense Schedule II, Schedule III, or Schedule IV controlled substances pursuant to Section 11150 or a pharmacist shall be deemed to have complied with paragraph (1) if the licensed health care practitioner or pharmacist has been approved to access the CURES database through the process developed pursuant to subdivision (a) of Section 209 of the Business and Professions Code.

(b) Any request for, or release of, a controlled substance history pursuant to this section shall be made in accordance with guidelines developed by the Department of Justice.

(c) In order to prevent the inappropriate, improper, or illegal use of Schedule II, Schedule III, or Schedule IV controlled substances, the Department of Justice may initiate the referral of the history of controlled substances dispensed to an individual based on data contained in CURES to licensed health care practitioners, pharmacists, or both, providing care or services to the individual.

(d) The history of controlled substances dispensed to an individual based on data contained in CURES that is received by a practitioner or pharmacist from the Department of Justice pursuant to this section is medical information subject to the provisions of the Confidentiality of Medical Information Act contained in Part 2.6 (commencing with Section 56) of Division 1 of the Civil Code.

(e) Information concerning a patient’s controlled substance history provided to a prescriber or pharmacist pursuant to this section shall include prescriptions for controlled substances listed in Sections 1308.12, 1308.13, and 1308.14 of Title 21 of the Code of Federal Regulations.

(f) A health care practitioner, pharmacist, and any person acting on behalf of a health care practitioner or pharmacist, when acting with reasonable care and in good faith, is not subject to civil or administrative liability arising from any false, incomplete, inaccurate, or misattributed information submitted to, reported by, or relied upon in the CURES database or for any resulting failure of the CURES database to accurately or timely report that information.

§ 11165.2. Department of Justice audits of CURES Prescription Drug Monitoring Program system and users; Citations for subscriber violations; Required provisions; Payment of fine as satisfactory resolution; Deposit of administrative fines; Sanctions separate

(a) The Department of Justice may conduct audits of the CURES Prescription Drug Monitoring Program system and its users.

(b) The Department of Justice may establish, by regulation, a system for the issuance to a CURES Prescription Drug Monitoring Program subscriber of a citation which may contain an order of abatement, or an order to pay an administrative fine assessed by the
Department of Justice if the subscriber is in violation of any provision of this chapter or any regulation adopted by the Department of Justice pursuant to this chapter.

(c) The system shall contain the following provisions:

(1) Citations shall be in writing and shall describe with particularity the nature of the violation, including specific reference to the provision of law or regulation of the department determined to have been violated.

(2) Whenever appropriate, the citation shall contain an order of abatement establishing a reasonable time for abatement of the violation.

(3) In no event shall the administrative fine assessed by the department exceed two thousand five hundred dollars ($2,500) for each violation. In assessing a fine, due consideration shall be given to the appropriateness of the amount of the fine with respect to such factors as the gravity of the violation, the good faith of the subscribers, and the history of previous violations.

(4) An order of abatement or a fine assessment issued pursuant to a citation shall inform the subscriber that if the subscriber desires a hearing to contest the finding of a violation, a hearing shall be requested by written notice to the CURES Prescription Drug Monitoring Program within 30 days of the date of issuance of the citation or assessment. Hearings shall be held pursuant to Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code.

(5) In addition to requesting a hearing, the subscriber may, within 10 days after service of the citation, request in writing an opportunity for an informal conference with the department regarding the citation. At the conclusion of the informal conference, the department may affirm, modify, or dismiss the citation, including any fine levied or order of abatement issued. The decision shall be deemed to be a final order with regard to the citation issued, including the fine levied or the order of abatement which could include permanent suspension to the system, a monetary fine, or both, depending on the gravity of the violation. However, the subscriber does not waive its right to request a hearing to contest a citation by requesting an informal conference. If the citation is affirmed, a formal hearing may be requested within 30 days of the date the citation was affirmed. If the citation is dismissed after the informal conference, the request for a hearing on the matter of the citation shall be deemed to be withdrawn. If the citation, including any fine levied or order of abatement, is modified, the citation originally issued shall be considered withdrawn and a new citation issued. If a hearing is requested for a subsequent citation, it shall be requested within 30 days of service of that subsequent citation.

(6) Failure of a subscriber to pay a fine within 30 days of the date of assessment or comply with an order of abatement within the fixed time, unless the citation is being appealed, may result in disciplinary action taken by the department. If a citation is not contested and a fine is not paid, the subscriber account will be terminated:

(A) A citation may be issued without the assessment of an administrative fine.

(B) Assessment of administrative fines may be limited to only particular violations of law or department regulations.

(d) Notwithstanding any other provision of law, if a fine is paid to satisfy an assessment based on the finding of a violation, payment of the fine shall be represented as a satisfactory resolution of the matter for purposes of public disclosure.

(e) Administrative fines collected pursuant to this section shall be deposited in the CURES Program Special Fund, available upon appropriation by the Legislature. These special funds shall provide support for costs associated with informal and formal hearings, maintenance, and updates to the CURES Prescription Drug Monitoring Program.

(f) The sanctions authorized under this section shall be separate from, and in addition to, any other administrative, civil, or criminal remedies; however, a criminal action may not be initiated for a specific offense if a citation has been issued pursuant to this section for that offense, and a citation may not be issued pursuant to this section for a specific offense if a criminal action for that offense has been filed.

(g) Nothing in this section shall be deemed to prevent the department from serving and prosecuting an accusation to suspend or revoke a subscriber if grounds for that suspension or revocation exist.

§ 11165.3. Report of theft or loss of prescription forms

The theft or loss of prescription forms shall be reported immediately by the security printer or affected prescriber to the CURES Prescription Drug Monitoring Program, but no later than three days after the discovery of the theft or loss. This notification may be done in writing utilizing the approved Department of Justice form or may be reported by the authorized subscriber through the CURES Prescription Drug Monitoring Program.

§ 11165.4. Duty to consult CURES database; Liability for failure to consult

(a) (1) (A) (i) A health care practitioner authorized to prescribe, order, administer, or furnish a controlled substance shall consult the CURES database to review a patient’s controlled substance history before prescribing a Schedule II, Schedule III, or Schedule IV controlled substance to the patient for the first time and at least once every four months thereafter if the substance remains part of the treatment of the patient.

(ii) If a health care practitioner authorized to prescribe, order, administer, or furnish a controlled substance is not required, pursuant to an exemption described in subdivision (c), to consult the CURES database the first time he or she prescribes, orders, administers, or furnishes a controlled substance to a patient, he or she shall consult the CURES database to review the patient’s controlled substance history before subsequently prescribing a Schedule II, Schedule III, or Schedule IV controlled substance to the patient and at least once every four months thereafter if the substance remains part of the treatment of the patient.

(B) For purposes of this paragraph, “first time” means the initial occurrence in which a health care practitioner, in his or her role as a health care practitioner, intends to prescribe, order, administer, or furnish a Schedule II, Schedule III, or Schedule IV controlled substance to a patient and has not previously prescribed a controlled substance to the patient.

(2) A health care practitioner shall obtain a patient’s controlled substance history from the CURES database no earlier than 24 hours, or the previous business day, before he or she prescribes, orders, administers, or furnishes a Schedule II, Schedule III, or Schedule IV controlled substance to a patient.

(b) The duty to consult the CURES database, as described in subdivision (a), does not apply to veterinarians or pharmacists.

(c) The duty to consult the CURES database, as described in subdivision (a), does not apply to a health care practitioner in any of the following circumstances:

(1) If a health care practitioner prescribes, orders, or furnishes a controlled substance to be administered to a patient while the patient is admitted to any of the following facilities or during an emergency transfer between any of the following facilities for use while on facility premises:

(A) A licensed clinic, as described in Chapter 1 (commencing with Section 1200) of Division 2.

(B) An outpatient setting, as described in Chapter 1.3 (commencing with Section 1248) of Division 2.

(C) A health facility, as described in Chapter 2 (commencing with Section 1250) of Division 2.

(D) A county medical facility, as described in Chapter 2.5 (commencing with Section 1440) of Division 2.

(2) If a health care practitioner prescribes, orders, administers, or furnishes a controlled substance in the emergency department of a general acute care hospital and the quantity of the controlled substance does not exceed a nonrefillable seven-day supply of the controlled substance to be used in accordance with the directions for use.

(3) If a health care practitioner prescribes, orders, administers, or furnishes a controlled substance to a patient as part of the patient’s treatment for a surgical procedure and the quantity of the controlled substance does not exceed a nonrefillable five-day supply of the controlled substance to be used in accordance with the directions for use, in any of the following facilities:
(A) A licensed clinic, as described in Chapter 1 (commencing with Section 1200) of Division 2.
(B) An outpatient setting, as described in Chapter 1.3 (commencing with Section 1248) of Division 2.
(C) A health facility, as described in Chapter 2 (commencing with Section 1250) of Division 2.
(D) A county medical facility, as described in Chapter 2.5 (commencing with Section 1440) of Division 2.
(E) A place of practice, as defined in Section 1658 of the Business and Professions Code.

(4) If a health care practitioner prescribes, orders, administers, or furnishes a controlled substance to a patient currently receiving hospice care, as defined in Section 1339.40.

(5) (A) If all of the following circumstances are satisfied:
(i) It is not reasonably possible for a health care practitioner to access the information in the CURES database in a timely manner.
(ii) Another health care practitioner or designee authorized to access the CURES database is not reasonably available.
(iii) The quantity of controlled substance prescribed, ordered, administered, or furnished does not exceed a nonrefillable five-day supply of the controlled substance to be used in accordance with the directions for use and no refill of the controlled substance is allowed.

(B) A health care practitioner who does not consult the CURES database under subparagraph (A) shall document the reason he or she did not consult the database in the patient’s medical record.

(6) If the CURES database is not operational, as determined by the department, or when it cannot be accessed by a health care practitioner because of a temporary technological or electrical failure. A health care practitioner shall, without undue delay, seek to correct any cause of the temporary technological or electrical failure that is reasonably within his or her control.

(7) If the CURES database cannot be accessed because of technological limitations that are not reasonably within the control of a health care practitioner.

(8) If consultation of the CURES database would, as determined by the health care practitioner, result in a patient’s inability to obtain a prescription in a timely manner and thereby adversely impact the patient’s medical condition, provided that the quantity of the controlled substance does not exceed a nonrefillable five-day supply if the controlled substance were used in accordance with the directions for use.

(d)(1) A health care practitioner who fails to consult the CURES database, as described in subdivision (a), shall be referred to the appropriate state professional licensing board solely for administrative sanctions, as deemed appropriate by that board.

(2) This section does not create a private cause of action against a health care practitioner. This section does not limit a health care practitioner’s liability for the negligent failure to diagnose or treat a patient.

(e) This section is not operative until six months after the Department of Justice certifies that the CURES database is ready for statewide use and that the department has adequate staff, which, at a minimum, shall be consistent with the appropriation authorized in Schedule (6) of Item 0820-001-0001 of the Budget Act of 2016 (Chapter 23 of the Statutes of 2016), user support, and education. The department shall notify the Secretary of State and the office of the Legislative Counsel of the date of that certification.

(f) All applicable state and federal privacy laws govern the duties required by this section.

(g) The provisions of this section are severable. If any provision of this section or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application.

§ 11165.5. Donations to CURES Fund

(a) The Department of Justice may seek voluntarily contributed private funds from insurers, health care service plans, qualified manufacturers, and other donors for the
purpose of supporting CURES. Insurers, health care service plans, qualified manufacturers, and other donors may contribute by submitting their payment to the Controller for deposit into the CURES Fund established pursuant to subdivision (c) of Section 208 of the Business and Professions Code. The department shall make information about the amount and the source of all private funds it receives for support of CURES available to the public. Contributions to the CURES Fund pursuant to this subdivision shall be nondeductible for state tax purposes.

(2) The person seeking to bring the dog into this state or importing dogs into this state for the purpose of resale or change of ownership shall submit the health certificate to the county health department as provided in subdivision (c). The person shall submit the health certificate to the county health department by any method accepted by the receiving agency, including, but not limited to, electronic transmission and facsimile.
§ 121721. Exceptions

(b) This chapter does not apply to the import of a dog used for law enforcement or military work, a guide dog, as defined by subdivision (d) of Section 365.5 of the Penal Code, or a dog imported as a result of a declared emergency as described by Section 8558 of the Government Code or an investigation by law enforcement of an alleged violation of state or federal animal fighting or animal cruelty laws.

§ 121722. Fees

(a) A person who violates a provision of this chapter is guilty of an infraction, punishable by a fine not to exceed two hundred fifty dollars ($250) for each dog for which a violation has occurred.

(b) In lieu of punishment pursuant to subdivision (a), authorized enforcement personnel may issue an administrative fine in the same amount specified in subdivision (a) or a correction warning to a person who violates a provision of this chapter, unless the violation endangers the health or safety of the animal, the animal has been wounded as a result of the violation, or an administrative fine or a correction warning has previously been issued to the individual. The administrative fine or correction warning shall require the person to correct the violation.
§ 597. Cruelty to animals

(a) Except as provided in subdivision (c) of this section or Section 599c, every person who maliciously and intentionally maims, mutilates, tortures, or wounds a living animal, or maliciously and intentionally kills an animal, is guilty of a crime punishable pursuant to subdivision (d).

(b) Except as otherwise provided in subdivision (a) or (c), every person who overdrives, overloads, drives when overloaded, overworks, tortures, torments, deprives of necessary sustenance, drink, or shelter, cruelly beats, mutilates, or cruelly kills any animal, or causes or procures any animal to be so overdriven, overloaded, driven when overloaded, overworked, tortured, tormented, deprived of necessary sustenance, drink, shelter, or to be cruelly beaten, mutilated, or cruelly killed; and whoever, having the charge or custody of any animal, either as owner or otherwise, subjects any animal to needless suffering, or inflicts unnecessary cruelty upon the animal, or in any manner abuses any animal, or fails to provide the animal with proper food, drink, or shelter or protection from the weather, or who drives, rides, or otherwise uses the animal when unfit for labor, is, for each offense, guilty of a crime punishable pursuant to subdivision (d).

(c) Every person who maliciously and intentionally maims, mutilates, or tortures any mammal, bird, reptile, amphibian, or fish, as described in subdivision (e), is guilty of a crime punishable pursuant to subdivision (d).

(d) A violation of subdivision (a), (b), or (c) is punishable as a felony by imprisonment pursuant to subdivision (h) of Section 1170, or by a fine of not more than twenty thousand dollars ($20,000), or by both that fine and imprisonment, or alternatively, as a misdemeanor by imprisonment in a county jail for not more than one year, or by a fine of not more than twenty thousand dollars ($20,000), or by both that fine and imprisonment.

(e) Subdivision (c) applies to any mammal, bird, reptile, amphibian, or fish which is a creature described as follows:

1. Endangered species or threatened species as described in Chapter 1.5 (commencing with Section 2050) of Division 3 of the Fish and Game Code.
2. Fully protected birds described in Section 3511 of the Fish and Game Code.
3. Fully protected mammals described in Chapter 8 (commencing with Section 4700) of Part 3 of Division 4 of the Fish and Game Code.
4. Fully protected reptiles and amphibians described in Chapter 2 (commencing with Section 5050) of Division 5 of the Fish and Game Code.
5. Fully protected fish as described in Section 5515 of the Fish and Game Code.

313
This subdivision does not supersede or affect any provisions of law relating to taking of the described species, including, but not limited to, Section 12008 of the Fish and Game Code.

(f) For the purposes of subdivision (c), each act of malicious and intentional maiming, mutilating, or torturing a separate specimen of a creature described in subdivision (e) is a separate offense. If any person is charged with a violation of subdivision (c), the proceedings shall be subject to Section 12157 of the Fish and Game Code.

(g)(1) Upon the conviction of a person charged with a violation of this section by causing or permitting an act of cruelty, as defined in Section 599b, all animals lawfully seized and impounded with respect to the violation by a peace officer, officer of a humane society, or officer of a pound or animal regulation department of a public agency shall be adjudged by the court to be forfeited and shall thereupon be awarded to the impounding officer for proper disposition. A person convicted of a violation of this section by causing or permitting an act of cruelty, as defined in Section 599b, shall be liable to the impounding officer for all costs of impoundment from the time of seizure to the time of proper disposition.

(2) Mandatory seizure or impoundment shall not apply to animals in properly conducted scientific experiments or investigations performed under the authority of the faculty of a regularly incorporated medical college or university of this state.

(h) Notwithstanding any other provision of law, if a defendant is granted probation for a conviction under this section, the court shall order the defendant to pay for, and successfully complete, counseling, as determined by the court, designed to evaluate and treat behavior or conduct disorders. If the court finds that the defendant is financially unable to pay for that counseling, the court may develop a sliding fee schedule based upon the defendant's ability to pay. An indigent defendant may negotiate a deferred payment schedule, but shall pay a nominal fee if the defendant has the ability to pay the nominal fee. County mental health departments or Medi-Cal shall be responsible for the costs of counseling required by this section only for those persons who meet the medical necessity criteria for mental health managed care pursuant to Section 1830.205 of Title 9 of the California Code of Regulations or the targeted population criteria specified in Section 5600.3 of the Welfare and Institutions Code. The counseling specified in this subdivision shall be in addition to any other terms and conditions of probation, including any term of imprisonment and any fine. This provision specifies a mandatory additional term of probation and is not to be utilized as an alternative in lieu of imprisonment pursuant to subdivision (h) of Section 1170 or county jail when that sentence is otherwise appropriate. If the court does not order custody as a condition of probation for a conviction under this section, the court shall specify on the court record the reason or reasons for not ordering custody. This subdivision shall not apply to cases involving police dogs or horses as described in Section 600.

§ 597.1. Animals kept in specified places without proper care or attention

(a)(1) Every owner, driver, or keeper of any animal who permits the animal to be in any building, enclosure, lane, street, square, or lot of any city, county, city and county, or judicial district without proper care and attention is guilty of a misdemeanor. Any peace officer, humane society officer, or animal control officer shall take possession of the stray or abandoned animal and shall provide care and treatment for the animal until the animal is deemed to be in suitable condition to be returned to the owner. When the officer has reasonable grounds to believe that very prompt action is required to protect the health or safety of the animal or the health or safety of others, the officer shall immediately seize the animal and comply with subdivision (f). In all other cases, the officer shall comply with the provisions of subdivision (g). The full cost of caring for and treating any animal properly seized under this subdivision or pursuant to a search warrant shall constitute a lien on the animal and the animal shall not be returned to its owner until the charges are paid, if the seizure is upheld pursuant to this section.
(2) Notwithstanding any other law, if an animal control officer or humane officer, when necessary to protect the health and safety of a wild, stray, or abandoned animal or the health and safety of others, seeks to administer a tranquilizer that contains a controlled substance, as defined in Division 10 (commencing with Section 11000) of the Health and Safety Code, to gain control of that animal, he or she may possess and administer that tranquilizer with direct or indirect supervision as determined by a licensed veterinarian, provided that the officer has met each of the following requirements:

(A) Has received training in the administration of tranquilizers from a licensed veterinarian. The training shall be approved by the California Veterinary Medical Board.

(B) Has successfully completed the firearms component of a course relating to the exercise of police powers, as set forth in Section 832.

(C) Is authorized by his or her agency or organization to possess and administer the tranquilizer in accordance with a policy established by the agency or organization and approved by the veterinarian who obtained the controlled substance.

(D) Has successfully completed the euthanasia training set forth in Section 2039 of Title 16 of the California Code of Regulations.

