

MEMORANDUM

DATE	March 30, 2026
TO	California Veterinary Medical Board (Board)
FROM	Justin Sotelo, Policy Specialist
SUBJECT	Agenda Item 10.A. Status on Pending Regulations

Regular Rulemaking Process

A regular rulemaking package moves through the following phases:

- **Concept Phase:** a program identifies the need for a new regulation or a need for clarification or revisions to an existing regulation.
- **Production Phase:** the preparation of an entire rulemaking package for initial approval by the Department of Consumer Affairs (DCA) and the Business, Consumer Services and Housing Agency (Agency) and initial submission to the Office of Administrative Law (OAL).
- **Initial Filing Phase:** upon initial approval by Agency, submission of rulemaking package to OAL for publication and public comment.
- **Final Filing Phase:** the preparation of the final rulemaking package for final DCA, Agency, and Department of Finance (if there is a fiscal impact) approvals and submission to OAL for final approval.

Four regular rulemaking packages are pending in various phases of the rulemaking process, as described in more detail below.

1. Records—California Code of Regulations (CCR), Title 16, Section 2032.3

Phase: Production

Summary: This regulatory proposal would:

1. Clearly define two sets of requirements for animal patient records – single animal patient records and group of animal patient records;
2. Change the logical order of the required information that makes up an animal patient record to follow a SOAP (Subjective, Objective, Assessment, and Plan)

- format for recording patient medical encounters and medical record documentation, which is taught in the majority of veterinary schools; and
3. Make record keeping requirements less prescriptive and allow veterinarians, in their professional judgment and in accordance with generally accepted standards for practice in the community, the flexibility to add other types of information besides the Board-mandated content.

Status: Corresponding legislative amendments to Business and Professions Code (BPC) sections [4826.6](#) and [4855](#) were included in the Board’s Sunset Bill, Assembly Bill (AB) [1502](#) [Berman, Chapter 195, Statutes of 2025], which was approved by Governor Gavin Newsom on October 1, 2025. These amendments became effective on January 1, 2026.

As a result of the legislative amendments, this regulatory package is in the production phase of the rulemaking process and is being prepared for initial DCA Director and Agency approvals. Board staff will submit this package to Regulations Counsel in April 2026 to initiate the review process and to obtain initial approvals before submitting to OAL for publication and public comment (initial filing phase).

2. Licensing and Registration Examinations—CCR, Title 16, Sections 2014, 2015, and 2015.2

Phase: Production

Summary: This regulatory proposal would repeal CCR, title 16, sections 2014, 2015, and 2015.2. Section 2014 (previously, CCR, title 16, section 2014, subsection (b)), which deals with the grading method for the national veterinarian examination, and section 2015.2, which deals with the administration of the Veterinary Law Examination (VLE), were originally proposed to be repealed via a Section 100 rulemaking package in 2025; however, they were deemed substantive by OAL and, therefore, had to be excluded from the Section 100 package.

Prior to the April 2025 Board meeting, it was also determined that CCR, title 16, section 2015 could be repealed for the following reasons: BPC section 4846 sufficiently ensures veterinarian license applicants have demonstrated they are competent to practice regardless of the period between the national examination and the VLE.

Additionally, subsections (c), (d), and (e) are obsolete (due to the elimination of the California examinations) and should have previously been repealed in the Section 100 rulemaking package, as there are no longer two examinations (national/California) to mark the beginning and end of the sixty-month period before applicants are required to retake and pass all examinations.

Status: This regulatory package is in the production phase of the rulemaking process and is being prepared for initial DCA Director and Agency approvals. Board staff will submit this package to Regulations Counsel in April 2026 to initiate the

review process and to obtain initial approvals before submitting to OAL for publication and public comment (initial filing phase).

3. Civil Penalties for Citation—CCR, Title 16, Section 2043

Phase: Production

Summary: This regulatory proposal was also contingent on the approval and enactment of legislative changes - amending BPC section [4875.2](#) and adding section [4875.7](#) regarding unlicensed practice citations (also included in AB [1502](#)), which became effective on January 1, 2026. This proposal would remove references to unlicensed practice citations, as there will no longer be a need for unlicensed practice citations to be assigned a classification, as a result of the legislative changes.

Status: This regulatory package is being prepared for Regulations Counsel review and initial DCA Director and Agency approvals. Board staff will submit this package to Regulations Counsel in April 2026 to initiate the review process and to obtain initial approvals before submitting to OAL for publication and public comment (initial filing phase).

4. Registered Veterinary Technician (RVT) Pathways—CCR, Title 16, Sections 2068.5 and 2068.6

Phase: Production

Summary: The Multidisciplinary Advisory Committee's (MDC) RVT Subcommittee was tasked with evaluating all RVT registration pathways and making recommendations to the MDC and the Board. As a result, regulatory proposals to amend CCR, title 16, section 2068.5 and repeal section 2068.6 were approved by the Board in January and July of 2025. Prior to the July 2025 Board meeting, it was determined that the proposals would be merged into one regulatory package.

Together, the proposals would: address concerns related to “qualified instructors”, the number and location of required clinical practice hours for RVT applicants, supervising veterinarian license requirements, and how supervising veterinarians attest to the clinical practice experience of RVT applicants; and, eliminate the experience only pathway for RVT registration that currently only exists for out-of-state applicants.

Status: The regulatory package will be prepared for Regulations Counsel review and initial DCA Director and Agency approvals. Board staff will submit this package to Regulations Counsel in May 2026 to initiate the review process and to obtain initial approvals before submitting to OAL for publication and public comment (initial filing phase).