(E) Has completed a state and federal fingerprinting background check and does not have any drug- or alcohol-related convictions.

(b) Every sick, disabled, infirm, or crippled animal, except a dog or cat, that is abandoned in any city, county, city and county, or judicial district may be killed by the officer if, after a reasonable search, no owner of the animal can be found. It shall be the duty of all peace officers, humane society officers, and animal control officers to cause the animal to be killed or rehabilitated and placed in a suitable home on information that the animal is stray or abandoned. The officer may likewise take charge of any animal, including a dog or cat, that by reason of lameness, sickness, feebleness, or neglect, is unfit for the labor it is performing, or that in any other manner is being cruelly treated, and provide care and treatment for the animal until it is deemed to be in a suitable condition to be returned to the owner. When the officer has reasonable grounds to believe that very prompt action is required to protect the health or safety of an animal or the health or safety of others, the officer shall immediately seize the animal and comply with subdivision (f). In all other cases, the officer shall comply with subdivision (g). The full cost of caring for and treating any animal properly seized under this subdivision or pursuant to a search warrant shall constitute a lien on the animal and the animal shall not be returned to its owner until the charges are paid.

(c)(1) Any peace officer, humane society officer, or animal control officer shall convey all injured cats and dogs found without their owners in a public place directly to a veterinarian known by the officer to be a veterinarian who ordinarily treats dogs and cats for a determination of whether the animal shall be immediately and humanely destroyed or shall be hospitalized under proper care and given emergency treatment.

(2) If the owner does not redeem the animal within the locally prescribed waiting period, the veterinarian may personally perform euthanasia on the animal. If the animal is treated and recovers from its injuries, the veterinarian may keep the animal for purposes of adoption, provided the responsible animal control agency has first been contacted and has refused to take possession of the animal.

(3) Whenever any animal is transferred to a veterinarian in a clinic, such as an emergency clinic that is not in continuous operation, the veterinarian may, in turn, transfer the animal to an appropriate facility.

(4) If the veterinarian determines that the animal shall be hospitalized under proper care and given emergency treatment, the costs of any services that are provided pending the owner’s inquiry to the responsible agency, department, or society shall be paid from the dog license fees, fines, and fees for impounding dogs in the city, county, or city and county in which the animal was licensed or, if the animal is unlicensed, shall be paid by the jurisdiction in which the animal was found, subject to the provision that this cost be repaid by the animal’s owner. The full cost of caring for and treating any animal seized under this subdivision shall constitute a lien on the animal and the animal shall not be returned to the owner until the charges are paid. No veterinarian shall be criminally or
(d) An animal control agency that takes possession of an animal pursuant to subdivision (c) shall keep records of the whereabouts of the animal from the time of possession to the end of the animal's impoundment, and those records shall be available for inspection by the public upon request for three years after the date the animal's impoundment ended.

(e) Notwithstanding any other provision of this section, any peace officer, humane society officer, or any animal control officer may, with the approval of his or her immediate superior, humanely destroy any stray or abandoned animal in the field in any case where the animal is too severely injured to move or where a veterinarian is not available and it would be more humane to euthanize the animal.

(f) Whenever an officer authorized under this section seizes or impounds an animal based on a reasonable belief that prompt action is required to protect the health or safety of the animal or the health or safety of others, the officer shall, prior to the commencement of any criminal proceedings authorized by this section, provide the owner or keeper of the animal, if known or ascertainable after reasonable investigation, with the opportunity for a postseizure hearing to determine the validity of the seizure or impoundment, or both.

1. The agency shall cause a notice to be affixed to a conspicuous place where the animal was situated or personally deliver a notice of the seizure or impoundment, or both, to the owner or keeper within 48 hours, excluding weekends and holidays. The notice shall include all of the following:
   (A) The name, business address, and telephone number of the officer providing the notice.
   (B) A description of the animal seized, including any identification upon the animal.
   (C) The authority and purpose for the seizure or impoundment, including the time, place, and circumstances under which the animal was seized.
   (D) A statement that, in order to receive a postseizure hearing, the owner or person authorized to keep the animal, or his or her agent, shall request the hearing by signing and returning an enclosed declaration of ownership or right to keep the animal to the agency providing the notice within 10 days, including weekends and holidays, of the date of seizure. The declaration may be returned by personal delivery or mail.
   (E) A statement that the full cost of caring for and treating any animal properly seized under this section is a lien on the animal and that the animal shall not be returned to the owner until the charges are paid, and that failure to request or to attend a scheduled hearing shall result in liability for the cost.

2. The postseizure hearing shall be conducted within 48 hours of the request, excluding weekends and holidays. The seizing agency may authorize its own officer or employee to conduct the hearing if the hearing officer is not the same person who directed the seizure or impoundment of the animal and is not junior in rank to that person. The agency may utilize the services of a hearing officer from outside the agency for the purposes of complying with this section.

3. Failure of the owner or keeper, or of his or her agent, to request or to attend a scheduled hearing shall result in a forfeiture of any right to a postseizure hearing or right to challenge his or her liability for costs incurred.

4. The agency, department, or society employing the person who directed the seizure shall be responsible for the costs incurred for caring and treating the animal, if it is determined in the postseizure hearing that the seizing officer did not have reasonable grounds to believe very prompt action, including seizure of the animal, was required to protect the health or safety of the animal or the health or safety of others. If it is determined the seizure was justified, the owner or keeper shall be personally liable to the seizing agency for the full cost of the seizure and care of the animal. The charges for the seizure and care of the animal shall be a lien on the animal. The animal shall not be returned to its owner until the charges are paid and the owner demonstrates to the satisfaction of the seizing agency or the hearing officer that the owner can and will provide the necessary care for the animal.
Where the need for immediate seizure is not present and prior to the commencement of any criminal proceedings authorized by this section, the agency shall provide the owner or keeper of the animal, if known or ascertainable after reasonable investigation, with the opportunity for a hearing prior to any seizure or impoundment of the animal. The owner shall produce the animal at the time of the hearing unless, prior to the hearing, the owner has made arrangements with the agency to view the animal upon request of the agency, or unless the owner can provide verification that the animal was humanely destroyed. Any person who willfully fails to produce the animal or provide the verification is guilty of an infraction, punishable by a fine of not less than two hundred fifty dollars ($250) nor more than one thousand dollars ($1,000).

(1) The agency shall cause a notice to be affixed to a conspicuous place where the animal was situated or personally deliver a notice stating the grounds for believing the animal should be seized under subdivision (a) or (b). The notice shall include all of the following:

(A) The name, business address, and telephone number of the officer providing the notice.

(B) A description of the animal to be seized, including any identification upon the animal.

(C) The authority and purpose for the possible seizure or impoundment.

(D) A statement that, in order to receive a hearing prior to any seizure, the owner or person authorized to keep the animal, or his or her agent, shall request the hearing by signing and returning the enclosed declaration of ownership or right to keep the animal to the officer providing the notice within two days, excluding weekends and holidays, of the date of the notice.

(E) A statement that the cost of caring for and treating any animal properly seized under this section is a lien on the animal, that any animal seized shall not be returned to the owner until the charges are paid, and that failure to request or to attend a scheduled hearing shall result in a conclusive determination that the animal may properly be seized and that the owner shall be liable for the charges.

(2) The preseizure hearing shall be conducted within 48 hours, excluding weekends and holidays, after receipt of the request. The seizing agency may authorize its own officer or employee to conduct the hearing if the hearing officer is not the same person who requests the seizure or impoundment of the animal and is not junior in rank to that person. The agency may utilize the services of a hearing officer from outside the agency for the purposes of complying with this section.

(3) Failure of the owner or keeper, or his or her agent, to request or to attend a scheduled hearing shall result in a forfeiture of any right to a preseizure hearing or right to challenge his or her liability for costs incurred pursuant to this section.

(4) The hearing officer, after the hearing, may affirm or deny the owner’s or keeper’s right to custody of the animal and, if reasonable grounds are established, may order the seizure or impoundment of the animal for care and treatment.

(h) If any animal is properly seized under this section or pursuant to a search warrant, the owner or keeper shall be personally liable to the seizing agency for the full cost of the seizure and care of the animal. Further, if the charges for the seizure or impoundment and any other charges permitted under this section are not paid within 14 days of the seizure, or if the owner, within 14 days of notice of availability of the animal to be returned, fails to pay charges permitted under this section and take possession of the animal, the animal shall be deemed to have been abandoned and may be disposed of by the seizing agency.

(i) If the animal requires veterinary care and the humane society or public agency is not assured, within 14 days of the seizure of the animal, that the owner will provide the necessary care, the animal shall not be returned to its owner and shall be deemed to have been abandoned and may be disposed of by the seizing agency. A veterinarian may humanely destroy an impounded animal without regard to the prescribed holding period when it has been determined that the animal has incurred severe injuries or is incurably crippled. A veterinarian also may immediately humanely destroy an impounded animal afflicted with a serious contagious disease unless the owner or his or
her agent immediately authorizes treatment of the animal by a veterinarian at the expense of the owner or agent.

(j) No animal properly seized under this section or pursuant to a search warrant shall be returned to its owner until the owner can demonstrate to the satisfaction of the seizing agency or hearing officer that the owner can and will provide the necessary care for the animal.

(k)(1) In the case of cats and dogs, prior to the final disposition of any criminal charges, the seizing agency or prosecuting attorney may file a petition in a criminal action requesting that, prior to that final disposition, the court issue an order forfeiting the animal to the city, county, or seizing agency. The petitioner shall serve a true copy of the petition upon the defendant and the prosecuting attorney.

(2) Upon receipt of the petition, the court shall set a hearing on the petition. The hearing shall be conducted within 14 days after the filing of the petition, or as soon as practicable.

(3) The petitioner shall have the burden of establishing beyond a reasonable doubt that, even in the event of an acquittal of the criminal charges, the owner will not legally be permitted to retain the animal in question. If the court finds that the petitioner has met its burden, the court shall order the immediate forfeiture of the animal as sought by the petition.

(4) Nothing in this subdivision is intended to authorize a seizing agency or prosecuting attorney to file a petition to determine an owner’s ability to legally retain an animal pursuant to paragraph (3) of subdivision (l) if a petition has previously been filed pursuant to this subdivision.

(l)(1) Upon the conviction of a person charged with a violation of this section, or Section 597 or 597a, all animals lawfully seized and impounded with respect to the violation shall be adjudged by the court to be forfeited and shall thereupon be transferred to the impounding officer or appropriate public entity for proper adoption or other disposition. A person convicted of a violation of this section shall be personally liable to the seizing agency for all costs of impoundment from the time of seizure to the time of proper disposition. Upon conviction, the court shall order the convicted person to make payment to the appropriate public entity for the costs incurred in the housing, care, feeding, and treatment of the seized or impounded animals. Each person convicted in connection with a particular animal may be held jointly and severally liable for restitution for that particular animal. The payment shall be in addition to any other fine or sentence ordered by the court.

(2) The court may also order, as a condition of probation, that the convicted person be prohibited from owning, possessing, caring for, or residing with, animals of any kind, and require the convicted person to immediately deliver all animals in his or her possession to a designated public entity for adoption or other lawful disposition or provide proof to the court that the person no longer has possession, care, or control of any animals. In the event of the acquittal or final discharge without conviction of the person charged, if the animal is still impounded, the animal has not been previously deemed abandoned pursuant to subdivision (h), the court has not ordered that the animal be forfeited pursuant to subdivision (k), the court shall, on demand, direct the release of seized or impounded animals to the defendant upon a showing of proof of ownership.

(3) Any questions regarding ownership shall be determined in a separate hearing by the court where the criminal case was finally adjudicated and the court shall hear testimony from any persons who may assist the court in determining ownership of the animal. If the owner is determined to be unknown or the owner is prohibited or unable to retain possession of the animals for any reason, the court shall order the animals to be released to the appropriate public entity for adoption or other lawful disposition. This section is not intended to cause the release of any animal, bird, reptile, amphibian, or fish seized or impounded pursuant to any other statute, ordinance, or municipal regulation. This section shall not prohibit the seizure or impoundment of animals as evidence as provided for under any other provision of law.

(m) It shall be the duty of all peace officers, humane society officers, and animal control officers to use all currently acceptable methods of identification, both electronic
and otherwise, to determine the lawful owner or caretaker of any seized or impounded animal. It shall also be their duty to make reasonable efforts to notify the owner or caretaker of the whereabouts of the animal and any procedures available for the lawful recovery of the animal and, upon the owner’s and caretaker’s initiation of recovery procedures, retain custody of the animal for a reasonable period of time to allow for completion of the recovery process. Efforts to locate or contact the owner or caretaker and communications with persons claiming to be the owner or caretaker shall be recorded and maintained and be made available for public inspection.

§ 597.4. Prohibition against selling or giving away live animals as part of commercial transactions; Violations; Penalties; Notice of charge

(2) Display or offer for sale, or display or offer to give away as part of a commercial transaction, a live animal, if the act of selling or giving away the live animal is to occur on any street, highway, public right-of-way, parking lot, carnival, or boardwalk.

(b)(1) A person who violates this section for the first time shall be guilty of an infraction punishable by a fine not to exceed two hundred fifty dollars ($250).

(2) A person who violates this section for the first time and by that violation either causes or permits any animal to suffer or be injured, or causes or permits any animal to be placed in a situation in which its life or health may be endangered, shall be guilty of a misdemeanor.

(3) A person who violates this section for a second or subsequent time shall be guilty of a misdemeanor.

(c) A person who is guilty of a misdemeanor violation of this section shall be punishable by a fine not to exceed one thousand dollars ($1,000) per violation. The court shall weigh the gravity of the violation in setting the fine.

(d) A notice describing the charge and the penalty for a violation of this section may be issued by any peace officer, animal control officer, as defined in Section 830.9, or humane officer qualified pursuant to Section 14502 or 14503 of the Corporations Code.

§ 597.9. Owning, possessing, or maintaining any animal within specified period after conviction; Punishment; Exemption; Hearing

(a) Except as provided in subdivision (c) or (d), any person who has been convicted of a misdemeanor violation of subdivision (a) or (b) of Section 597, or Section 597a, 597b, 597f, 597g, 597i, or 597j, and who, within five years after the conviction, owns, possesses, maintains, has custody of, resides with, or cares for any animal is guilty of a public offense, punishable by a fine of one thousand dollars ($1,000).

(b) Except as provided in subdivision (c) or (d), any person who has been convicted of a felony violation of subdivision (a) or (b) of Section 597, or Section 597b or 597.5, and who, within 10 years after the conviction, owns, possesses, maintains, has custody of, resides with, or cares for any animal is guilty of a public offense, punishable by a fine of one thousand dollars ($1,000).

(c)(1) In cases of owners of livestock, as defined in Section 14205 of the Food and Agricultural Code, a court may, in the interest of justice, exempt a defendant from the injunction required under subdivision (a) or (b), as it would apply to livestock, if the defendant files a petition with the court to establish, and does establish by a preponderance of the evidence, that the imposition of the provisions of this section would result in substantial or undue economic hardship to the defendant’s livelihood and that the defendant has the ability to properly care for all livestock in his or her possession.

(2) Upon receipt of a petition from the defendant, the court shall set a hearing to be conducted within 30 days after the filing of the petition. The petitioner shall serve a copy of the petition upon the prosecuting attorney 10 calendar days prior to the requested hearing. The court shall grant the petition for exemption from subdivision (a) or (b) unless the prosecuting attorney shows by a preponderance of the evidence that either or both of the criteria for exemption under this subdivision are untrue.

(d)(1) A defendant may petition the court to reduce the duration of the mandatory ownership prohibition. Upon receipt of a petition from the defendant, the court shall set a hearing to be conducted within 30 days after the filing of the petition. The petitioner shall serve a copy of the petition upon the prosecuting attorney 10 calendar days prior to the requested hearing. At the hearing, the petitioner shall have the burden of establishing by a preponderance of the evidence all of the following:

(A) He or she does not present a danger to animals.

(B) He or she has the ability to properly care for all animals in his or her possession.

(C) He or she has successfully completed all classes or counseling ordered by the court.

(2) If the petitioner has met his or her burden, the court may reduce the mandatory ownership prohibition and may order that the defendant comply with reasonable and unannounced inspections by animal control agencies or law enforcement.

§ 597f. Abandoned or neglected animals; Duties of public authorities; Euthanasia

(a) Every owner, driver, or possessor of any animal, who permits the animal to be in any building, enclosure, lane, street, square, or lot, of any city, city and county, or judicial district, without proper care and attention, shall, on conviction, be deemed guilty of a misdemeanor. And it shall be the duty of any peace officer, officer of the humane society, or officer of a pound or animal regulation department of a public agency, to take possession of the animal so abandoned or neglected and care for the animal until it is redeemed by the owner or claimant, and the cost of caring for the animal shall be a lien on the animal until the charges are paid. Every sick, disabled, infirm, or crippled animal, except a dog or cat, which shall be abandoned in any city, city and county, or judicial district, may, if after due search no owner can be found therefor, be killed by the officer; and it shall be the duty of all peace officers, an officer of such society, or officer of a pound or animal regulation department of a public agency to cause the animal to be killed on information of such abandonment. The officer may likewise take charge of any animal,
including a dog or cat, that by reason of lameness, sickness, feebleness, or neglect, is unfit for the labor it is performing, or that in any other manner is being cruelly treated; and, if the animal is not then in the custody of its owner, the officer shall give notice thereof to the owner, if known, and may provide suitable care for the animal until it is deemed to be in a suitable condition to be delivered to the owner, and any necessary expenses which may be incurred for taking care of and keeping the animal shall be a lien thereon, to be paid before the animal can be lawfully recovered.

(b) It shall be the duty of all officers of pounds or humane societies, and animal regulation departments of public agencies to convey, and for police and sheriff departments, to cause to be conveyed all injured cats and dogs found without their owners in a public place directly to a veterinarian known by the officer or agency to be a veterinarian that ordinarily treats dogs and cats for a determination of whether the animal shall be immediately and humanely destroyed or shall be hospitalized under proper care and given emergency treatment.

If the owner does not redeem the animal within the locally prescribed waiting period, the veterinarian may personally perform euthanasia on the animal; or, if the animal is treated and recovers from its injuries, the veterinarian may keep the animal for purposes of adoption, provided the responsible animal control agency has first been contacted and has refused to take possession of the animal.

Whenever any animal is transferred pursuant to this subdivision to a veterinarian in a clinic, such as an emergency clinic which is not in continuous operation, the veterinarian may, in turn, transfer the animal to an appropriate facility.

If the veterinarian determines that the animal shall be hospitalized under proper care and given emergency treatment, the costs of any services which are provided pending the owner's inquiry to the agency, department, or society shall be paid from the dog license fees, fines, and fees for impounding dogs in the city, county, or city and county in which the animal was licensed or if the animal is unlicensed the jurisdiction in which the animal was found, subject to the provision that this cost be repaid by the animal's owner. No veterinarian shall be criminally or civilly liable for any decision which he or she makes or services which he or she provides pursuant to this section.

(c) An animal control agency which takes possession of an animal pursuant to subdivision (b), shall keep records of the whereabouts of the animal for a 72-hour period from the time of possession and those records shall be available to inspection by the public upon request.

(d) Notwithstanding any other provisions of this section, any officer of a pound or animal regulation department or humane society, or any officer of a police or sheriff’s department may, with the approval of his or her immediate superior, humanely destroy any abandoned animal in the field in any case where the animal is too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal.

PART 2
Of Criminal Procedure
TITLE 6
Pleadings and Proceedings Before Trial
CHAPTER 2.5
Special Proceedings in Narcotics and Drug Abuse Cases

Section 1000. Cases governed by chapter; Programs eligible for referrals; Requirement of drug testing
§ 1000. Cases governed by chapter; Programs eligible for referrals; Requirement of drug testing

(a) This chapter shall apply whenever a case is before any court upon an accusatory pleading for a violation of Section 11350, 11357, 11364, or 11365, paragraph (2) of subdivision (b) of Section 11375, Section 11377, or Section 11550 of the Health and Safety Code, or subdivision (b) of Section 23222 of the Vehicle Code, or Section 11358 of the Health and Safety Code if the marijuana planted, cultivated, harvested, dried, or processed is for personal use, or Section 11368 of the Health and Safety Code if the narcotic drug was secured by a fictitious prescription and is for the personal use of the defendant and was not sold or furnished to another, or subdivision (d) of Section 653f if the solicitation was for acts directed to personal use only, or Section 381 or subdivision (f) of Section 647 of the Penal Code, if for being under the influence of a controlled substance, or Section 4060 of the Business and Professions Code, and it appears to the prosecuting attorney that, except as provided in subdivision (b) of Section 11357 of the Health and Safety Code, all of the following apply to the defendant:

(1) The defendant has no conviction for any offense involving controlled substances prior to the alleged commission of the charged offense.

(2) The offense charged did not involve a crime of violence or threatened violence.

(3) There is no evidence of a violation relating to narcotics or restricted dangerous drugs other than a violation of the sections listed in this subdivision.

(4) The defendant's record does not indicate that probation or parole has ever been revoked without thereafter being completed.

(5) The defendant's record does not indicate that he or she has successfully completed or been terminated from diversion or deferred entry of judgment pursuant to this chapter within five years prior to the alleged commission of the charged offense.

(6) The defendant has no prior felony conviction within five years prior to the alleged commission of the charged offense.

(b) The prosecuting attorney shall review his or her file to determine whether or not paragraphs (1) to (6), inclusive, of subdivision (a) apply to the defendant. Upon the agreement of the prosecuting attorney, law enforcement, the public defender, and the presiding judge of the criminal division of the superior court, or a judge designated by the presiding judge, this procedure shall be completed as soon as possible after the initial filing of the charges. If the defendant is found eligible, the prosecuting attorney shall file with the court a declaration in writing or state for the record the grounds upon which the determination is based, and shall make this information available to the defendant and his or her attorney. This procedure is intended to allow the court to set the hearing for deferred entry of judgment at the arraignment. If the defendant is found ineligible for deferred entry of judgment, the prosecuting attorney shall file with the court a declaration in writing or state for the record the grounds upon which the determination is based, and shall make this information available to the defendant and his or her attorney. The sole remedy of a defendant who is found ineligible for deferred entry of judgment is a postconviction appeal.

(c) All referrals for deferred entry of judgment granted by the court pursuant to this chapter shall be made only to programs that have been certified by the county drug program administrator pursuant to Chapter 1.5 (commencing with Section 1211) of Title 8, or to programs that provide services at no cost to the participant and have been deemed by the court and the county drug program administrator to be credible and effective. The defendant may request to be referred to a program in any county, as long as that program meets the criteria set forth in this subdivision.

(d) Deferred entry of judgment for a violation of Section 11368 of the Health and Safety Code shall not prohibit any administrative agency from taking disciplinary action against a licensee or from denying a license. Nothing in this subdivision shall be construed to expand or restrict the provisions of Section 1000.4.

(e) Any defendant who is participating in a program referred to in this section may be required to undergo analysis of his or her urine for the purpose of testing for the presence of any drug as part of the program. However, urine analysis results shall not be admissible as a basis for any new criminal prosecution or proceeding.

Of Judgment and Execution  

CHAPTER 1  

The Judgment  

(a)(1) In any case in which a defendant has fulfilled the conditions of probation for the entire period of probation, or has been discharged prior to the termination of the period of probation, or in any other case in which a court, in its discretion and the interests of justice, determines that a defendant should be granted the relief available under this section, the defendant shall, at any time after the termination of the period of probation, if he or she is not then serving a sentence for any offense, or charged with the commission of any offense, be permitted by the court to withdraw his or her plea of guilty or plea of nolo contendere and enter a plea of not guilty; or, if he or she has been convicted after a plea of not guilty, the court shall set aside the verdict of guilty; and, in either case, the court shall thereupon dismiss the accusations or information against the defendant and except as noted below, he or she shall thereafter be released from all penalties and disabilities resulting from the offense of which he or she has been convicted, except as provided in Section 13555 of the Vehicle Code. The probationer shall be informed, in his or her probation papers, of this right and privilege and his or her right, if any, to petition for a certificate of rehabilitation and pardon. The probationer may make the application and change of plea in person or by attorney, or by the probation officer authorized in writing. However, in any subsequent prosecution of the defendant for any other offense, the prior conviction may be pleaded and proved and shall have the same effect as if probation had not been granted or the accusation or information dismissed. The order shall state, and the probationer shall be informed, that the order does not relieve him or her of the obligation to disclose the conviction in response to any direct question contained in any questionnaire or application for public office, for licensure by any state or local agency, or for contracting with the California State Lottery Commission.

(2) Dismissal of an accusation or information pursuant to this section does not permit a person to own, possess, or have in his or her custody or control any firearm or prevent his or her conviction under Chapter 2 (commencing with Section 29800) of Division 9 of Title 4 of Part 6.

(3) Dismissal of an accusation or information underlying a conviction pursuant to this section does not permit a person prohibited from holding public office as a result of that conviction to hold public office.

(4) This subdivision shall apply to all applications for relief under this section which are filed on or after November 23, 1970.

(b) Subdivision (a) of this section does not apply to any misdemeanor that is within the provisions of Section 42002.1 of the Vehicle Code, to any violation of subdivision (c)
of Section 286, Section 288, subdivision (c) of Section 288a, Section 288.5, subdivision (j) of Section 289, Section 311.1, 311.2, 311.3, or 311.11, or any felony conviction pursuant to subdivision (d) of Section 261.5, or to any infraction.

(c)(1) Except as provided in paragraph (2), subdivision (a) does not apply to a person who receives a notice to appear or is otherwise charged with a violation of an offense described in subdivisions (a) to (e), inclusive, of Section 12810 of the Vehicle Code.

(2) If a defendant who was convicted of a violation listed in paragraph (1) petitions the court, the court in its discretion and in the interests of justice, may order the relief provided pursuant to subdivision (a) to that defendant.

(d) A person who petitions for a change of plea or setting aside of a verdict under this section may be required to reimburse the court for the actual costs of services rendered, whether or not the petition is granted and the records are sealed or expunged, at a rate to be determined by the court not to exceed one hundred fifty dollars ($150), and to reimburse the county for the actual costs of services rendered, whether or not the petition is granted and the records are sealed or expunged, at a rate to be determined by the county board of supervisors not to exceed one hundred fifty dollars ($150), and to reimburse any city for the actual costs of services rendered, whether or not the petition is granted and the records are sealed or expunged, at a rate to be determined by the city council not to exceed one hundred fifty dollars ($150). Ability to make this reimbursement shall be determined by the court using the standards set forth in paragraph (2) of subdivision (g) of Section 987.8 and shall not be a prerequisite to a person’s eligibility under this section. The court may order reimbursement in any case in which the petitioner appears to have the ability to pay, without undue hardship, all or any portion of the costs for services established pursuant to this subdivision.

(e)(1) Relief shall not be granted under this section unless the prosecuting attorney has been given 15 days’ notice of the petition for relief. The probation officer shall notify the prosecuting attorney when a petition is filed, pursuant to this section.

(2) It shall be presumed that the prosecuting attorney has received notice if proof of service is filed with the court.

(f) If, after receiving notice pursuant to subdivision (e), the prosecuting attorney fails to appear and object to a petition for dismissal, the prosecuting attorney may not move to set aside or otherwise appeal the grant of that petition.

(g) Notwithstanding the above provisions or any other provision of law, the Governor shall have the right to pardon a person convicted of a violation of subdivision (c) of Section 286, Section 288, subdivision (c) of Section 288a, Section 288.5, or subdivision (j) of Section 289, if there are extraordinary circumstances.

§ 1203.4a. Change of plea and dismissal of charges against nonprobationed misdemeanant or defendant who has committed infraction after performance of sentence; Release from penalties and disabilities; Subsequent offenses; Applicability; Reimbursement; Petition by written declaration

(a) Every defendant convicted of a misdemeanor and not granted probation, and every defendant convicted of an infraction shall, at any time after the lapse of one year from the date of pronouncement of judgment, if he or she has fully complied with and performed the sentence of the court, is not then serving a sentence for any offense and is not under charge of commission of any crime, and has, since the pronouncement of judgment, lived an honest and upright life and has conformed to and obeyed the laws of the land, be permitted by the court to withdraw his or her plea of guilty or nolo contendere and enter a plea of not guilty; or if he or she has been convicted after a plea...
of not guilty, the court shall set aside the verdict of guilty; and in either case the court shall thereupon dismiss the accusatory pleading against the defendant, who shall thereafter be released from all penalties and disabilities resulting from the offense of which he or she has been convicted, except as provided in Chapter 3 (commencing with Section 29900) of Division 9 of Title 4 of Part 6 of this code or Section 13555 of the Vehicle Code.

(b) If a defendant does not satisfy all the requirements of subdivision (a), after a lapse of one year from the date of pronouncement of judgment, a court, in its discretion and in the interests of justice, may grant the relief available pursuant to subdivision (a) to a defendant convicted of an infraction, or of a misdemeanor and not granted probation, or both, if he or she has fully complied with and performed the sentence of the court, is not then serving a sentence for any offense, and is not under charge of commission of any crime.

(c)(1) The defendant shall be informed of the provisions of this section, either orally or in writing, at the time he or she is sentenced. The defendant may make an application and change of plea in person or by attorney, or by the probation officer authorized in writing, provided that, in any subsequent prosecution of the defendant for any other offense, the prior conviction may be pleaded and proved and shall have the same effect as if relief had not been granted pursuant to this section.

(2) Dismissal of an accusatory pleading pursuant to this section does not permit a person to own, possess, or have in his or her custody or control any firearm or prevent his or her conviction under Chapter 2 (commencing with Section 29800) of Division 9 of Title 4 of Part 6.

(3) Dismissal of an accusatory pleading underlying a conviction pursuant to this section does not permit a person prohibited from holding public office as a result of that conviction to hold public office.

(d) This section applies to any conviction specified in subdivision (a) or (b) that occurred before, as well as those occurring after, the effective date of this section, except that this section does not apply to the following:

(1) A misdemeanor violation of subdivision (c) of Section 288.

(2) Any misdemeanor falling within the provisions of Section 42002.1 of the Vehicle Code.

(3) Any infraction falling within the provisions of Section 42001 of the Vehicle Code.

(e) A person who petitions for a dismissal of a charge under this section may be required to reimburse the county and the court for the cost of services rendered at a rate to be determined by the county board of supervisors for the county and by the court for the court, not to exceed sixty dollars ($60), and to reimburse any city for the cost of services rendered at a rate to be determined by the city council not to exceed sixty dollars ($60). Ability to make this reimbursement shall be determined by the court using the procedures set forth in paragraph (2) of subdivision (g) of Section 987.8 and shall not be a prerequisite to a person's eligibility under this section. The court may order reimbursement in any case in which the petitioner appears to have the ability to pay, without undue hardship, all or any portion of the cost for services established pursuant to this subdivision.

(f) A petition for dismissal of an infraction pursuant to this section shall be by written declaration, except upon a showing of compelling need. Dismissal of an infraction shall not be granted under this section unless the prosecuting attorney has been given at least 15 days' notice of the petition for dismissal. It shall be presumed that the prosecuting attorney has received notice if proof of service is filed with the court.

(g) Any determination of amount made by a court under this section shall be valid only if either (1) made under procedures adopted by the Judicial Council or (2) approved by the Judicial Council.

§ 1210.1. Possession of Controlled Substances; Probation; Exceptions

(a) Notwithstanding any other provision of law, and except as provided in subdivision (b), any person convicted of a nonviolent drug possession offense shall receive probation. As a condition of probation the court shall require participation in and completion of an appropriate drug treatment program. The court shall impose appropriate drug testing as a condition of probation. The court may also impose, as a condition of probation, participation in vocational training, family counseling, literacy training and/or community service. A court may not impose incarceration as an additional condition of probation. Aside from the limitations imposed in this subdivision, the trial court is not otherwise limited in the type of probation conditions it may impose. Probation shall be imposed by suspending the imposition of sentence. No person shall be denied the opportunity to benefit from the provisions of the Substance Abuse and Crime Prevention Act of 2000 based solely upon evidence of a co-occurring psychiatric or developmental disorder. To the greatest extent possible, any person who is convicted of, and placed on probation pursuant to this section for a nonviolent drug possession offense shall be monitored by the court through the use of a dedicated court calendar and the incorporation of a collaborative court model of oversight that includes close collaboration with treatment providers and probation, drug testing commensurate with treatment needs, and supervision of progress through review hearings.

In addition to any fine assessed under other provisions of law, the trial judge may require any person convicted of a nonviolent drug possession offense who is reasonably able to do so to contribute to the cost of his or her own placement in a drug treatment program.

(b) Subdivision (a) shall not apply to any of the following:

(1) Any defendant who previously has been convicted of one or more violent or serious felonies as defined in subdivision (c) of Section 667.5 or subdivision (c) of Section 1192.7, respectively, unless the nonviolent drug possession offense occurred after a period of five years in which the defendant remained free of both prison custody and the commission of an offense that results in a felony conviction other than a nonviolent drug possession offense, or a misdemeanor conviction involving physical injury or the threat of physical injury to another person.

(2) Any defendant who, in addition to one or more nonviolent drug possession offenses, has been convicted in the same proceeding of a misdemeanor not related to the use of drugs or any felony.

(3) Any defendant who, while armed with a deadly weapon, with the intent to use the same as a deadly weapon, unlawfully possesses or is under the influence of any controlled substance identified in Section 11054, 11055, 11056, 11057, or 11058 of the Health and Safety Code.

(4) Any defendant who refuses drug treatment as a condition of probation.

(5) Any defendant who has two separate convictions for nonviolent drug possession offenses, has participated in two separate courses of drug treatment pursuant to subdivision (a), and is found by the court, by clear and convincing evidence, to be unamenable to any and all forms of available drug treatment, as defined in subdivision (b) of Section 1210. Notwithstanding any other provision of law, the trial court shall sentence that defendant to 30 days in jail.

(c)(1) Any defendant who has previously been convicted of at least three non-drug-related felonies for which the defendant has served three separate prison terms within the meaning of subdivision (b) of Section 667.5 shall be presumed eligible for treatment under subdivision (a). The court may exclude the defendant from treatment under subdivision (a) where the court, pursuant to the motion of the prosecutor or its own motion, finds that the defendant poses a present danger to the safety of others and would not benefit from a drug treatment program. The court shall, on the record, state its findings, the reasons for those findings.

(2) Any defendant who has previously been convicted of a misdemeanor or felony at least five times within the prior 30 months shall be presumed to be eligible for treatment
under subdivision (a). The court may exclude the defendant from treatment under subdivision (a) if the court, pursuant to the motion of the prosecutor, or on its own motion, finds that the defendant poses a present danger to the safety of others or would not benefit from a drug treatment program. The court shall, on the record, state its findings and the reasons for those findings.

(d) Within seven days of an order imposing probation under subdivision (a), the probation department shall notify the drug treatment provider designated to provide drug treatment under subdivision (a). Within 30 days of receiving that notice, the treatment provider shall prepare a treatment plan and forward it to the probation department for distribution to the court and counsel. The treatment provider shall provide to the probation department standardized treatment progress reports, with minimum data elements as determined by the department, including all drug testing results. At a minimum, the reports shall be provided to the court every 90 days, or more frequently, as the court directs.

(1) If at any point during the course of drug treatment the treatment provider notifies the probation department and the court that the defendant is unamenable to the drug treatment being provided, but may be amenable to other drug treatments or related programs, the probation department may move the court to modify the terms of probation, or on its own motion, the court may modify the terms of probation after a hearing to ensure that the defendant receives the alternative drug treatment or program.

(2) If at any point during the course of drug treatment the treatment provider notifies the probation department and the court that the defendant is unamenable to the drug treatment provided and all other forms of drug treatment programs pursuant to subdivision (b) of Section 1210, the probation department may move to revoke probation. At the revocation hearing, if it is proved that the defendant is unamenable to all drug treatment programs pursuant to subdivision (b) of Section 1210, the court may revoke probation.

(3) Drug treatment services provided by subdivision (a) as a required condition of probation may not exceed 12 months, unless the court makes a finding supported by the record, that the continuation of treatment services beyond 12 months is necessary for drug treatment to be successful. If that finding is made, the court may order up to two six-month extensions of treatment services. The provision of treatment services under the Substance Abuse and Crime Prevention Act of 2000 shall not exceed 24 months.

(e)(1) At any time after completion of drug treatment and the terms of probation, the court shall conduct a hearing, and if the court finds that the defendant successfully completed drug treatment, and substantially complied with the conditions of probation, including refraining from the use of drugs after the completion of treatment, the conviction on which the probation was based shall be set aside and the court shall dismiss the indictment, complaint, or information against the defendant. In addition, except as provided in paragraphs (2) and (3), both the arrest and the conviction shall be deemed never to have occurred. The defendant may additionally petition the court for a dismissal of charges at any time after completion of the prescribed course of drug treatment. Except as provided in paragraph (2) or (3), the defendant shall thereafter be released from all penalties and disabilities resulting from the offense of which he or she has been convicted.

(2) Dismissal of an indictment, complaint, or information pursuant to paragraph (1) does not permit a person to own, possess, or have in his or her custody or control any firearm capable of being concealed upon the person or prevent his or her conviction under Chapter 2 (commencing with Section 29800) of Division 9 of Title 4 of Part 6.

(3) Except as provided below, after an indictment, complaint, or information is dismissed pursuant to paragraph (1), the defendant may indicate in response to any question concerning his or her prior criminal record that he or she was not arrested or convicted for the offense. Except as provided below, a record pertaining to an arrest or conviction resulting in successful completion of a drug treatment program under this section may not, without the defendant's consent, be used in any way that could result in the denial of any employment, benefit, license, or certificate.

Regardless of his or her successful completion of drug treatment, the arrest and conviction on which the probation was based may be recorded by the Department of
Justice and disclosed in response to any peace officer application request or any law
enforcement inquiry. Dismissal of an information, complaint, or indictment under this
section does not relieve a defendant of the obligation to disclose the arrest and
conviction in response to any direct question contained in any questionnaire or
application for public office, for a position as a peace officer as defined in Section 830, for
licensure by any state or local agency, for contracting with the California State Lottery, or
for purposes of serving on a jury.

(f)(1) If probation is revoked pursuant to the provisions of this subdivision, the
defendant may be incarcerated pursuant to otherwise applicable law without regard to
the provisions of this section. The court may modify or revoke probation if the alleged
violation is proved.

(2) If a defendant receives probation under subdivision (a), and violates that probation
either by committing an offense that is not a nonviolent drug possession offense, or by
violating a non-drug-related condition of probation, and the state moves to revoke
probation, the court may remand the defendant for a period not exceeding 30 days
during which time the court may receive input from treatment, probation, the state, and
the defendant, and the court may conduct further hearings as it deems appropriate to
determine whether or not probation should be reinstated under this section. If the court
reinstates the defendant on probation, the court may modify the treatment plan and any
other terms of probation, and continue the defendant in a treatment program under the
Substance Abuse and Crime Prevention Act of 2000. If the court reinstates the defendant
on probation, the court may, after receiving input from the treatment provider and
probation, if available, intensify or alter the treatment plan under subdivision (a), and
impose sanctions, including jail sanctions not exceeding 30 days, a tool to enhance
treatment compliance.

(3)(A) If a defendant receives probation under subdivision (a), and violates that
probation either by committing a nonviolent drug possession offense, or a misdemeanor
for simple possession or use of drugs or drug paraphernalia, being present where drugs
are used, or failure to register as a drug offender, or any activity similar to those listed in
subdivision (d) of Section 1210, or by violating a drug-related condition of probation, and
the state moves to revoke probation, the court shall conduct a hearing to determine
whether probation shall be revoked. The trial court shall revoke probation if the alleged
probation violation is proved and the state proves by a preponderance of the evidence
that the defendant poses a danger to the safety of others. If the court does not revoke
probation, it may intensify or alter the drug treatment plan and in addition, if the
violation does not involve the recent use of drugs as a circumstance of the violation,
including, but not limited to, violations relating to failure to appear at treatment or court,
noncompliance with treatment, and failure to report for drug testing, the court may
impose sanctions including jail sanctions that may not exceed 48 hours of continuous
custody as a tool to enhance treatment compliance and impose other changes in the
terms and conditions of probation. The court shall consider, among other factors, the
seriousness of the violation, previous treatment compliance, employment, education,
vocational training, medical conditions, medical treatment, including narcotics replace-
ment treatment, and including the opinion of the defendant’s licensed and treating
physician if immediately available and presented at the hearing, child support obliga-
tions, and family responsibilities. The court shall consider additional conditions of
probation, which may include, but are not limited to, community service and supervised
work programs. If one of the circumstances of the violation involves recent drug use, as
well as other circumstances of violation, and the circumstance of recent drug use is
demonstrated to the court by satisfactory evidence and a finding made on the record, the
court may, after receiving input from treatment and probation, if available, direct the
defendant to enter a licensed detoxification or residential treatment facility, and if there
is no bed immediately available in that type of facility, the court may order that the
defendant be confined in a county jail for detoxification purposes only, if the jail offers
detoxification services, for a period not to exceed 10 days. The detoxification services
must provide narcotic replacement therapy for those defendants presently actually
receiving narcotic replacement therapy.
(B) If a defendant receives probation under subdivision (a), and for the second time violates that probation either by committing a nonviolent drug possession offense, or a misdemeanor for simple possession or use of drugs or drug paraphernalia, being present where drugs are used, or failure to register as a drug offender, or any activity similar to those listed in subdivision (d) of Section 1210, or by violating a drug-related condition of probation, and the state moves to revoke probation, the court shall conduct a hearing to determine whether probation shall be revoked. The trial court shall revoke probation if the alleged probation violation is proved and the state proves by a preponderance of the evidence either that the defendant poses a danger to the safety of others or is unamenable to drug treatment. In determining whether a defendant is unamenable to drug treatment, the court may consider, to the extent relevant, whether the defendant (i) has committed a serious violation of rules at the drug treatment program, (ii) has repeatedly committed violations of program rules that inhibit the defendant's ability to function in the program, or (iii) has continually refused to participate in the program or asked to be removed from the program. If the court does not revoke probation, it may intensify or alter the drug treatment plan, and may, in addition, if the violation does not involve the recent use of drugs as a circumstance of the violation, including, but not limited to, violations relating to failure to appear at treatment or court, noncompliance with treatment, and failure to report for drug testing, impose sanctions including jail sanctions that may not exceed 120 hours of continuous custody as a tool to enhance treatment compliance and impose other changes in the terms and conditions of probation. The court shall consider, among other factors, the seriousness of the violation, previous treatment compliance, employment, education, vocational training, medical conditions, medical treatment, including narcotics replacement treatment, and including the opinion of the defendant's licensed and treating physician if immediately available and presented at the hearing, child support obligations, and family responsibilities. The court shall consider additional conditions of probation, which may include, but are not limited to, community service and supervised work programs. If one of the circumstances of the violation involves recent drug use, as well as other circumstances of violation, and the circumstance of recent drug use is demonstrated to the court by satisfactory evidence and a finding made on the record, the court may, after receiving input from treatment and probation, if available, direct the defendant to enter a licensed detoxification or residential treatment facility, and if there is no bed immediately available in the facility, the court may order that the defendant be confined in a county jail for detoxification purposes only, if the jail offers detoxification services, for a period not to exceed 10 days. Detoxification services must provide narcotic replacement therapy for those defendants presently actually receiving narcotic replacement therapy.

(C) If a defendant receives probation under subdivision (a), and for the third or subsequent time violates that probation either by committing a nonviolent drug possession offense, or by violating a drug-related condition of probation, and the state moves for a third or subsequent time to revoke probation, the court shall conduct a hearing to determine whether probation shall be revoked. If the alleged probation violation is proved, the defendant is not eligible for continued probation under subdivision (a) unless the court determines that the defendant is not a danger to the community and would benefit from further treatment under subdivision (a). The court may then either intensify or alter the treatment plan under subdivision (a) or transfer the defendant to a highly structured drug court. If the court continues the defendant in treatment under subdivision (a), or drug court, the court may impose appropriate sanctions including jail sanctions as the court deems appropriate.

(D) If a defendant on probation at the effective date of this act for a nonviolent drug possession offense violates that probation either by committing a nonviolent drug possession offense, or a misdemeanor for simple possession or use of drugs or drug paraphernalia, being present where drugs are used, or failure to register as a drug offender, or any activity similar to those listed in subdivision (d) of Section 1210, or by violating a drug-related condition of probation, and the state moves to revoke probation, the court shall conduct a hearing to determine whether probation shall be revoked. The trial court shall revoke probation if the alleged probation violation is proved and the
state proves by a preponderance of the evidence that the defendant poses a danger to the safety of others. If the court does not revoke probation, it may modify or alter the treatment plan, and in addition, if the violation does not involve the recent use of drugs as a circumstance of the violation, including, but not limited to, violations relating to failure to appear at treatment or court, noncompliance with treatment, and failure to report for drug testing, the court may impose sanctions including jail sanctions that may not exceed 48 hours of continuous custody as a tool to enhance treatment compliance and impose other changes in the terms and conditions of probation. The court shall consider, among other factors, the seriousness of the violation, previous treatment compliance, employment, education, vocational training, medical conditions, medical treatment, including narcotics replacement treatment, and including the opinion of the defendant’s licensed and treating physician if immediately available and presented at the hearing, child support obligations, and family responsibilities. The court shall consider additional conditions of probation, which may include, but are not limited to, community service and supervised work programs. If one of the circumstances of the violation involves recent drug use, as well as other circumstances of violation, and the circumstance of recent drug use is demonstrated to the court by satisfactory evidence and a finding made on the record, the court may, after receiving input from treatment and probation, if available, direct the defendant to enter a licensed detoxification or residential treatment facility, and if there is no bed immediately available in that type of facility, the court may order that the defendant be confined in a county jail for detoxification purposes only, if the jail offers detoxification services, for a period not to exceed 10 days. The detoxification services must provide narcotic replacement therapy for those defendants presently actually receiving narcotic replacement therapy.

(E) If a defendant on probation at the effective date of this act for a nonviolent drug possession offense violates that probation a second time either by committing a nonviolent drug possession offense, or a misdemeanor for simple possession or use of drugs or drug paraphernalia, being present where drugs are used, or failure to register as a drug offender, or any activity similar to those listed in subdivision (d) of Section 1210, or by violating a drug-related condition of probation, and the state moves for a second time to revoke probation, the court shall conduct a hearing to determine whether probation shall be revoked. The trial court shall revoke probation if the alleged probation violation is proved and the state proves by a preponderance of the evidence that the defendant poses a danger to the safety of others or that the defendant is unamenable to drug treatment. If the court does not revoke probation, it may modify or alter the treatment plan, and in addition, if the violation does not involve the recent use of drugs as a circumstance of the violation, including, but not limited to, violations relating to failure to appear at treatment or court, noncompliance with treatment, and failure to report for drug testing, the court may impose sanctions including jail sanctions that may not exceed 120 hours of continuous custody as a tool to enhance treatment compliance and impose other changes in the terms and conditions of probation. The court shall consider, among other factors, the seriousness of the violation, previous treatment compliance, employment, education, vocational training, medical conditions, medical treatment including narcotics replacement treatment, and including the opinion of the defendant’s licensed and treating physician if immediately available and presented at the hearing, child support obligations, and family responsibilities. The court shall consider additional conditions of probation, which may include, but are not limited to, community service and supervised work programs. If one of the circumstances of the violation involves recent drug use, as well as other circumstances of violation, and the circumstance of recent drug use is demonstrated to the court by satisfactory evidence and a finding made on the record, the court may, after receiving input from treatment and probation, if available, direct the defendant to enter a licensed detoxification or residential treatment facility, and if there is no bed immediately available in that type of facility, the court may order that the defendant be confined in a county jail for detoxification purposes only, if the jail offers detoxification services, for a period not to exceed 10 days. The detoxification services must provide narcotic replacement therapy for those defendants presently actually receiving narcotic replacement therapy.
(F) If a defendant on probation at the effective date of this act for a nonviolent drug offense violates that probation a third or subsequent time either by committing a nonviolent drug possession offense, or by violating a drug-related condition of probation, and the state moves for a third or subsequent time to revoke probation, the court shall conduct a hearing to determine whether probation shall be revoked. If the alleged probation violation is proved, the defendant is not eligible for continued probation under subdivision (a), unless the court determines that the defendant is not a danger to the community and would benefit from further treatment under subdivision (a). The court may then either intensify or alter the treatment plan under subdivision (a) or transfer the defendant to a highly structured drug court. If the court continues the defendant in treatment under subdivision (a), or drug court, the court may impose appropriate sanctions including jail sanctions.

(g) The term “drug-related condition of probation” shall include a probationer’s specific drug treatment regimen, employment, vocational training, educational programs, psychological counseling, and family counseling.

public utility’s or cable corporation’s request for state summary criminal history
information for purposes of employing current or prospective employees who may be

Requests for information pursuant to this paragraph shall be in accordance with the process described in Sections 11122 to 11124, inclusive. The response shall be provided to the foreign government or its designee and to the individual who requested the information.

(d) Whenever an authorized request for state summary criminal history information pertains to a person whose fingerprints are on file with the Department of Justice and the department has no criminal history of that person, and the information is to be used for employment, licensing, or certification purposes, the fingerprint card accompanying the request for information, if any, may be stamped “no criminal record” and returned to the person or entity making the request.

(e) Whenever state summary criminal history information is furnished as the result of an application and is to be used for employment, licensing, or certification purposes, the Department of Justice may charge the person or entity making the request a fee that it determines to be sufficient to reimburse the department for the cost of furnishing the information. In addition, the Department of Justice may add a surcharge to the fee to fund maintenance and improvements to the systems from which the information is obtained. Notwithstanding any other law, any person or entity required to pay a fee to the department for information received under this section may charge the applicant a fee sufficient to reimburse the person or entity for this expense. All moneys received by the department pursuant to this section, Sections 11105.3 and 26190, and former Section 13588 of the Education Code shall be deposited in a special account in the General Fund to be available for expenditure by the department to offset costs incurred pursuant to those sections and for maintenance and improvements to the systems from which the information is obtained upon appropriation by the Legislature.

(f) Whenever there is a conflict, the processing of criminal fingerprints and fingerprints of applicants for security guard or alarm agent registrations or firearms qualification permits submitted pursuant to Section 7583.9, 7583.23, 7596.3, or 7598.4 of the Business and Professions Code shall take priority over the processing of other applicant fingerprints.

(g) It is not a violation of this section to disseminate statistical or research information obtained from a record, provided that the identity of the subject of the record is not disclosed.

(h) It is not a violation of this section to include information obtained from a record in (1) a transcript or record of a judicial or administrative proceeding or (2) any other public record if the inclusion of the information in the public record is authorized by a court, statute, or decisional law.

(i) Notwithstanding any other law, the Department of Justice or any state or local law enforcement agency may require the submission of fingerprints for the purpose of conducting summary criminal history information checks that are authorized by law.

(j) The state summary criminal history information shall include any finding of mental incompetence pursuant to Chapter 6 (commencing with Section 1367) of Title 10 of Part 2 arising out of a complaint charging a felony offense specified in Section 290.

(2) Notwithstanding any other law, whenever state summary criminal history information is initially furnished pursuant to paragraph (1), the Department of Justice shall disseminate the following information:
(A) Every conviction rendered against the applicant.
(B) Every arrest for an offense for which the applicant is presently awaiting trial, whether the applicant is incarcerated or has been released on bail or on his or her own recognizance pending trial.
(C) Every arrest or detention, except for an arrest or detention resulting in an exoneration, provided, however, that where the records of the Department of Justice do not contain a disposition for the arrest, the Department of Justice first makes a genuine effort to determine the disposition of the arrest.

(E) Every date and agency name associated with all retained peace officer or nonsworn law enforcement agency employee preemployment criminal offender record information search requests.
(F) Sex offender registration status of the applicant.

However, information concerning an arrest shall not be disclosed if the records of the Department of Justice indicate or if the genuine effort reveals that the subject was exonerated, successfully completed a diversion or deferred entry of judgment program, or the arrest was deemed a detention.
(D) Every date and agency name associated with all retained peace officer or nonsworn law enforcement agency employee preemployment criminal offender record information search requests.
(E) Sex offender registration status of the applicant.

(3) Notwithstanding the requirements of the sections referenced in paragraph (1) of this subdivision, the Department of Justice shall not disseminate information about an
arrest subsequently deemed a detention or an arrest that resulted in either the successful completion of a diversion program or exoneration.

(B) Every arrest for a violation or attempted violation of an offense specified in subdivision (a) of Section 15660 of the Welfare and Institutions Code for which the applicant is presently awaiting trial, whether the applicant is incarcerated or has been released on bail or on his or her own recognizance pending trial.

(C) Sex offender registration status of the applicant.

§ 20.1003 Definitions.
As used in this part:
Absorbed dose means the energy imparted by ionizing radiation per unit mass of irradiated material. The units of absorbed dose are the rad and the gray (Gy).
Accelerator-produced radioactive material means any material made radioactive by a particle accelerator.
Activity is the rate of disintegration (transformation) or decay of radioactive material. The units of activity are the curie (Ci) and the becquerel (Bq).
Adult means an individual 18 or more years of age.
Airborne radioactive material means radioactive material dispersed in the air in the form of dusts, fumes, particulates, mists, vapors, or gases.
Airborne radioactivity area means a room, enclosure, or area in which airborne radioactive materials, composed wholly or partly of licensed material, exist in concentrations —
(1) In excess of the derived air concentrations (DACs) specified in appendix B, to §§ 20.1001-20.2401, or
(2) To such a degree that an individual present in the area without respiratory protective equipment could exceed, during the hours an individual is present in a week, an intake of 0.6 percent of the annual limit on intake (ALI) or 12 DAC-hours.
Air-purifying respirator means a respirator with an air-purifying filter, cartridge, or canister that removes specific air contaminants by passing ambient air through the air-purifying element.
ALARA (acronym for “as low as is reasonably achievable”) means making every reasonable effort to maintain exposures to radiation as far below the dose limits in this part as is practical consistent with the purpose for which the licensed activity is undertaken, taking into account the state of technology, the economics of improvements in relation to state of technology, the economics of improvements in relation to benefits to the public health and safety, and other societal and socioeconomic considerations, and in relation to utilization of nuclear energy and licensed materials in the public interest.
Annual limit on intake (ALI) means the derived limit for the amount of radioactive material taken into the body of an adult worker by inhalation or ingestion in a year. ALI is the smaller value of intake of a given radionuclide in a year by the reference man that would result in a committed effective dose equivalent of 5 rems (0.05 Sv) or a committed dose equivalent of 50 rems (0.5 Sv) to any individual organ or tissue. (ALI values for intake
by ingestion and by inhalation of selected radionuclides are given in Table 1, Columns 1 and 2, of appendix B to §§ 20.1001-20.2401.

Assigned protection factor (APF) means the expected workplace level of respiratory protection that would be provided by a properly functioning respirator or a class of respirators to properly fitted and trained users. Operationally, the inhaled concentration can be estimated by dividing the ambient airborne concentration by the APF.

Atmosphere-supplying respirator means a respirator that supplies the respirator user with breathing air from a source independent of the ambient atmosphere, and includes supplied-air respirators (SARs) and self-contained breathing apparatus (SCBA) units.

Background radiation means radiation from cosmic sources; naturally occurring radioactive material, including radon (except as a decay product of source or special nuclear material); and global fallout as it exists in the environment from the testing of nuclear explosive devices or from past nuclear accidents such as Chernobyl that contribute to background radiation and are not under the control of the licensee. “Background radiation” does not include radiation from source, byproduct, or special nuclear materials regulated by the Commission.

Bioassay (radiobioassay) means the determination of kinds, quantities or concentrations, and, in some cases, the locations of radioactive material in the human body, whether by direct measurement (in vivo counting) or by analysis and evaluation of materials excreted or removed from the human body.

Byproduct material means—

(1) Any radioactive material (except special nuclear material) yielded in, or made radioactive by, exposure to the radiation incident to the process of producing or using special nuclear material;

(2) The tailings or wastes produced by the extraction or concentration of uranium or thorium from ores processed primarily for its source material content, including discrete surface wastes resulting from uranium solution extraction processes. Underground ore bodies depleted by these solution extraction operations do not constitute “byproduct material” within this definition;

(3)(i) Any discrete source of radium-226 that is produced, extracted, or converted after extraction, before, on, or after August 8, 2005, for use for a commercial, medical, or research activity; or

(ii) Any material that—

(A) Has been made radioactive by use of a particle accelerator; and

(B) Is produced, extracted, or converted after extraction, before, on, or after August 8, 2005, for use for a commercial, medical, or research activity; and

(4) Any discrete source of naturally occurring radioactive material, other than source material, that—

(i) The Commission, in consultation with the Administrator of the Environmental Protection Agency, the Secretary of Energy, the Secretary of Homeland Security, and the head of any other appropriate Federal agency, determines would pose a threat similar to the threat posed by a discrete source of radium-226 to the public health and safety or the common defense and security; and

(ii) Before, on, or after August 8, 2005, is extracted or converted after extraction for use in a commercial, medical, or research activity.

Class (or lung class or inhalation class) means a classification scheme for inhaled material according to its rate of clearance from the pulmonary region of the lung. Materials are classified as D, W, or Y, which applies to a range of clearance half-times: for Class D (Days) of less than 10 days, for Class W (Weeks) from 10 to 100 days, and for Class Y (Years) of greater than 100 days.

Collective dose is the sum of the individual doses received in a given period of time by a specified population from exposure to a specified source of radiation.

Committed dose equivalent ($H_{150}$) means the dose equivalent to organs or tissues of reference (T) that will be received from an intake of radioactive material by an individual during the 50-year period following the intake.
Committed effective dose equivalent \( (H_{E,50}) \) is the sum of the products of the weighting factors applicable to each of the body organs or tissues that are irradiated and the committed dose equivalent to these organs or tissues \( (H_{E,50} = \sum w_i H_{T,50}) \).

(1) Release of the property for unrestricted use and termination of the license; or

(2) Release of the property under restricted conditions and termination of the license.

Deep-dose equivalent \( (H_d) \), which applies to external whole-body exposure, is the dose equivalent at a tissue depth of 1 cm \((1000 \text{ mg}^2)\).

DAC values are given in Table 1, Column 3, of appendix B to §§ 20.1001-20.2401.

Derived air concentration-hour (DAC-hour) is the product of the concentration of radioactive material in air (expressed as a fraction or multiple of the derived air concentration for each radionuclide) and the time of exposure to that radionuclide, in hours. A licensee may take 2,000 DAC-hours to represent one ALI, equivalent to a committed effective dose equivalent of 5 rems \((0.05 \text{ Sv})\).

Discrete source means a radionuclide that has been processed so that its concentration within a material has been purposely increased for use for commercial, medical, or research activities.

Disposable respirator means a respirator for which maintenance is not intended and that is designed to be discarded after excessive breathing resistance, sorbent exhaustion, physical damage, or end-of-service-life renders it unsuitable for use. Examples of this type of respirator are a disposable half-mask respirator or a disposable escape-only self-contained breathing apparatus (SCBA).

HISTORY

NOTES

§ 20.1004 Units of radiation dose.

(a) Definitions. As used in this part, the units of radiation dose are:

Gray (Gy) is the SI unit of absorbed dose. One gray is equal to an absorbed dose of 1 Joule/kilogram (100 rads).

\(^1\)0.30 results from 0.06 for each of 5 “remainder” organs (excluding the skin and the lens of the eye) that receive the highest doses.

\(^2\)For the purpose of weighting the external whole body dose (for adding it to the internal dose), a single weighting factor, \( w_T = 1.0 \), has been specified. The use of other weighting factors for external exposure will be approved on a case-by-case basis until such time as specific guidance is issued.
Rad is the special unit of absorbed dose. One rad is equal to an absorbed dose of 100 ergs/gram or 0.01 joule/kilogram (0.01 gray).

Rem is the special unit of any of the quantities expressed as dose equivalent. The dose equivalent in rems is equal to the absorbed dose in rads multiplied by the quality factor (1 rem = 0.01 sievert).

Sievert is the SI unit of any of the quantities expressed as dose equivalent. The dose equivalent in sieverts is equal to the absorbed dose in grays multiplied by the quality factor (1 Sv = 100 rems).

(b) As used in this part, the quality factors for converting absorbed dose to dose equivalent are shown in table 1004(b).1.

(c) If it is more convenient to measure the neutron fluence rate than to determine the neutron dose equivalent rate in rems per hour or sieverts per hour, as provided in paragraph (b) of this section, 1 rem (0.01 Sv) of neutron radiation of unknown energies may, for purposes of the regulations in this part, be assumed to result from a total fluence of 25 million neutrons per square centimeter incident upon the body. If sufficient information exists to estimate the approximate energy distribution of the neutrons, the licensee may use the fluence rate per unit dose equivalent or the appropriate Q value from table 1004(b).2 to convert a measured tissue dose in rads to dose equivalent in rems.

§ 20.1005 Units of radioactivity.
For the purposes of this part, activity is expressed in the special unit of curies (Ci) or in the SI unit of becquerels (Bq), or their multiples, or disintegrations (transformations) per unit of time.

(a) One becquerel = 1 disintegration per second (s⁻¹).
(b) One curie = $3.7 \times 10^{10}$ disintegrations per second = $3.7 \times 10^{10}$ becquerels = $2.22 \times 10^{12}$ disintegrations per minute.

NOTES

§ 20.1008 Implementation.
(a) [Reserved].
(b) The applicable section of §§ 20.1001-20.2402 must be used in lieu of requirements in the standards for protection against radiation in effect prior to January 1, 1994 that are cited in license conditions or technical specifications, except as specified in paragraphs

(c), (d), and (e) of this section. If the requirements of this part are more restrictive than the existing license condition, then the licensee shall comply with this part unless exempted by paragraph (d) of this section.

(c) Any existing license condition or technical specification that is more restrictive than a requirement in §§ 20.1001-20.2402 remains in force until there is a technical specification change, license amendment, or license renewal.

(d) If a license condition or technical specification exempted a licensee from a requirement in the standards for protection against radiation in effect prior to January 1, 1994, it continues to exempt a licensee from the corresponding provision of §§20.1001-20.2402.

(e) If a license condition cites provisions in requirements in the standards for protection against radiation in effect prior to January 1, 1994 and there are no corresponding provisions in §§ 20.1001-20.2402, then the license condition remains in force until there is a technical specification change, license amendment, or license renewal that modifies or removes this condition.

SUBPART B
RADIATION PROTECTION PROGRAMS

Section
20.1101. Radiation protection programs.

§ 20.1101 Radiation protection programs.
(a) Each licensee shall develop, document, and implement a radiation protection program commensurate with the scope and extent of licensed activities and sufficient to ensure compliance with the provisions of this part. (See § 20.2102 for recordkeeping requirements relating to these programs.)
(b) The licensee shall use, to the extent practical, procedures and engineering controls based upon sound radiation protection principles to achieve occupational doses and doses to members of the public that are as low as is reasonably achievable (ALARA).
(c) The licensee shall periodically (at least annually) review the radiation protection program content and implementation.
(d) To implement the ALARA requirements of § 20.1101 (b), and notwithstanding the requirements in § 20.1301 of this part, a constraint on air emissions of radioactive material to the environment, excluding Radon-222 and its daughters, shall be established by licensees other than those subject to § 50.34a, such that the individual member of the public likely to receive the highest dose will not be expected to receive a total effective dose equivalent in excess of 10 mrem (0.1 mSv) per year from these emissions. If a licensee subject to this requirement exceeds this dose constraint, the licensee shall report the exceedance as provided in § 20.2203 and promptly take appropriate corrective action to ensure against recurrence.

SUBPART C
OCCUPATIONAL DOSE LIMITS

Section
20.1202. Compliance with requirements for summation of external and internal doses.
20.1203. Determination of external dose from airborne radioactive material.
20.1204. Determination of internal exposure.
20.1206. Planned special exposures.
20.1208. Dose equivalent to an embryo/fetus.

§ 20.1201 Occupational dose limits for adults.
(a) The licensee shall control the occupational dose to individual adults, except for planned special exposures under § 20.1206, to the following dose limits.
(1) An annual limit, which is the more limiting of —
(i) The total effective dose equivalent being equal to 5 rems (0.05 Sv); or
(ii) The sum of the deep-dose equivalent and the committed dose equivalent to any individual organ or tissue other than the lens of the eye being equal to 50 rems (0.5 Sv).
(2) The annual limits to the lens of the eye, to the skin of the whole body, and to the skin of the extremities, which are —
(i) A lens dose equivalent of 15 rems (0.15 Sv), and
(ii) A shallow-dose equivalent of 50 rem (0.5 Sv) to the skin of the whole body or to the skin of any extremity.
(b) Doses received in excess of the annual limits, including doses received during accidents, emergencies, and planned special exposures, must be subtracted from the
limits for planned special exposures that the individual may receive during the current year (see § 20.1206(e)(1)) and during the individual’s lifetime (see § 20.1206(e)(2)).

(c) When the external exposure is determined by measurement with an external personal monitoring device, the deep-dose equivalent must be used in place of the effective dose equivalent, unless the effective dose equivalent is determined by a dosimetry method approved by the NRC. The assigned deep-dose equivalent must be for the part of the body receiving the highest exposure. The assigned shallow-dose equivalent must be the dose averaged over the contiguous 10 square centimeters of skin receiving the highest exposure. The deep-dose equivalent, lens-dose equivalent, and shallow-dose equivalent may be assessed from surveys or other radiation measurements for the purpose of demonstrating compliance with the occupational dose limits, if the individual monitoring device was not in the region of highest potential exposure, or the results of individual monitoring are unavailable.

(d) Derived air concentration (DAC) and annual limit on intake (ALI) values are presented in table 1 of Appendix B to Part 20 and may be used to determine the individual’s dose (see § 20.2106) and to demonstrate compliance with the occupational dose limits.

(e) In addition to the annual dose limits, the licensee shall limit the soluble uranium intake by an individual to 10 milligrams in a week in consideration of chemical toxicity (see footnote 3 of Appendix B to Part 20).

(f) The licensee shall reduce the dose that an individual may be allowed to receive in the current year by the amount of occupational dose received while employed by any other person (see § 20.2104(e)).

HISTORY

NOTES

§ 20.1202 Compliance with requirements for summation of external and internal doses.

(a) If the licensee is required to monitor under both §§ 20.1502(a) and (b), the licensee shall demonstrate compliance with the dose limits by summing external and internal doses. If the licensee is required to monitor only under § 20.1502(a) or only under § 20.1502(b), then summation is not required to demonstrate compliance with the dose limits. The licensee may demonstrate compliance with the requirements for summation of external and internal doses by meeting one of the conditions specified in paragraph (b) of this section and the conditions in paragraphs (c) and (d) of this section.

(b) Intake by inhalation. If the only intake of radionuclides is by inhalation, the total effective dose equivalent limit is not exceeded if the sum of the deep-dose equivalent divided by the total effective dose equivalent limit, and one of the following, does not exceed unity:

1 The sum of the fractions of the inhalation ALI for each radionuclide, or
2 The total number of derived air concentration-hours (DAC-hours) for all radionuclides divided by 2,000, or
3 The sum of the calculated committed effective dose equivalents to all significantly irradiated organs or tissues (T) calculated from bioassay data using appropriate biological models and expressed as a fraction of the annual limit.

(c) Intake by oral ingestion. If the occupationally exposed individual also receives an organ or tissue is deemed to be significantly irradiated if, for that organ or tissue, the product of the weighting factor, W, and the committed dose equivalent, HT,50, per unit intake is greater than 10 percent of the maximum weighted value of HT,50, (i.e., WT HT,50) per unit intake for any organ or tissue.
§ 20.1203 Determination of external dose from airborne radioactive material.

Licensees shall, when determining the dose from airborne radioactive material, include the contribution to the deep-dose equivalent, lens dose equivalent, and shallow-dose equivalent from external exposure to the radioactive cloud (see appendix B to part 20, footnotes 1 and 2).

Note: Airborne radioactivity measurements and DAC values should not be used as the primary means to assess the deep-dose equivalent when the airborne radioactive material includes radionuclides other than noble gases or if the cloud of airborne radioactive material is not relatively uniform. The determination of the deep-dose equivalent to an individual should be based upon measurements using instruments or individual monitoring devices.

HISTORY

NOTES

§ 20.1204 Determination of internal exposure.

(a) For purposes of assessing dose used to determine compliance with occupational dose equivalent limits, the licensee shall, when required under § 20.1502, take suitable and timely measurements of —

(1) Concentrations of radioactive materials in air in work areas; or
(2) Quantities of radionuclides in the body; or
(3) Quantities of radionuclides excreted from the body; or
(4) Combinations of these measurements.

(b) Unless respiratory protective equipment is used, as provided in § 20.1703, or the assessment of intake is based on bioassays, the licensee shall assume that an individual inhales radioactive material at the airborne concentration in which the individual is present.

(c) When specific information on the physical and biochemical properties of the radionuclides taken into the body or the behavior or the material in an individual is known, the licensee may —

(1) Use that information to calculate the committed effective dose equivalent, and, if used, the licensee shall document that information in the individual’s record; and
(2) Upon prior approval of the Commission, adjust the DAC or ALI values to reflect the actual physical and chemical characteristics of airborne radioactive material (e.g., aerosol size distribution or density); and
(3) Separately assess the contribution of fractional intakes of Class D, W, or Y compounds of a given radionuclide (see Appendix B to Part 20) to the committed effective dose equivalent.

(d) If the licensee chooses to assess intakes of Class Y material using the measurements given in § 20.1204(a)(2) or (3), the licensee may delay the recording and reporting of the assessments for periods up to 7 months, unless otherwise required by §§ 20.2202 or 20.2203, in order to permit the licensee to make additional measurements basic to the assessments.

(e) If the identity and concentration of each radionuclide in a mixture are known, the
fraction of the DAC applicable to the mixture for use in calculating DAC-hours must be either —
(1) The sum of the ratios of the concentration to the appropriate DAC value (e.g., D, W, Y) from Appendix B to Part 20 for each radio-nuclide in the mixture; or
(2) The ratio of the total concentration for all radionuclides in the mixture to the most restrictive DAC value for any radionuclide in the mixture.
(f) If the identity of each radionuclide in a mixture is known, but the concentration of one or more of the radionuclides in the mixture is not known, the DAC for the mixture must be the most restrictive DAC of any radionuclide in the mixture.
(g) When a mixture of radionuclides in air exists, licensees may disregard certain radionuclides in the mixture if —
(1) The licensee uses the total activity of the mixture in demonstrating compliance with the dose limits in § 20.1201 and in complying with the monitoring requirements in § 20.1502(b), and
(2) The concentration of any radionuclide disregarded is less than 10 percent of its DAC, and
(3) The sum of these percentages for all of the radionuclides disregarded in the mixture does not exceed 30 percent.
(h)(1) In order to calculate the committed effective dose equivalent, the licensee may assume that the inhalation of one ALI, or an exposure of 2,000 DAC-hours, results in a committed effective dose equivalent of 5 rems (0.05 Sv) for radionuclides that have their ALIs or DACs based on the committed effective dose equivalent.
(2) When the ALI (and the associated DAC) is determined by the nonstochastic organ dose limit of 50 rems (0.5 Sv), the intake of radionuclides that would result in a committed effective dose equivalent of 5 rems (0.05 Sv) (the stochastic ALI) is listed in parentheses in table 1 of Appendix B to Part 20. In this case, the licensee may, as a simplifying assumption, use the stochastic ALIs to determine committed effective dose equivalent. However, if the licensee uses the stochastic ALIs, the licensee must also demonstrate that the limit in § 20.1201(a)(1)(ii) is met.

§ 20.1206 Planned special exposures.
A licensee may authorize an adult worker to receive doses in addition to and accounted for separately from the doses received under the limits specified in § 20.1201 provided that each of the following conditions is satisfied —
(a) The licensee authorizes a planned special exposure only in an exceptional situation when alternatives that might avoid the dose estimated to result from the planned special exposure are unavailable or impractical.
(b) The licensee (and employer if the employer is not the licensee) specifically authorizes the planned special exposure, in writing, before the exposure occurs.
(c) Before a planned special exposure, the licensee ensures that the individuals involved are —
(1) Informed of the purpose of the planned operation;
(2) Informed of the estimated doses and associated potential risks and specific radiation levels or other conditions that might be involved in performing the task; and
(3) Instructed in the measures to be taken to keep the dose ALARA considering other risks that may be present.
(d) Prior to permitting an individual to participate in a planned special exposure, the licensee ascertains prior doses as required by § 20.2104(b) during the lifetime of the individual for each individual involved.
(e) Subject to § 20.1201(b), the licensee does not authorize a planned special exposure that would cause an individual to receive a dose from all planned special exposures and all doses in excess of the limits to exceed —
(1) The numerical values of any of the dose limits in § 20.1201(a) in any year; and
(2) Five times the annual dose limits in § 20.1201(a) during the individual’s lifetime.
(f) The licensee maintains records of the conduct of a planned special exposure in accordance with § 20.2105 and submits a written report in accordance with § 20.2204.

(g) The licensee records the best estimate of the dose resulting from the planned special exposure in the individual’s record and informs the individual, in writing, of the dose within 30 days from the date of the planned special exposure. The dose from planned special exposures is not to be considered in controlling future occupational dose of the individual under § 20.1201(a) but is to be included in evaluations required by § 20.1206 (d) and (e).

SUBPART D
RADIATION DOSE LIMITS FOR INDIVIDUAL MEMBERS OF THE PUBLIC

Section
20.1301. Dose limits for individual members of the public.
20.1302. Compliance with dose limits for individual members of the public.

§ 20.1301 Dose limits for individual members of the public.

(a) Each licensee shall conduct operations so that —

(1) The total effective dose equivalent to individual members of the public from the licensed operation does not exceed 0.1 rem (1 mSv) in a year, exclusive of the dose contributions from background radiation, from any medical administration the individual has received, from exposure to individuals administered radioactive material and released
§ 20.1302 Compliance with dose limits for individual members of the public.

(a) The licensee shall make or cause to be made, as appropriate, surveys of radiation levels in unrestricted and controlled areas and radioactive materials in effluents released to unrestricted and controlled areas to demonstrate compliance with the dose limits for individual members of the public in § 20.1301.

(b) A licensee shall show compliance with the annual dose limit in § 20.1301 by —

(1) Demonstrating by measurement or calculation that the total effective dose equivalent to the individual likely to receive the highest dose from the licensed operation does not exceed the annual dose limit; or

(2) Demonstrating that —

(i) The annual average concentrations of radioactive material released in gaseous and liquid effluents at the boundary of the unrestricted area do not exceed the values specified in table 2 of Appendix B to Part 20; and

(ii) If an individual were continuously present in an unrestricted area, the dose from external sources would not exceed 0.002 rem (0.02 mSv) in an hour and 0.05 rem (0.5 mSv) in a year.

(c) Upon approval from the Commission, the licensee may adjust the effluent concentration values in Appendix B to Part 20, table 2, for members of the public, to take into account the actual physical and chemical characteristics of the effluents (e.g., aerosol size distribution, solubility, density, radioactive decay equilibrium, chemical form).
§ 20.1401 General provisions and scope.

(a) The criteria in this subpart apply to the decommissioning of facilities licensed under parts 30, 40, 50, 52, 60, 61, 63, 70, and 72 of this chapter, and release of part of a facility or site for unrestricted use in accordance with § 50.83 of this chapter, as well as other facilities subject to the Commission’s jurisdiction under the Atomic Energy Act of 1954, as amended, and the Energy Reorganization Act of 1974, as amended. For high-level and low-level waste disposal facilities (10 CFR parts 60, 61, and 63), the criteria apply only to ancillary surface facilities that support radioactive waste disposal activities. The criteria do not apply to uranium and thorium recovery facilities already subject to appendix A to 10 CFR part 40 or the uranium solution extraction facilities.

(b) The criteria in this subpart do not apply to sites which:

1. Have been decommissioned prior to the effective date of the rule in accordance with criteria identified in the Site Decommissioning Management Plan (SDMP) Action Plan of April 16, 1992 (57 FR 13389);

2. Have previously submitted and received Commission approval on a license termination plan (LTP) or decommissioning plan that is compatible with the SDMP Action Plan criteria; or

3. Submit a sufficient LTP or decommissioning plan before August 20, 1998 and such LTP or decommissioning plan is approved by the Commission before August 20, 1999 and in accordance with the criteria identified in the SDMP Action Plan, except that if an EIS is required in the submittal, there will be a provision for day-for-day extension.

(c) After a site has been decommissioned and the license terminated in accordance with the criteria in this subpart, or after part of a facility or site has been released for unrestricted use in accordance with § 50.83 of this chapter and in accordance with the criteria in this subpart, the Commission will require additional cleanup only, if based on new information, it determines that the criteria of this subpart were not met and residual radioactivity remaining at the site could result in significant threat to public health and safety.

(d) When calculating TEDE to the average member of the critical group the licensee shall determine the peak annual TEDE dose expected within the first 1000 years after decommissioning.

§ 20.1402 Radiological criteria for unrestricted use.

A site will be considered acceptable for unrestricted use if the residual radioactivity that is distinguishable from background radiation results in a TEDE to an average member of the critical group that does not exceed 25 mrem (0.25 mSv) per year, including that from groundwater sources of drinking water, and the residual radioactivity has been reduced to levels that are as low as reasonably achievable (ALARA). Determination of the levels
which are ALARA must take into account consideration of any detriments, such as deaths from transportation accidents, expected to potentially result from decontamination and waste disposal.

HISTORY

NOTES

§ 20.1403 Criteria for license termination under restricted conditions.

A site will be considered acceptable for license termination under restricted conditions if:

(a) The licensee can demonstrate that further reductions in residual radioactivity necessary to comply with the provisions of § 20.1402 would result in net public or environmental harm or were not being made because the residual levels associated with restricted conditions are ALARA. Determination of the levels which are ALARA must take into account consideration of any detriments, such as traffic accidents, expected to potentially result from decontamination and waste disposal;

(b) The licensee has made provisions for legally enforceable institutional controls that provide reasonable assurance that the TEDE from residual radioactivity distinguishable from background to the average member of the critical group will not exceed 25 mrem (0.25 mSv) per year;

(c) The licensee has provided sufficient financial assurance to enable an independent third party, including a governmental custodian of a site, to assume and carry out responsibilities for any necessary control and maintenance of the site. Acceptable financial assurance mechanisms are —

(1) Funds placed into a trust segregated from the licensee's assets and outside the licensee's administrative control, and in which the adequacy of the trust funds is to be assessed based on an assumed annual 1 percent real rate of return on investment;

(2) A statement of intent in the case of Federal, State, or local Government licensees, as described in § 30.35(f)(4) of this chapter; or

(3) When a governmental entity is assuming custody and ownership of a site, an arrangement that is deemed acceptable by such governmental entity.

(d) The licensee has submitted a decommissioning plan or License Termination Plan (LTP) to the Commission indicating the licensee’s intent to decommission in accordance with §§ 30.35(d), 40.42(d), 50.82(a) and (b), 70.38(d), or 72.54 of this chapter, and specifying that the licensee intends to decommission by restricting use of the site. The licensee shall document in the LTP or decommissioning plan how the advice of individuals and institutions in the community who may be affected by the decommissioning has been sought and incorporated, as appropriate, following analysis of that advice.

(1) Licensees proposing to decommission by restricting use of the site shall seek advice from such affected parties regarding the following matters concerning the proposed decommissioning —

(i) Whether provisions for institutional controls proposed by the licensee;

(A) Will provide reasonable assurance that the TEDE from residual radioactivity distinguishable from background to the average member of the critical group will not exceed 25 mrem (0.25 mSv) TEDE per year;

(B) Will be enforceable; and

(C) Will not impose undue burdens on the local community or other affected parties.

(ii) Whether the licensee has provided sufficient financial assurance to enable an independent third party, including a governmental custodian of a site, to assume and carry out responsibilities for any necessary control and maintenance of the site;

(2) In seeking advice on the issues identified in § 20.1403(d)(1), the licensee shall provide for:

(i) Participation by representatives of a broad cross section of community interests who may be affected by the decommissioning;

§ 20.1404 Alternate criteria for license termination.

(a) The Commission may terminate a license using alternate criteria greater than the dose criterion of §§ 20.1402, 20.1403(b), and 20.1403(d)(1)(i)(A), if the licensee —

(1) Provides assurance that public health and safety would continue to be protected, and that it is unlikely that the dose from all man-made sources combined, other than medical, would be more than the 1 mSv/y (100 mrem/y) limit of subpart D, by submitting an analysis of possible sources of exposure;

(2) Has employed to the extent practical restrictions on site use according to the provisions of § 20.1403 in minimizing exposures at the site; and

(3) Reduces doses to ALARA levels, taking into consideration any detriments such as traffic accidents expected to potentially result from decontamination and waste disposal.

(4) Has submitted a decommissioning plan or License Termination Plan (LTP) to the Commission indicating the licensee’s intent to decommission in accordance with §§ 30.36(d), 40.42(d), 50.82 (a) and (b), 70.38(d), or 72.54 of this chapter, and specifying that the licensee proposes to decommission by use of alternate criteria. The licensee shall document in the decommissioning plan or LTP how the advice of individuals and institutions in the community who may be affected by the decommissioning has been sought and addressed, as appropriate, following analysis of that advice. In seeking such advice, the licensee shall provide for:

(i) Participation by representatives of a broad cross section of community interests who may be affected by the decommissioning;

(ii) An opportunity for a comprehensive, collective discussion on the issues by the participants represented; and

(iii) A publicly available summary of the results of all such discussions, including a description of the individual viewpoints of the participants on the issues and the extent of agreement and disagreement among the participants on the issues.

(5) Has provided sufficient financial assurance in the form of a trust fund to enable
an independent third party, including a governmental custodian of a site, to assume and carry out responsibilities for any necessary control and maintenance of the site.

(b) The use of alternate criteria to terminate a license requires the approval of the Commission after consideration of the NRC staff's recommendations that will address any comments provided by the Environmental Protection Agency and any public comments submitted pursuant to §20.1405.

Subpart G
Control of Exposure from External Sources in Restricted Areas

§ 20.1601 Control of access to high radiation areas.
(a) The licensee shall ensure that each entrance or access point to a high radiation area has one or more of the following features—
(1) A control device that, upon entry into the area, causes the level of radiation to be reduced below that level at which an individual might receive a deep-dose equivalent of 0.1 rem (1 mSv) in 1 hour at 30 centimeters from the radiation source or from any surface that the radiation penetrates;
(2) A control device that energizes a conspicuous visible or audible alarm signal so that the individual entering the high radiation area and the supervisor of the activity are made aware of the entry; or
(3) Entryways that are locked, except during periods when access to the areas is required, with positive control over each individual entry.
(b) In place of the controls required by paragraph (a) of this section for a high radiation area, the licensee may substitute continuous direct or electronic surveillance that is capable of preventing unauthorized entry.
(c) A licensee may apply to the Commission for approval of alternative methods for controlling access to high radiation areas.

(e) Control is not required for each entrance or access point to a room or other area that is a high radiation area solely because of the presence of radioactive materials prepared for transport and packaged and labeled in accordance with the regulations of the Department of Transportation provided that—
(1) The packages do not remain in the area longer than 3 days; and
(2) The dose rate at 1 meter from the external surface of any package does not exceed 0.01 rem (0.1 mSv) per hour.
(f) Control of entrance or access to rooms or other areas in hospitals is not required solely because of the presence of patients containing radioactive material, provided that there are personnel in attendance who will take the necessary precautions to prevent the exposure of individuals to radiation or radioactive material in excess of the limits

§ 20.1702 Use of other controls.

(a) When it is not practical to apply process or other engineering controls to control the concentrations of radioactive material in the air to values below those that define an airborne radioactivity area, the licensee shall, consistent with maintaining the total effective dose equivalent ALARA, increase monitoring and limit intakes by one or more of the following means —

(1) Control of access;
(2) Limitation of exposure times;
(3) Use of respiratory protection equipment; or
(4) Other controls.

(b) If the licensee performs an ALARA analysis to determine whether or not respirators should be used, the licensee may consider safety factors other than radiological factors. The licensee should also consider the impact of respirator use on workers’ industrial health and safety.

HISTORY

NOTES
[EFFECTIVE DATE NOTE: 64 FR 54543, 54556, Oct. 7, 1999, revised this section, effective Feb. 4, 2000.]

§ 20.1703 Use of individual respiratory protection equipment.

If the licensee assigns or permits the use of respiratory protection equipment to limit the intake of radioactive material,
(a) The licensee shall use only respiratory protection equipment that is tested and certified by the National Institute for Occupational Safety and Health (NIOSH) except as otherwise noted in this part.

(b) If the licensee wishes to use equipment that has not been tested or certified by NIOSH, or for which there is no schedule for testing or certification, the licensee shall submit an application to the NRC for authorized use of this equipment except as provided in this part. The application must include evidence that the material and performance characteristics of the equipment are capable of providing the proposed degree of protection under anticipated conditions of use. This must be demonstrated either by licensee testing or on the basis of reliable test information.

(c) The licensee shall implement and maintain a respiratory protection program that includes:

1. Air sampling sufficient to identify the potential hazard, permit proper equipment selection, and estimate doses;
2. Surveys and bioassays, as necessary, to evaluate actual intakes;
3. Testing of respirators for operability (user seal check for face sealing devices and functional check for others) immediately prior to each use;
4. Written procedures regarding —
   i. Monitoring, including air sampling and bioassays;
   ii. Supervision and training of respirator users;
   iii. Fit testing;
   iv. Respirator selection;
   v. Breathing air quality;
   vi. Inventory and control;
   vii. Storage, issuance, maintenance, repair, testing, and quality assurance of respiratory protection equipment;
   viii. Recordkeeping; and
   ix. Limitations on periods of respirator use and relief from respirator use;
5. Determination by a physician that the individual user is medically fit to use respiratory protection equipment:
   i. Before the initial fitting of a face sealing respirator;
   ii. Before the first field use of non-face sealing respirators, and
   iii. Either every 12 months thereafter, or periodically at a frequency determined by a physician.
6. Fit testing, with fit factor $\geq 10$ times the APF for negative pressure devices, and a fit factor $\geq 500$ for any positive pressure, continuous flow, and pressure-demand devices, before the first field use of tight fitting, face-sealing respirators and periodically thereafter at a frequency not to exceed 1 year. Fit testing must be performed with the facepiece operating in the negative pressure mode.

(d) The licensee shall advise each respirator user that the user may leave the area at any time for relief from respirator use in the event of equipment malfunction, physical or psychological distress, procedural or communication failure, significant deterioration of operating conditions, or any other conditions that might require such relief.

(e) The licensee shall also consider limitations appropriate to the type and mode of use. When selecting respiratory devices the licensee shall provide for vision correction, adequate communication, low temperature work environments, and the concurrent use of other safety or radiological protection equipment. The licensee shall use equipment in such a way as not to interfere with the proper operation of the respirator.

(f) Standby rescue persons are required whenever one-piece atmosphere-supplying suits, or any combination of supplied air respiratory protection device and personnel protective equipment are used from which an unaided individual would have difficulty extricating himself or herself. The standby persons must be equipped with respiratory protection devices or other apparatus appropriate for the potential hazards. The standby rescue persons shall observe or otherwise maintain continuous communication with the workers (visual, voice, signal line, telephone, radio, or other suitable means), and be immediately available to assist them in case of a failure of the air supply or for any other reason that requires relief from distress. A sufficient number of standby rescue persons...
must be immediately available to assist all users of this type of equipment and to provide effective emergency rescue if needed.

(g) Atmosphere-supplying respirators must be supplied with respirable air of grade D quality or better as defined by the Compressed Gas Association in publication G-7.1, “Commodity Specification for Air,” 1987 and included in the regulations of the Occupational Safety and Health Administration (29 CFR 1910.134(j)(1)(ii)(A) through (E). Grade D quality air criteria include —

1. Oxygen content \( (v/v) \) of 19.5-23.5%;
2. Hydrocarbon (condensed) content of 5 milligrams per cubic meter of air or less;
3. Carbon monoxide (CO) content of 10 ppm or less;
4. Carbon dioxide content of 1,000 ppm or less; and
5. Lack of noticable odor.

(h) The licensee shall ensure that no objects, materials or substances, such as facial hair, or any conditions that interfere with the face-facepiece seal or valve function, and that are under the control of the respirator wearer, are present between the skin of the wearer’s face and the sealing surface of a tight-fitting respirator facepiece.

(i) In estimating the dose to individuals from intake of airborne radioactive materials, the concentration of radioactive material in the air that is inhaled when respirators are worn is initially assumed to be the ambient concentration in air without respiratory protection, divided by the assigned protection factor. If the dose is later found to be greater than the estimated dose, the corrected value must be used. If the dose is later found to be less than the estimated dose, the corrected value may be used.

NOTES

§ 20.1704 Further restrictions on the use of respiratory protection equipment.

The Commission may impose restrictions in addition to the provisions of §§ 20.1702, 20.1703, and Appendix A to Part 20, in order to:

(a) Ensure that the respiratory protection program of the licensee is adequate to limit doses to individuals from intakes of airborne radioactive materials consistent with maintaining total effective dose equivalent ALARA; and

(b) Limit the extent to which a licensee may use respiratory protection equipment instead of process or other engineering controls.

HISTORY
NOTES

§ 20.1705 Application for use of higher assigned protection factors.

The licensee shall obtain authorization from the Commission before using assigned protection factors in excess of those specified in Appendix A to Part 20. The Commission may authorize a licensee to use higher assigned protection factors on receipt of an application that —

(a) Describes the situation for which a need exists for higher protection factors; and

(b) Demonstrates that the respiratory protection equipment provides these higher protection factors under the proposed conditions of use.

§ 20.1903 Exceptions to posting requirements.

(a) A licensee is not required to post caution signs in areas or rooms containing radioactive materials for periods of less than 8 hours, if each of the following conditions is met:

§ 20.1904 Labeling containers.
(a) The licensee shall ensure that each container of licensed material bears a durable, clearly visible label bearing the radiation symbol and the words “CAUTION, RADIOACTIVE MATERIAL” or “DANGER, RADIOACTIVE MATERIAL.” The label must also provide sufficient information (such as the radionuclide(s) present, an estimate of the quantity of radioactivity, the date for which the activity is estimated, radiation levels, kinds of materials, and mass enrichment) to permit individuals handling or using the containers, or working in the vicinity of the containers, to take precautions to avoid or minimize exposures.

§ 20.1905 Exemptions to labeling requirements.
A licensee is not required to label —
(a) Containers holding licensed material in quantities less than the quantities listed in Appendix C to Part 20; or
(b) Containers holding licensed material in concentrations less than those specified in table 3 of Appendix B to Part 20; or

The record must be retained as long as the containers are in use for the purpose indicated on the record; or
(f) Installed manufacturing or process equipment, such as reactor components, piping, and tanks; or
(g) Containers holding licensed material (other than sealed sources that are either specifically or generally licensed) at a facility licensed under Parts 50 or 52 of this chapter, not including non-power reactors, that are within an area posted under the requirements in § 20.1902 if the containers are:
   (1) Conspicuously marked (such as by providing a system of color coding of containers) commensurate with the radiological hazard;
   (2) Accessible only to individuals who have sufficient instruction to minimize radiation exposure while handling or working in the vicinity of the containers; and
   (3) Subject to plant procedures to ensure they are appropriately labeled, as specified at § 20.1904 before being removed from the posted area.

\(^3\) Labeling of packages containing radioactive materials is required by the Department of Transportation (DOT) if the amount and type of radioactive material exceeds the limits for an excepted quantity or article as defined and limited by DOT regulations 49 CFR 173.403 (m) and (w) and 173.421-424.
§ 20.1906 Procedures for receiving and opening packages.

(c) The licensee shall perform the monitoring required by paragraph (b) of this section as soon as practical after receipt of the package, but not later than 3 hours after the package is received at the licensee’s facility if it is received during the licensee’s normal working hours, or not later than 3 hours from the beginning of the next working day if it is received after working hours.

(d) The licensee shall immediately notify the final delivery carrier and the NRC Operations Center (301-816-5100), by telephone, when —
   (1) Removable radioactive surface contamination exceeds the limits of § 71.87(i) of this chapter; or

APPENDIX A
HOSPITAL INSPECTION PROGRAM

The purpose of the Veterinary Medical Board’s hospital inspection program is to educate all licensees with respect to the minimum standards and assure consumers that minimum standards are maintained in veterinary facilities throughout California. The following are laws relevant to the inspection of premises and may clarify concerns or questions you may have:

Section 4809.5
The board may at any time inspect the premises in which veterinary medicine, veterinary dentistry, or veterinary surgery is being practiced. The board’s inspection authority does not extend to premises that are not registered with the board. Nothing in this section shall be construed to affect the board’s ability to investigate alleged unlicensed activity or to inspect premises for which registration has lapsed or is delinquent.

Section 4809.7
The board shall establish a regular inspection program that will provide for random, unannounced inspections. The board shall make every effort to inspect at least 20 percent of veterinary premises on an annual basis.

Section 4856
(a) All records required by law to be kept by a veterinarian subject to this chapter, including, but not limited to, records pertaining to diagnosis and treatment of animals and records pertaining to drugs or devices for use on animals, shall be open to inspection by the board, or its authorized representatives, during an inspection as part of a regular inspection program by the board, or during an investigation initiated in response to a complaint that a licensee has violated any law or regulation that constitutes grounds for disciplinary action by the board. A copy of all those records shall be provided to the board immediately upon request.

(b) Equipment and drugs on the premises, or any other place, where veterinary medicine, veterinary dentistry, veterinary surgery, or the various branches thereof is being practiced, or otherwise in the possession of a veterinarian for purposes of that practice, shall be open to inspection by the board, or its authorized representatives, during an inspection as part of a regular inspection program by the board, or during an investigation initiated in response to a complaint that a licensee has violated any law or regulation that constitutes grounds for disciplinary action by the board.
The following is a checklist that is used by the VMB hospital inspectors during a hospital inspection. The appropriate statutory or regulatory authority is referenced next to each item. (The 4000 series is Business and Professions Code, the 1000 and 2000 series is the California Code of Regulations.)

### Disciplinary Guidelines

The Veterinary Medical Board (Board) developed the Disciplinary Guidelines outlined in this manual for its Executive Officer, staff, legal counsel, administrative law judges, and other persons involved in the Board's enforcement process to be used for the purpose of creating judgment orders in formal disciplinary actions. These guidelines are published in regulations for the public and the profession so that the processes used by the Board to impose discipline are readily available and transparent.

The Board recognizes that each case is unique and that mitigating or aggravating circumstances in a particular case may necessitate variations. Therefore, the Board has developed minimum and maximum penalties to assist in determining the appropriate penalty. If an accusation is sustained and less than the minimum penalty is assessed, the Board requires information from the administrative law judge on the circumstances that resulted in less than the minimum penalty being assessed. In addition, probationary conditions are divided into two categories: 1) standard terms and conditions that are used for all cases; and 2) optional terms and conditions that are used for specific violations and circumstances unique to a specific case.

The Board licenses veterinarians and registers veterinary technicians. If there is action taken against both the individual license and the premises permit, then the disciplinary order should reflect actions against both. However, in some cases, minimum standard violations are so severe that it is necessary to take immediate action and close a facility. In these instances, the veterinary license and the premises permit may be disciplined separately, and the disciplinary order should reflect separate action.

Because of the severity of cases resulting in action by the Office of the Attorney General, the Board has established that the minimum penalty shall always include revocation or suspension with the revocation or suspension stayed and terms and conditions of probation imposed. The imminent threat of the revocation or suspension being reinstated helps to ensure compliance with the probationary terms and conditions. It is the recommendation of the Board that in any case involving a violation related to alcohol or drug abuse violations that the minimum term of probation should be five years. In addition, in any case involving a violation related to alcohol or drug abuse violations the mandatory terms and conditions listed specifically for this type of cases shall be imposed.

In cases where the penalties deviate from the minimum to maximum range without explanation of the deviation, the Board may non-adopt the Proposed Decision and review the case itself.

INTRODUCTION

The Veterinary Medical Board (Board) developed the Disciplinary Guidelines outlined in this manual for its Executive Officer, staff, legal counsel, administrative law judges, and other persons involved in the Board’s enforcement process to be used for the purpose of creating judgment orders in formal disciplinary actions. These guidelines are published in regulations for the public and the profession so that the processes used by the Board to impose discipline are readily available and transparent.

The Board recognizes that each case is unique and that mitigating or aggravating circumstances in a particular case may necessitate variations. Therefore, the Board has developed minimum and maximum penalties to assist in determining the appropriate penalty. If an accusation is sustained and less than the minimum penalty is assessed, the Board requires information from the administrative law judge on the circumstances that resulted in less than the minimum penalty being assessed. In addition, probationary conditions are divided into two categories: 1) standard terms and conditions that are used for all cases; and 2) optional terms and conditions that are used for specific violations and circumstances unique to a specific case.

The Board licenses veterinarians and registers veterinary premises and veterinary technicians. If there is action taken against both the individual license and the premises permit, then the disciplinary order should reflect actions against both. However, in some cases, minimum standard violations are so severe that it is necessary to take immediate action and close a facility. In these instances, the veterinary license and the premises permit may be disciplined separately, and the disciplinary order should reflect separate action.

Because of the severity of cases resulting in action by the Office of the Attorney General, the Board has established that the minimum penalty shall always include revocation or suspension with the revocation or suspension stayed and terms and conditions of probation imposed. The imminent threat of the revocation or suspension being reinstated helps to ensure compliance with the probationary terms and conditions. It is the recommendation of the Board that in any case involving a violation related to alcohol or drug abuse violations that the minimum term of probation should be five years. In addition, in any case involving a violation related to alcohol or drug abuse violations the mandatory terms and conditions listed specifically for this type of cases shall be imposed.

In cases where the penalties deviate from the minimum to maximum range without explanation of the deviation, the Board may non-adopt the Proposed Decision and review the case itself.

Minimum penalties may be considered if there is evidence of an attempt(s) at self-initiated rehabilitation. Evidence of self-initiated rehabilitation includes, but is not limited to, pro bono services to nonprofit organizations or public agencies that improve the care and treatment of animals or improve general society’s interactions with animals. Self-initiated rehabilitation measures also include, but are not limited to, when appropriate, specific training in areas of weakness, full restitution to persons harmed by the licensee or registrant, completions of treatment or other conditions of probation ordered by the court, or full compliance with all laws since the date of the occurrence of the criminal act.

PROBATION TERMS AND CONDITIONS

STANDARD TERMS AND CONDITIONS OF PROBATION (1-11)

The Board recommends one- to five-year probation, as appropriate, in cases where probation is part of a disciplinary order.

All standard terms and conditions are included in every order of probation applied to the licensee or registrant subject to discipline (Respondent).

1. Obey all Laws
   Respondent shall obey all federal and state laws and regulations substantially related to the practice of veterinary medicine. Further, within thirty (30) days of any arrest or conviction, respondent shall report to the Board and provide proof of compliance with the terms and conditions of the court order including, but not limited to, probation and restitution requirements.

2. Quarterly Reports and Interviews
   Respondent shall report quarterly to the Board or its designee, under penalty of perjury, on forms provided by the Board, stating whether there has been compliance with all terms and conditions of probation. In addition, the Board, at its discretion, may request additional in-person reports of the probationary terms and conditions. If the final written quarterly report is not made as directed, the period of probation shall be extended until such time as the final report is received by the Board. Respondent shall make available all patient records, hospital records, books, logs, and other documents to the Board, upon request.

3. Cooperation with Probation Surveillance
   Respondent shall comply with the Board’s probation surveillance program. All costs for probation monitoring and/or mandatory premises inspections shall be borne by Respondent. Probation monitoring costs are set at a rate of $100 per month for the duration of the probation. Respondent shall notify the Board of any change of name or address or address of record within thirty (30) days of the change. Respondent shall notify the Board immediately in writing if Respondent leaves California to reside or practice in another state. Respondent shall notify the Board immediately upon return to California.

4. No Preceptorships or Supervision of Interns
   Respondent shall not supervise a registered intern and shall not perform any of the duties of a preceptor.
5. **Notice to Employers**

Respondent shall notify all present and prospective employers of the decision in this case and the terms, conditions, and restrictions imposed on Respondent by the decision in this case. Within thirty (30) days of the effective date of this decision and within fifteen (15) days of Respondent undertaking new employment, Respondent shall cause his or her employer to report to the Board in writing, acknowledging the employer has read the Accusation and decision in this case and understands Respondent’s terms and conditions of probation. Relief veterinarians shall notify employers immediately.

6. **Notice to Employees**

Respondent shall, upon or before the effective date of this decision, post or circulate a notice which actually recites the offenses for which Respondent has been disciplined and the terms and conditions of probation, to all registered veterinary employees, and to any preceptor, intern or extern involved in his or her veterinary practice. Within fifteen (15) days of the effective date of this decision, Respondent shall cause his/her employees to report to the Board in writing, acknowledging the employees have read the Accusation and decision in the case and understand Respondent’s terms and conditions of probation.

7. **Owners and Officers (Corporations or Partnerships): Knowledge of the Law**

Respondent shall provide, within thirty (30) days after the effective date of the decision, signed and dated statements from the owners, officers, or any owner or holder of ten percent (10%) or more of the interest in Respondent or Respondent’s stock, stating said individuals have read and are familiar with federal and state laws and regulations governing the practice of veterinary medicine.

8. **Tolling of Probation**

If Respondent resides out of state upon or after effective date of the decision, he or she must comply with the following conditions only: quarterly reports and interviews, tolling of probation, continuing education and cost recovery. If Respondent returns to California he or she must comply or be subject to all probationary conditions for the period of probation.

Respondent, during probation, shall engage in the practice of veterinary medicine in California for a minimum of 24 hours per week for six (6) consecutive months or as determined by the Board. Should Respondent fail to engage in the practice of veterinary medicine in California as set forth above, the time outside of the practice shall not apply to reduction of the probationary terms.
9. **Violation of Probation**

If Respondent violates probation in any respect, the Board, after giving Respondent notice and the opportunity to be heard, may revoke probation and carry out the disciplinary order that was stayed. If an accusation or petition to revoke probation is filed against Respondent during probation, or if the Attorney General’s Office has been requested to prepare any disciplinary action against Respondent’s license, the Board shall have continuing jurisdiction until the matter is final, and the period of probation shall be extended until the matter is final.

10. **Completion of Probation**

All costs for probation monitoring and/or mandatory premises inspections shall be borne by Respondent. Failure to pay all costs due shall result in an extension of probation until the matter is resolved and costs paid. Upon successful completion of probation and all payment of all fees due, Respondent’s license will be fully restored.

11. **Cost Recovery and Payment of Fines**

Pursuant to Section 125.3 of the California Business and Professions Code, within thirty (30) days of the effective date of this decision, Respondent shall pay to the Board its enforcement costs including investigation, hearing, and probationary monitoring in the amount of ________________ or the Respondent shall make these payments as follows: ________________. OVERVIEW GUIDE FOR DISCIPLINARY DECISIONS

Most of the background information provided below is contained in the Department of Consumer Affairs’ Reference Manual for Board Members and gives an overview of part of a board’s disciplinary process. Certain aspects of this overview were changed by the passage of SB 523 (Kopp, Chapter 938, Statutes of 1995). The changes were in regard to ex parte communications.

Accusation/Statement of Issues

The principal responsibility of a licensing board is to protect the public. This is accomplished by determining whether a license should be issued and whether a disciplinary action should be taken against a license. The Administrative Procedure Act prescribes the process necessary to deny, suspend, or revoke a license. An action to suspend or revoke a license is initiated by the filing of an Accusation. An action to deny a license is initiated by a Statement of Issues.

In disciplinary matters, a Deputy Attorney General (DAG) acts as the Board’s prosecutor and coordinates all necessary legal proceedings. If a case is referred to the Office of the Attorney General (OAG) and accepted for prosecution, the DAG assigned the matter will prepare a Statement of Issues or an Accusation. The person against whom the action is filed is called the Respondent.

Once drafted, the Statement of Issues or Accusation is forwarded to the Executive Officer (EO) for approval. Except where the preparation of administrative pleadings is voluminous and routine, the EO will normally review an Accusation or Statement of Issues for accuracy. Board staff will then assign a case number and the EO will sign it before returning it to the OAG for service on the Respondent.

The document is then served on the Respondent. The Respondent may contest the charges by filing a Notice of Defense. The DAG will then schedule a hearing before an Administrative Law Judge (ALJ) from the Office of Administrative Hearings (OAH).

Administrative Hearing Process

An administrative hearing is similar to a trial in a civil or criminal court. Both parties have the opportunity to introduce evidence (oral and documentary) and the Respondent has a right to confront his or her accusers. Although a board may sit with the ALJ and hear the case, most cases are heard by the ALJ alone because it is a complex procedure and may require anywhere from several days to several weeks of time.

In order to take discipline against a license issued by the Board, either a veterinarian or registered veterinary technician, it must be demonstrated by “clear and convincing evidence” that a violation of law or regulation has occurred. The clear and convincing standard is more than the “preponderance of the evidence” standard required for civil trials but less than the “beyond a reasonable doubt” standard for criminal trials.

To sustain a citation against a licensee, the allegations need only be proven to the “preponderance of the evidence” standard.
Proposed Decision

After hearing all the witnesses and arguments and considering all of the evidence presented, the ALJ renders a Proposed Decision that contains: 1) findings of fact, 2) a determination of issues, and 3) a proposed penalty (assuming a violation is found). The Proposed Decision is then submitted to the Board for consideration and a final decision. The Proposed Decision must be acted upon by the Board within 100 days of receipt, or it becomes final by operation of law as proposed by the ALJ.

In making a decision whether to adopt the Proposed Decision as its own decision, the Board may only consider the Proposed Decision itself; the Board may not consider evidence about the case not contained in the Decision. The Board may consider advice of legal counsel regarding their options, the legal sufficiency of the Proposed Decision, and the law applicable to the case at hand. If a Board member is personally acquainted with the licensee to a degree that it affects their decision-making ability, or the Board member has received evidence about the case not contained in the Proposed Decision, the Board member should recuse him or herself from any discussion about the case and the vote on the matter.

The Board may vote on the Proposed Decision by mail ballot or at a meeting in a closed session. Although a Proposed Decision carries great weight based on the fact that the ALJ was a witness to the evidence presented at the hearing, the actual testimony of the witnesses and the demeanor of those witnesses, the Board is the final decision-maker. The Board should consider the ALJ’s narrative explanation in the Decision and how the Disciplinary Guidelines were applied. If the Decision is outside the Disciplinary Guidelines, the ALJ must explain to the satisfaction of the Board, the factors that were proved that caused the ALJ to deviate from the standards.

Adopting any decision is a serious responsibility of a Board member. When considering a Proposed Decision, the Board’s legal counsel is present to respond to questions about the legal parameters of the case and the Board’s authority. Board members must take time to fully discuss each case and to seek clarification from legal counsel for any question they may have prior to making a final decision on the case.

When considering a Proposed Decision, the Board has three basic options:

1. adopt the Decision as written including the proposed penalty; or
2. adopt the Decision and reduce the penalty; or
3. not adopt the Proposed Decision.

Non-Adopt - Rejecting a Decision

A Board may choose not to adopt a Proposed Decision of an ALJ for many reasons that might be grouped generally under the following categories:

1. The Board finds the penalty or terms of probation inappropriate to the violation(s).
2. The Board disagrees with the ALJ’s determination of the issue(s) in the case.

When a Proposed Decision is not adopted, the Board is required to obtain a copy of the transcript of the hearing and documentary evidence unless this requirement is waived.
by all parties. Each Board member must read the entire transcript and consider only that evidence presented at the hearing. The DAG and the Respondent are entitled to submit written arguments, or oral argument if the Board so orders, on the case to the Board. The Board must render its own decision after reading the transcript and arguments within 100 days from the receipt of the transcript. After the decision has been rendered, all parties will be served with the Decision After Non-Adoption.

The Board can elect to return the non-adopted decision to the OAH if it feels that additional evidence is required before the Board can render its decision. In this instance, the case is returned to the OAH and a new hearing date is scheduled. After the new hearing is complete the ALJ, the same one as before or a new ALJ if the prior one is unavailable, will issue a new Proposed Decision and the Board will consider the Proposed Decision anew.

**Petition for Reconsideration**

A Respondent has a right to and may petition the Board before the effective date of the decision for reconsideration of the Board’s decision.

If a Board does vote to reconsider its decision, it is equivalent to not adopting a Proposed Decision and the steps listed above apply. If the 30-day time period lapses or the Board does not act on the petition, the request for reconsideration is deemed to be denied by operation of law and the Board no longer has jurisdiction over the matter.

**Appeal Process – Writ of Administrative Mandamus**

A Respondent has the right to request reconsideration and if denied, file a Writ to appeal a disciplinary action imposed by a Board.

A decision rendered by a Superior Court can be further appealed to the Court of Appeals and then to the Supreme Court by either the Board or the Respondent.

**Stipulated Agreement**

Once an Accusation has been filed, rather than proceeding to a formal hearing and prior to requesting that the Board consider settlement terms and conditions, the Respondent shall provide mitigating factors and evidence of rehabilitation. Mitigating factors include factors beyond the control of the licensee that existed for a brief period of time but no longer exists that may mitigate the need for certain types of discipline. Evidence of rehabilitation would show that Respondent has taken serious steps to improve behavior and correct actions that led to the need for disciplinary action. The parties may then stipulate (agree) to a determination of the violations charged against the Respondent and to a proposed penalty. Stipulations are negotiated and drafted by the DAG representing the Board and the Respondent and his/her legal counsel. In negotiating a stipulation, the DAG works closely with the Board’s EO (or designated Enforcement Program Manager) and utilizes the Board’s Disciplinary Guidelines to arrive at a stipulation that is intended to be acceptable to the Board.
The stipulation is presented to the Board for its consideration in much the same way that a Proposed Decision is presented. Once a stipulation has been signed by the licensee and his or her counsel, if any, the Board must vote to approve or disapprove the stipulation as a whole. If the Board votes to disapprove a proposed stipulation, it may send back recommendations for inclusion into any future stipulations. The Board may look beyond the mere contents of an Accusation, though it must confine its consideration to information that is relevant to the charges at hand. While there is no time limit within which a stipulation must be considered, any undue delays should be avoided.

**Default Decisions**

Default Decisions are rare; however, in some cases, the Respondent does not respond to an Accusation by returning the Notice of Defense, fails to return the Notice of Defense in a timely manner, or fails to appear at a scheduled hearing. There is a legal obligation to respond to an Accusation and to be present at a scheduled hearing. Failure to meet the legal obligations is grounds for a Default Decision whereby the discipline is imposed based on the Respondent’s failure to respond. In these cases the Board need only demonstrate that it has served the Accusation on the licensee at the licensee’s address of record. This is one reason it is imperative that licensees maintain a current address of record with the Board; failure to do so can have very serious consequences if the licensee becomes subject to an Accusation but has an old address of record on file with the Board because the Board has no legal obligation to make any attempt to locate the licensee. Service of an Accusation by first class mail is all that is required to prove proper service.

The result of a Default Decision is nearly always a straight revocation of the license. If the Respondent is also a managing licensee for a premises permit, the premises permit will automatically be canceled by operation of law. If the Accusation was pled against the premises as well as the licensee, the premises permit is revoked along with the license.

**Definitions**

**Negligence** - A departure from the standard of care or practice. It can be an act of omission or commission. Harm or injury is not a necessary component of administrative negligence because we do not seek monetary damages (redress).

**Incompetence** - A lack of knowledge or ability in discharging professional obligations.

**Fraud and Deception** -

- **Deception** - Any act or omission that deceives or misleads another person.
- **Fraud** - An intentional act or omission to deceive or mislead another person by misrepresentation, deceit, or concealment of a material fact.

Both fraud and deception can exist despite truthful statements if the statements made, whether written or oral, have a tendency to mislead or, do in fact, mislead.
Section 1:
Effects of Radiation to the Body Appx C

Radiation injures tissue by ionizing molecules within body cells, that is, depositing energy and causing an electron or electrons to be removed from an atom of the molecule. These ionized molecules may be inactivated and cell death may result. There is a greater variation in the response of different tissues to radiation. The cells most sensitive to radiation are those which divide the most actively—examples include: epithelium, hematopoietic cells, cells lining the small intestine, and reproductive cells. The fetus is particularly sensitive to radiation. Cells more resistant to the effects of radiation include those cells which do not actively divide such as nerve and muscle cells.

Ionizing radiation can cause both somatic and genetic damage. An example of somatic damage is a squamous cell carcinoma developing on the hand of an individual who received a high level of radiation exposure to the hand. Genetic damage produces injury to the reproductive cells of the exposed individual. Such damage may result in birth defects in children born to the exposed person (birth defects may also appear in children born in later generations).

The effects of radiation may be demonstrated almost immediately, or they may be latent and not observed for a long period of time. Examples of immediate effects of radiation include erythema of the skin following radiation therapy. Latent effects develop slowly and may not become apparent until years after the exposure. Slowly developing cataracts in the eyes of a person with small but chronic exposure to radiation could exemplify the latent effects of radiation exposure.

The radiation risks of most concern to veterinary radiographers are the sensitivity of unprotected areas of the body (i.e. the lens of the eye) and the cumulative effects of radiation. Although the cumulative effects of radiation are less understood than the effects of a single massive dose of radiation to the whole body, the repeated exposure of an individual to small amounts of radiation day after day can add up to potentially harmful levels.

Chronic exposure of individuals to low levels of radiation is believed to produce the following effects:

- Increase in the incidence of neoplasia.
- Specific increase in the incidence of squamous cell carcinoma.
- Increase in the frequency of occurrence of leukemia.
- Premature aging.

Responsibilities of the licensed veterinarian

- Following California Code of Regulations requirements including the federal standards of protection against radiation and applicable dose limits as incorporated by reference in Section 30253 of the California Code of Regulations (CCR), Title 17.
- Providing the employee with reasons for the requirements.
- Veterinarians are not required to provide individual monitoring devices unless employees are likely to receive a radiation dose in excess of 10 percent of the listed limit during one year. Most veterinarians have elected to provide...
individual monitors, however, other means of monitoring exposure are acceptable.

- Explaining the available options for protecting the embryo/fetus.

_Considerations for occupationally exposed women of childbearing age_

California Code of Regulations, Title 17, Section 30255 states that each California licensed veterinarian must instruct occupationally exposed individuals (veterinary radiographers) of the health protection problems associated with radiation. A special situation arises with occupationally exposed women of childbearing age. Precaution should be taken by limiting exposure to young women, especially if they are pregnant. X-ray exposure to the abdomen of such workers would involve a radiation dose to the embryo or fetus.

_Reasons for these requirements_

Some studies have shown that there is an increased risk of leukemia and other cancers in children if the expectant mother was exposed to a significant amount of radiation. Women employees must be aware of possible risks so they can take appropriate steps to protect their offspring.

_Considerations for the embryo/fetus_

_Regulatory provisions (10 CFR 20, Section 20.1208):_

- The licensed veterinarian shall ensure that the dose to an embryo/fetus during the entire pregnancy, due to occupational exposure of a declared pregnant woman, does not exceed 0.5 rem (500 millirems or 5 milli Sieverts (mSv)).
- The licensed veterinarian shall make efforts to avoid substantial variation above a uniform monthly exposure rate to a declared pregnant woman so as to satisfy the limit in paragraph (a) of Section 20.1208.
- The dose to an embryo/fetus shall be taken as the deep dose equivalent to the declared pregnant woman.
- If the dose to an embryo/fetus is found to have exceeded 0.5 rem (5 mSv), plus or minus 0.05 rems, by the time the woman declares the pregnancy to the licensed veterinarian, the veterinarian shall be deemed to be in compliance with paragraph (a) of Section 20.1208 if the additional dose to the embryo/fetus does not exceed 0.05 rems (0.5 mSv) during the remainder of the pregnancy.
- Once a woman declares her pregnancy in writing, the radiation dose of the embryo/fetus shall be no greater than 0.05 rems (50 millirems) in any month (excluding medical exposure).

_Female employees should be aware of the following facts:_

- The first three months of pregnancy are the most important as the embryo/fetus is most sensitive to radiation at this time.
- In most cases of occupational exposure, the actual dose received by the embryo/fetus is less than the dose received by the mother, because some of the dose is absorbed by the mother’s body.
- At the present occupational dose equivalent limits, the risk to the unborn baby is considered to be small, but experts disagree on the exact amount of risk.
- There is no need for women to be concerned about sterility or loss of ability to bear children from occupational exposure that is within legal limits.
- Once a woman declares her pregnancy in writing, the radiation dose of the embryo/fetus shall be no greater than 0.05 rems in any month.
- The 0.5 rems dose equivalent limit applies to the full nine months of pregnancy.

It is strongly suggested that the instruction be given both orally and in writing. Also, each woman employee should be given an opportunity to ask questions, and each woman employee should be asked to acknowledge in writing that the instruction has been received. Further, it would be prudent to keep records of such acknowledgment indefinitely.
Considerations for Individuals Under the Age of 18 years

Young individuals are considered to be at a greater risk of radiation injury because of their more rapidly reproducing cells. Thus, all individuals under the age of 18 shall be excluded from performing or assisting in the performance of radiographic examinations.

Section 2: Competency and Training of Veterinary Radiographers

According to Section 4840.7 of the California Veterinary Medicine Practice Act, a registered veterinary technician (RVT) who has been examined by the Veterinary Medical Board in the area of radiation safety and techniques may operate radiographic equipment under indirect supervision of a licensed veterinarian.

An unregistered assistant may operate radiographic equipment under the direct supervision of an RVT or a licensed veterinarian.

Section 3: Personnel Monitoring

Personnel monitoring equipment consists of devices designed to be worn or carried for the purpose of measuring the radiation dose received by an individual in the course of employment, education, or training. Personnel monitoring equipment/devices include: film badges, thermoluminescent dosimeters (TLD), pocket dosimeters, and ring or wrist badges [see CFR Section 20.1003 and CCR Section 30100 (m)]. Film and TLD badges are the most commonly used radiation monitoring devices by the veterinary profession. Personnel monitors may be performed either on a monthly or quarterly basis.

Location of personnel monitoring equipment

A monitoring device must be worn at the thyroid level on the collar outside the apron. Also if the fluoroscopy is used, an additional ring or wrist band must be worn.

Section 4: Occupational Dose Equivalent Limits

Compliance with occupational exposure requirements - [Maximum Permissible Dose equivalent (MPD)]

The essential goal of radiation safety is to prevent injury from exposure to ionizing radiation. For this reason, CFR 20, Section 20.1201, establishes the following annual or yearly occupational dose equivalent limits:

- Whole body (total effective dose equivalent): 5 rems.
- Skin and extremities (shallow dose equivalents): 50 rems.
- Lens of the eye (eye dose equivalent): 15 rems.

The regulations distinguish the following:

- Occupational dose equivalent limits for adults (persons over 18 years of age).
- Occupational dose equivalent limits for persons under 18 years of age (may receive 10 percent of the adult occupational dose limits). This is one reason why young people should not be allowed to work in the x-ray room.
- Dose equivalent limits for general population.
- Radiation dose to an embryo/fetus (prenatal radiation exposure).

Section 5: Veterinary Radiographic Machine Requirements

X-ray Tube Housing

The x-ray tube housing must be of a diagnostic type.

The x-ray beam is generated within a vacuum tube containing a cathode with a tungsten wire filament, and an anode target, usually made of tungsten. The x-ray tube itself is enclosed in a metal housing, with a window through which the useful or primary x-ray beam passes.

Collimating device

A rectangular collimating device, equipped with a light localizer indicating the size
and location of the area to be exposed to x-rays, which is capable of restricting the useful beam to the area of clinical interest, shall be provided.

Failure to limit or restrict the x-ray beam only to the area of clinical interest represents one of the most frequent causes of violating the collimation requirement. X-rays that extend beyond the area of clinical interest serve no useful function, increase scatter, and must be eliminated by careful collimation.

There should be an unexposed border on two opposing sides of the film, proving that the x-ray beam did not exceed the size of the film cassette.

By decreasing the amount of tissue exposed, the amount of scatter radiation produced is also reduced, thus reducing the scatter radiation exposure to personnel.

Clinically, reduction of the size of the x-ray beam improves the diagnostic quality of the film by lessening the amount of fog caused by scatter radiation.

**X-ray beam filtration**

The regulations specify the amount of total filtration required for veterinary x-ray machines to be at least 1.5 millimeters (mm) of aluminum-equivalent for equipment operating up to 70 kilovolt peak (kVp) and at least 2.0 mm of aluminum-equivalent for equipment operating over 70 kVp.

*Diagnostic x-rays tubes use aluminum or its equivalent as the filter material.*

Except for the window through which the primary useful beam passes, most x-ray tubes are surrounded by oil for electrical insulation and keeping the tube cool. When x-rays leave the tube they must pass through the window’s glass covering which adds a small amount of inherent filtration. The amount of inherent filtration produced by most diagnostic x-ray tubes usually ranges from 0.5 to 0.8 mm aluminum-equivalent.

The ability of the x-ray beam to penetrate through the animal patient and to expose the x-ray film is dependent upon its energy measured in kilovolts peak (kVp). The x-ray beam is made up of rays of different energies. Only the x-rays with higher energies (i.e., shorter wavelength) can penetrate the tissue of the animal body and react with the emulsion of the film. The lower energy (i.e., long wavelength) x-rays do not penetrate the patient, and therefore do not contribute to the diagnostic quality of the radiograph. It is desirable to remove the low energy rays from the x-ray beam. This can be readily accomplished by placing a filter in the path of the useful or primary beam. A filter functions by absorbing preferentially the low energy (long wavelength) x-rays before they reach the patient, while allowing the high energy (short wavelength) x-rays to pass through. [Section 30306(f)].

**Exposure cord**

The exposure cord on the hand or foot switch cannot be less than six feet in length. [Section 30314(a)(5)].

**Exposure timer**

The x-ray machine must have a device to terminate the exposure after a preset time or exposure. [Section 202114(a)(4)].

**Exposure switch**

The exposure switch must be of the dead-man type. [Section 30314(a)(5)].

**Registration requirement**

Every person possessing a reportable source of radiation shall register with the California Department of Public Health, Radiologic Health Branch [(RHB) www.cdph.ca.gov/rhb] in accordance with the provisions of Sections 30110 through 30146. [Section 30108].

**Initial registration**

(a) Every person not already registered who acquires a reportable source of radiation shall register with and pay the fee as specified in Section 30145 to RHB within 30 days of the date of acquisition.

(b) Every person who intends to acquire a radiation machine capable of operating at a potential in excess of 500 kvp shall notify RHB at least 60 days prior to his/her possession of the machine or at least 60 days prior to the commencement of construction or reconstruction of the room which will house the machine, whichever occurs first. This
equipment shall not be used to treat patients until written approval of provisions for radiation safety has been obtained by the user from RHB. [Section 30110]

(c) Every person who registers or renews a registration shall complete a separate registration form furnished by RHB for each separate installation.

Renewal of registration
Registration must be renewed with RHB on or before the registration expiration date.

Report of change
The registrant shall report in writing to RHB. Within 30 days of any change in: Registrants name, address, location of the installation, receipt, sale, transfer, disposal, or discontinuance of use of x-ray machine. [Section 30115]

Vendor Obligation
A vendor must inform the receiver of the radiation machine of the registration requirements [Section 30118].

Records to be maintained
Record of individual monitoring results must be maintained until the terminations of their registration [10 CRF 20, section 20.2106].

Payment of Fees
Each registration and registration renewal requires payment of a fee [Section 30146].

Section 6:
Veterinary Radiographer Protective Apparel
The operator shall not stand in the beam but be well away from the tube and animal during X-raying [Section 30314(b), Title 17, CCR].

It is the veterinary radiographers responsibility to require that all individuals unnecessary to the radiographic examination leave the x-ray room prior to making an exposure.

Anyone who is in the x-ray room at the time of exposure must be behind a protective barrier or must wear a protective apron of preferably 0.5 mm lead-equivalent but not less than 0.25 millimeters of lead-equivalent.

Lead impregnated leather or vinyl is used to make aprons and gloves worn by those individuals who must remain in the x-ray room when an exposure is made.

The minimum requirement for both aprons and gloves is 0.25 millimeters of lead equivalent. However, gloves and aprons constructed of 0.5 millimeters of lead-equivalent are available and thus provide greater protection to the radiographer and assistants.

A label stating the lead equivalent thickness can be found on the hem of the apron and in the cuff of the glove.

Aprons and gloves must be evaluated periodically for tears and cracks to avoid radiation penetration. This evaluation can be accomplished by x-raying the gloves or aprons using a cassette and making a routine exposure. Recommended exposure factors are: 85 kVp, 10 milliampere-second (mAs), 40 inch focal-film distance.

Proper storage of aprons and gloves prolongs their life and effectiveness. Aprons should be hung without creases to prevent cracking. Gloves should be stored so that liners can dry.

Gloves and aprons are designed to protect the wearer from scatter radiation only they do not reduce the primary x-ray beam enough to provide sufficient protection.

The reduction in exposure that results from placing 0.25 mm lead-equivalent apron material in a primary x-ray beam of 100 kVp is 60 percent compared to 0.50 mm lead-equivalent apron material that attenuates the beam by 85 percent.

Section 7:
Veterinary Radiographer Responsibilities
Veterinary radiographers are responsible for adhering to all of the following radiation safety procedures:

1. Increase or maximize the distance between the operator and the source of radiation.
   - The intensity of the primary x-ray beam, scatter radiation and leakage from the x-ray tube diminishes rapidly as the distance between the operator and
the source of radiation increase (approximately by the square of the relative distances).

- If an operator can increase his or her distance from radiation sources by a factor of two (2), his or her exposure would be reduced to one-fourth of the original amount (four being the square of two). If the distance factor could be tripled, the exposure would be reduced to one-ninth of the original amount (nine being the square of three).

- When taking radiographs of large animals, use cassette holders to reduce the assistant's exposure to radiation.

2. Use chemical and mechanical restraints whenever possible to eliminate the need for holding a patient during the radiographic exposure.

- Mechanical restraining devices and positioning aids available to veterinary radiographers include vinyl or foam covered sandbags, foam wedges, plastic or foam troughs, plastic head braces and mouth specula, rope, gauze, tape, Velcro straps, etc. Their proper utilization not only helps reduce radiation exposure to veterinary radiographers but also helps to improve radiographic quality by preventing patient motion.

3. Use general anesthesia when total immobility and complete relaxation of the animal patient is required for accurate positioning.

- In all cases, the decision to use anesthetic and tranquilizing agents rests with the attending veterinarian.

- Tranquilizers may calm the animal patient sufficiently to allow some types of mechanical restraining devices to be used.

4. Use appropriate protective devices, such as gloves, aprons, and protective goggles, as well as fixed or mobile barriers such as walls or movable leaded Plexiglas shields.

- Mobile lead Plexiglas shield that can be positioned in the examination room between the source of radiation and the assistant can cut radiation exposure significantly.

- Lead glass goggles offer considerable protection to the lens of the eye.

5. Reduce the duration and amount of exposure.

- Rare-earth screens can reduce patient dose and the exposure to the personnel from between two (2) and five (5) times without any loss of image quality compared to older Acalcium tungstate screens. From the standpoint of radiation safety, intensifying screens of this type are highly advantageous.

- Use a film type proper for screen emittance. For example, blue-light-emitting screens should not be used with greensensitive film and vice versa. Such a film/screen mismatch will result in image degradation and increased radiation exposure.

- Low-absorption cassette fronts (such as Bakelite or carbon fiber reinforced plastic) offer minimum filtration of the x-rays passing through the cassette and can aid in keeping patient dose at a minimum.

- Use high kVp techniques that are appropriate for the body part being x-rayed, permitting the veterinary radiographer to lower the mAs settings and decrease radiation levels. Kilovoltage determines the penetrating ability (quality) of the x-ray beam whereas mAs determines the amount (quantity) of x-radiation.

- The x-ray imaging process starts with the normal x-ray machine, the animal patient and the x-ray cassette arranged in the usual positions. The difference is that the digital cassette contains a reusable phosphor plate, which is sensitive to x-rays but not light. Once the plate has been exposed, it is fed into a laser computer reader, which captures the image in a digital format. The reader then resets the plate ready for reuse. The phosphor plates are expensive but can be reused several thousand times; they are also more x-ray sensitive than film, allowing a slightly lower radiation dose to be used. The advantages of this process over film developing are the elimination of the expensive film,
the absence of toxic developing chemicals and the speed. Within 30 seconds, the image is visible, so if the image needs to be repeated for technical reasons this can be done immediately. The radiographer orientates the image on the monitor according to established protocols and can alter the contrast and grey scale (a process known as “windowing”).

- The company who supplies the digital equipment should provide information on the recommended receptor exposure factors to ensure diagnostic images with the lowest possible dose for each particular examination.
- It is important for each veterinary practice to set up quality assurance systems to routinely monitor factors including clinical exposure constancy and imaging system sensitivity.
- Digital radiography systems may have different x-ray energy responses to film screen systems. Therefore, the technical exposure factors should be different for that used for film screen systems.
- For existing systems that have been upgraded to use digital radiography or computed radiography, the existing exposure protocols should be adjusted to reflect a 30–50% reduction in mAs and or exposure time. Each image, whether produced on film or soft copy display, should ideally have an associated number to indicate the level of exposure to the detector. Currently all computed radiography systems have a sensitivity index which is related to detector exposure, however, digital radiography systems are generally not supplied with this feature. Once computed radiography and digital radiography are in use, the constancy of applied exposure factors should be monitored on a regular basis.

6. Plan radiographic procedures carefully and avoid unnecessary retakes

- Every examination that must be repeated results in doubling the radiation received by the patient and by personnel. Retakes represent one of the biggest causes of excessive and unnecessary radiation exposure to veterinary radiographers.
- The production of quality radiographs is a complex process demanding careful attention to each detail. Some of the principal factors relating to the production of quality radiographs are:
  - Patient positioning.
  - The body part of clinical interest should be centered on the film.
  - The body part should be perpendicular to the central main x-ray beam and parallel to the film.
  - Align the x-ray tube with the film (cassette).
  - Ensure correct focal-film distance is correct (usually 40 inches).
  - Proper techniques selection.
  - Precisely measure the body part for use with a technique chart.

Section 8: Darkroom Quality Assurance Requirements (General Provisions)

- A consistent routine should be established in the darkroom.
- Smoking, eating, or drinking should not be permitted in the darkroom.
- The darkroom should be kept free of dust.
- Counter tops and processor feed trays should be cleaned daily.
- Darkroom safe lights should be equipped with an appropriate filter and bulb combination.
- Screens should be cleaned to remove artifacts. Screen cleaner, recommended by the screen manufacturer, should be used on a regular basis—not less than monthly.
- Films should be handled carefully to prevent artifacts due to static electricity or fingerprints.
The developer and the fixer tanks should be covered to prevent oxidation.
- Boxes of unexposed film should be stored upright and in a protected area away from scatter radiation.
- Expired film stock should be removed from use.
- For digital image processing, strict adherence to the manufacturer’s quality assurance and system maintenance manuals is critical in order to take full advantage of any digital radiography system. “Windowing” an image to make it-diagnostically acceptable is not an alternative for using the correct technical factors in producing the initial image.

Section 9:
Manual Film Developing

Proper development of film is very important in optimizing diagnostic quality radiographs and reducing the number of retakes. An x-ray film should never be overexposed in order to shorten the developing time. A film that has been overexposed and underdeveloped tends to lose most of its diagnostic quality and results in a significant increase in exposure to the animal patient and veterinary radiographer.

Developing for five (5) minutes at 68-70 degrees Fahrenheit (see Table below) produces optimum diagnostic quality films. Since the correct developing time varies with the temperature of the developing solution, measurements must be made with an accurate thermometer and timer each time a film is developed.

<table>

</tbody>
</table>

*Optimum temperature and time combination.

The temperature of developing solutions should not exceed 75 degrees Fahrenheit, or fall below 65 degrees Fahrenheit. Developing solutions function correctly only within the above noted temperature range.

Solutions should be stirred well before use. Separate stirring paddles must be used for the developer and fixer.

In addition, veterinary radiographers must follow the following rules:
- Use solutions designed for medical x-ray purposes.
- Change solutions regularly and replenish solutions per manufacturer’s recommendations.*
- Avoid contaminating solutions.
- Keep films in the fixer solution for at least 10 minutes.
- Wash films in a running water bath for at least 30 minutes.
- Dry films thoroughly.

*NOTE: Silver recovery systems must meet environmental protection laws and regulations.

Specifically, processing less than 500 gallons per month of silver-containing photographic solutions qualifies a generator to be conditionally exempt if the waste is:
- Hazardous only for silver.
- Treated on-site within 90 days.
- The silver concentration is reduced to a level less than five (5) milligrams per liter (mg/l).

Section 10:
Employing/Supervising Veterinarian Responsibilities

Employing/supervising veterinarian is responsible for all of the following:
Radiation protection - general requirements.

1. Pursuant to Section 30253 take all precautions necessary to provide reasonably adequate protection to the health and safety of all individuals who are subject to exposure to radiation. The main purpose in the control of radiation exposures is to ensure that no exposure is unjustified in relation to its benefits; that any necessary exposures are kept as low as is reasonably achievable (ALARA); and that the doses received to personnel are kept well below the allowable limits.

2. Provide radiation safety rules to each veterinary radiographer including any restrictions of the operating technique required for the safe operation of the particular x-ray equipment.

3. Ascertain that each veterinary radiographer demonstrates familiarity with the radiation safety rules.

4. All individuals whose job requires radiation exposure are monitored (provided personnel monitoring devices).

5. Occupational exposure is recorded regularly at least quarterly and preferably monthly.

6. The operator or any other individual does not stand in the path of the useful beam and remains behind a protective shield or at least six feet away from the animal patient during the exposure.

RADIATION SAFETY EXAMINATION FOR UNREGISTERED ASSISTANTS

California law requires the employing/supervising veterinarian to provide radiation safety rules to each veterinary radiographer including any restrictions of the operating technique required for the safe operation of the particular x-ray equipment. The purpose of this examination is to ascertain that every unregistered assistant (any individual who is not a board certified Registered Veterinary Technician or a licensed veterinarian) has familiarity with the radiation safety rules.

Please read the Radiation Safety Booklet provided by your employer/supervisor and then answer the questions below. You may refer to the booklet while taking the examination. You are required to achieve a passing score of 80% in order to operate radiographic equipment.

You may not operate radiographic equipment until you have successfully passed this examination or can provide other proof of Radiation Safety Training.
